Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Removing the Water by Meter Write-off Policy,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Respondent skipped this question

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

More pressing, basic amenities to spend money on. Sports hub is luxury.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

To allow for possibility of increased numbers... it’s one of the only places in Greytown where kids can meet up and socialise independently.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I support. We moved here from Wellington two years ago. Our children are 14, 12 and 7. The facilities we had access to in Wellington (Nairnville) were used often and are greatly missed. We can’t loose these spaces.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes. When we were in lockdown, it was perfect... few cars, lots of families out biking. Would be great to see better access to mountain biking tracks! We live on the west side of town and I do worry about my youngest biking across Main Rd to school.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Perhaps subsidise compost bins or worm farms for ratepayers. I hate the unnecessary packaging on food items at Fresh Choice. Community push for more sustainable packaging on local takeaway providers. The above 2 are where the majority of our rubbish comes from.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Dark sky reserve - yes! Double is a big increase but I don’t really understand so no comment.

Q1 Do you agree that the water supply should be Council's main focus next year?	**Yes**
Q2 Do you think it's important for Council to develop a Water Conservation Action Plan?	**Yes**
Q3 Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank	**Offering subsidised water tanks, at cost, paid back over a period of time** **,** **Requiring new builds to have their own water storage solution**

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

I agree that water supply should be Council's main focus next year

I think it important for Council to develop a Water Conservation Action Plan

I support reducing the water allowance per property

I do NOT support removing the Water by Meter write off policy

I support offering subsidised water tanks, at cost, paid back over a period of time. BUT these tanks must be of a substantial capacity, and not just 220 litres, or else they
should be in multiples of 220 litres. A 220 litre tank on its own is of minimal use.

I strongly support requiring new builds to have their own water storage solution. Again, these tanks must be of a substantial capacity, and not just 220 litres. Place them
in-ground if yard space is a problem, but ensure that their provision is a requirement for
every new build.

Actions
Sort the drinkable water supply for Martinborough
Sort the flooding issues in Featherston
THESE are the priorities, not 'nice to have' sports hubs

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Respondent skipped this question

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Q7

No

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I do NOT support my rates being used by Council to purchase more space for sports and recreation in Greytown

I do NOT support any funding for the Greytown Sports and Recreation Hub proposal

Let the Ministry of Education fix the problems in the existing Kuranui College Gymnasium.
If Greytown wants a ‘nice to have’ community facility, then Greytown should fund this. It should NOT come from rates.
Featherston has the South Wairarapa Sports Stadium - direct rates money to upgrade this for wider community use, rather than purchase land and invest in a Ministry of
Education building in Greytown.
We are an amalgamated district and the purpose of the amalgamation was to keep costs down and share resources between the three towns. This is a time of great uncertainty for many with their jobs and income, which is all the more reason to curtail spending, especially on “nice to have” facilities.
There are far more urgent infrastructure matters for SWDC to spend money on, particularly water supply, waste water, flooding issues.

strongly against removing the Water by Meter Writeoff policy

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It's a lot of bang for the buck. Lots of use in Featherston which still has a high proportion of commuters. Allows people who couldn't use it at other times to enjoy the facility and builds community

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Firstly and strongly, Council needs to stick to core business and get three waters sorted.
This is too much money for one sector of the populace- sporting people in Greytown. There are free opportunities for sport and recreation in the natural environment. It would be lovely for Kuranui to have a bigger gym but this is not something a small Council should be involved with.
There is a large indoor sports facility in Featherston. It would be far preferable in my mind to allocate some further resources to maintenance and use of this facility. Bang for buck again. If the Greytown Hub is proposed to be a facility for South Wairarapa, why can't Greytown and Martinborough people come to Featherston to use the one that exists?

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I support partnerships between council and community groups, and council expenditure which is projected to add value to communities by encouraging tourism spend. Particularly linking the Remutaka Cycle Trail to Featherston, and tracks around Lake Wairarapa.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Good to see this in the plan.
Unfortunately a rise in the cost of bags will probably correlate to a rise in rubbish being dumped by rural roadsides. How will this be managed? Including some education about actual cost of rubbish disposal in Council comms incl in the local rags might be an idea.
Strongly support more and more accessible recycling facilities.
Has the practicality of wheelie bins been properly investigated for Featherston? It does get a bit windy.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

What about basing some staff at Featherston, at the community centre, the info centre, or https://www.trademe.co.nz/a/property/commercial/lease/listing/2451207484?rsqid=fcae5011b2ac40b0829c93921bf412e4-001&bof=IF774H9l

Also, in a post-lockdown world, can you look at more work-from-home arrangements to alleviate pressure?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

in Section 3, it is mentioned that there is $50K allocated to maintenance, and planting of, trees. I support any submissions made around new trees in and around Featherston. We are desparate for trees on our main street.

The jump in fees for community buildings is massive. In the past I have brought musicians to the Kiwi Hall including Delaney Davidson, Ebb & Sparrow, the New Zealand Guitar Quartet, Pangaea (from India) and assisted with the Time Travellers Ball, and other events in the Anzac Hall. I can tell you that none of them made me any money, breaking even was a bonus, and all I wanted to do was bring quality performers to the community. A 35% rise in fee for the Kiwi Hall will put an end to it's viability as a venue, none of us can afford to lose an extra $70 on events. I had a nationally known band booked for October but this seriously has me questioning whether I should just give up. You finally fixed the broken window in the toilets and put something into maintenance of the toilets, made it an actually useful venue- now you won't have anyone using it!
The Anzac Hall is already too big for most events and a $75 (20% increase!) in the cost of just puts it even further out of reach.
I was utterly gobsmacked to hear a member of the previous council say in her mind, the Anzac Hall was an equitable facility to the Waihenga Centre and the Greytown Town Centre building. The kitchen is tiny and impractical, the roof/high windows still leak, the seating is SO uncomfortable for any performance more than ten minutes, it is dirty and needs to be refoamed.
How can you justify charging so much more for hire?
Because you finally did the bare minimum in maintenance, (that window was broken for months and the wiring was dubious at best for years) and now we will be charged as if it is a premium brand new facility?
And this comes as you are proposing spending hundreds of thousands on new sports facilities for Greytown? What about arts and culture? what about community building?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Why not?

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Greytown is an incredibly boring tourist town for the wealthy, and has no sense of community away from its pubs, churches and outdated attitudes. Creating a new sports/recreation hub might finally bring the town into a space young people want to be.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

There should be cycle trails connecting Greytown, Featherston and Martinborough, across farmland if necessary. I am a keen cyclist and have lived in a number of places and never felt as endangered anywhere else when riding on roads. Driver education is slow, so I'd rather be able to ride away from the roads.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

South Wairarapa District Council Annual Plan Consultation

Greytown Junior Football Club Submission
May 2020

The Greytown Junior Football Club is writing in support of the proposal to create a Greytown Sports and Recreation Hub at the rugby club grounds, a mini hub on the current bowls club land, and contributing to a full size gymnasium and events centre at Kuranui College.

Greytown Junior Football Club is in a phase of significant growth – to date we have 121 players registered for the 2020 season, and last year 110 players went through New Zealand Football's Skills Centre programme (run locally in Greytown) – demonstrating the strong support our community has for the code and opportunities it presents for our kids.

Currently the club struggles to host festival events and home fixtures due to lack of green space to support the size of the Wairarapa competition. Our current home ground, Soldiers Memorial Park on Kuratawhiti Street, is a cricket ground. It has limited room on sidelines for supporters, playing fields are squashed together, and the cricket clubrooms and toilets are inadequate to serve the needs of hundreds of children on fixture days. Team training and Skills Centre sessions are currently run on Greytown School property.

A dedicated Greytown sports hub and mini hub will enable the junior football club to:

- Have more greenspace at what is currently the rugby ground for our training sessions, junior festivals, and games.
- Have clubrooms with changing areas and storage adequate for the number of children using the facilities and gear the club uses.
- A permanent home for our football Skills Centre.
- Flood lighting for when the Skills Centre and team training sessions run later during winter months.
- Have central locations that makes it easy for everyone to bike/walk to training and games.

A full sized Kuranui Community Gymnasium will enable:

- If the Council contributes funding to a full sized gymnasium at Kuranui College, the facility automatically becomes much more usable and cost effective as competitive sport will be able to be played at the facility.
- Other codes such as futsal, basketball, and netball can play on competition sized courts.
- Greytown can host a wider range of fixtures from the region and nationally and has the potential to become a central hub for the region. As an example, the CEO of Capital Football has written a supporting letter for this proposal and indicated they would be interested in making Greytown the home of futsal in the Wairarapa.
- If the council do not contribute, the court will be 1/3 smaller and competitive sport will not be possible. Relegating it to a training facility only.

Greytown Junior Football club would like to also make a verbal submission to Council in support of this written submission.

Yes

Q6

Why is this?

I am aware of a number of children who would utilise the swimming pool more if the hours were to be extended.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

It seems logical to be future-proofing Greytown by ensuring a sports and recreation hub is available and maintaining current greenspace in this town. It will benefit a cross section of our community - making it a sensible move for all. During all the years of trips to Featherston, Carterton and Masterton for sporting endeavours I always wondered why Greytown could not have a hub of their own. From what I have observed we are a population of keen sportspeople - young and old -which will ensure the hub would be utilised sufficiently. Our population is also on the rise, as are the Kuranui College numbers; clearly, this is an opportune time to get it right.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Yes

Q6

Why is this?

It’s a wonderful opportunity for all children, in the short summer that we have, to have full access to a swimming pool. Both for leisure & also to increase their water safety skills.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

Understand that there is a need for more space to be provided for other sports within the South Wairarapa but feel selling the large green outdoor grounds space that Greytown already has would be a huge loss. Those grounds can not be replaced once gone & that would be tragic.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Respondent skipped this question

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Respondent skipped this question

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

There are basic services that need to be sorted out before money is spent on a sports hub. 1 - Water is a huge issue, we should not be in the situation of having to have total water
bans during summer and this situation is only going to get worse with climate change. 2 - The sports hub is not going to be of benefit to Featherston residents, much like the Waihenga centre is of no benefit to Featherston residents now. 3 - We are entering into uncertain times in a post covid world and I am not happy to be paying more rates to fund a sports hub which myself and my family will never use, when our water situation needs to be urgently addressed.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Rugby Club land,

Purchase of the Bowling Club land

Q11

Why is this?

I chose partial because there should be discussion on the sale price offered by Trust Lands Trust. I served on the Trust from 2004-2016 as Deputy Chair and Chair of the Grants Committee. I disagree strongly with the view that the Trust must suddenly charge a "commercial rent" and impose a commercial valuation on Recreational land. Commercial tenancies trade and have an income stream, how can these tenancies equate with recreational land tenants whose income is limited to subs and bar takings?
In my time on the Trust, we made substantial grants to the community such as $500k toward the Town Centre and $300K toward Cobblestones we also sold properties at a greatly discounted value, such as all leasehold residential properties and the Arbor House Land, which was also funded by a matching grant , this allowed Arbor House to freehold the land to borrow to build their hospital wing. Trust Lands thereby have established a precedent for heavily discounting the value of land sold for the benefit of the community.
Trust Lands have an obligation under the Act to foster the well being of the community. Selling off recreational land , which they have controlled for over a century, on the presumption that it should be sold for housing is preposterous and, I suggest, is a sales ploy to maximise their return when disposing of the land.
I strongly support the concept of the land being used for a sports hub, which will make the rugby club land available all year for community use rather that a few rugby players , at weekends, for less than six months.
I urge Council to consider the foregoing when negotiating the purchase

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

A more comprehensive dialog of exactly what action is going to be taken to rectify the issues surrounding water supply/waste etc and allowing transparent input from ratepayers and residents to determine what actually suits the needs of the people residing here and the environment long term.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

This is a luxury while our taps and toilets run dry throughout Summer, our waste water systems run back onto properties and streets, the constant issues arising from leaking infrastructure. Focus on our towns having unhindered access to proper supply and sanitation before spending money operating facilities with limited associated needs.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

There are already numerous facilities throughout SWD more than capable of supporting the needs of the communities, not to mention the huge outlay and ongoing costs for residents who will not have access to use the facilities in Greytown or any desire to supplement an extravagant and unnecessary hub for an already overcapitalised 'show' town while the largest portion of rates are being collected from a completely ignored town with failing core infrastructure.

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Sport and Recreation is vitally important for the wellbeing and development of all people. An indoor facility where the community only have to contribute 25% is an opportunity that can't be missed. Kuranui College is one of the key facilities for the South Wairarapa. Not only does it provide opportunities for young people to grow it employs 80 people and invests hundreds of thousands into the local economy. A full sized indoor facility will open up huge opportunities for the young people attending the college but also for any member of the community. New sports and recreational opportunities will be created. The college is growing 30% in 18 months and this will allow the needs of our young people to be met.

Yes

Q6

Why is this?

More value from having a pool

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **Yes**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **Yes**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I am pro funding as for sometime now sports facilities have not met the needs and appetite of the community. The plan for the hub is a win win as the benefits to Greytown Trustlands means they'll be able to continue the great support they provide to the community. It also takes the pressure off the use of Greytown School grounds. With a growing community and youth population it would be a massive disservice to not make this happen. What an asset the hub will make for Greytown, I'm excited for our kids!

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10 **Respondent skipped this question**

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes to walking and cycling, so much potential unexplored!

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I think the region should look to lead on business and sustainability , the combination is the future and we should be architects of how this can be modelled to the rest of rural NZ!

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Increased accessibility

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **No**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **No**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The greytown sports and recreational hub is an essential part of the community. I'm shocked to hear it could be taken away. Having grown up in greytown it has played a significant role in bringing the community together. I believe it is a crucial aspect in rural NZ, not only supporting the sporting community but also for mental health et and physical well being including younger and older generations.

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Only if infrastructure is there to support walking and cycling.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Encourage Wairarapa businesses to use recyclable packaging.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

That aim should be a constant target of getting rid of dead wood and eliminate inefficiencies and focus on customer service.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Be sensible with our rates. Involve residents in real honest consultation rather than tokenism. Don't make stupid financial decisions behind closed doors. Focus spend on what is necessary for a district to survive in this uncertain times post Covid. Do NOT fund luxury projects that are 'nice to have". In other words, surprise all your voters and rate payers and use common sense and thought when making decisions that impact us.

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Reducing the water allowance per property penalises large households.
Support offering decent size subsidised water tanks.

Water meters are expensive to install so maybe leave/postpone for a year or two.

Water is #1 priority.

Not clear where 'Orchards Development' water will come from.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

More info needed about when schools use local pools, also clubs. Get notices up to date - as often it can say 'pool open 'til 7pm' only to find out that only a club has access after 5pm.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

'No' to Council providing more space for sport and recreation in Greytown. 'Another year'

GTLT needs to be prevented from selling the important assets in East St Greytown. If Council is to buy - needs to be half price or gifted. They are already owned by us.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Agree -maintain trees. Other road maintenance will have to wait. Water & sewage #1 & 2 priorities.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Increase rates to dump rubbish needs to be carefully thought through - if too much, people will 'fly tip' all over the place.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Not a big priority this year. Small budget only.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Water supply, sewage etc are #1 priority. Everything else is secondary. Climate change is here to stay and so therefore, are droughts.
We need upgraded social housing - more as well. There is space at Westhaven, West St, Greytown, to build modern units like those on corner Kempton & Wood Sts (don't know who owns them).
Where are the staff for Orchards Development going to live? We don't need more barn size mansions around the town, we need modest to low cost housing. Council needs to make sure it happens.

I don't agree to huge borrowing this year just to fund these plans - reduce spending plans and keep rates increase low.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes! Would love to see some new walking and cycle tracks developed in Martinborough. We have very few!!

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

We should be encouraging everyone to reduce what they put into the rubbish bags and help people to compost food scraps and weeds.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Would like to see the Martinborough Spatial Plan progressed. Also we need to work hard to get lighting sorted so we can progress the Dark Sky Reserve project.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Pleased that the Council is focussed on improving infrastructure, particularly water supply, sewage disposal and storm water. Keeping our roads in good shape is also very important, as are the footpaths in the towns.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

I would suggest to remove the water by meter write-off after people have been provided with a reliable easy way to monitor their use.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

I suggest providing more information on who is using it when. If it is the same people simply using the pools longer then I suggest to stop the trial.
If it can be shown that the pools are now available for a wider public I suggest to pick one evening.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Flooding risks are essential issues, but are not being reviewed till next year.
Recreation improvements are not essential as there are sufficient options available at the moment.
MOE will support a gymnasium fit for purpose, the council paying so much for only a very small fraction of the population is unacceptable. We do not need another event centre, we have one in Masterton and the facility will barely be available for other members of the public. If a select group of people want something more fancy than other schools let them pay for it themselves, rather than making others pay for it.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

It is good to see that the council is focusing on transport as I consider this essential.

Promoting cycling and walking will not only help to battle climate change, but also increase physical and mental health.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Respondent skipped this question

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I am in favour of pay per user. However, increasing the amount of plastic is counter productive.
I suggest that people pay for a wheelie bin and pay per empty? This is how it is done in my home country and it really encouraged people to reduce waste.

Like with emergency water tanks, the council could consider to provide composting bins at cost.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

The people are the key to success, also for the council I support that the council invests in quality staff and what they need. In the end this will be for the benefit of all residents.

Staff needs a healthy environment to work, as well as efficient systems to perform at the best of their capabilities.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Considering the current economic uncertainty I recommend the council behaves like responsible citizens should do too. Seriously consider their spending and for now limit yourself to what is needed to prevent needing help in the future, putting pressure on the social system (in the council's case the residents). Borrowing always incurs at a higher costs, which in turn will be put on the residents in the future. Therefore, I do not support borrowing for non-essential "items".
I hope the council takes their residents financial uncertain position serious and will ensure the pressure on their residents is as small as possible. This means no non-essential spending like sports clubs, but focus on roads, water management etc.
Another recommendation would be to evaluate if the council actually needs so many sports facilities? Can we use fewer facilities, of better quality and provide transport. This might be a way more efficient way of spending money.

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I completely support the funding. Council owns very little recreation space in Greytown and has money set aside for this purpose. Greytown is growing and will need more sport and recreation space over time. This is a proposal that has come together from the community working together and having a number of needs and interests represented, therefore it represents what the community wants and will have excellent buy-in.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

All new builds must have water tanks
Deal with large leaks around towns rather than focusing on small domestic ones.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Why is this?

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Yes

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8

Yes

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Greytown has significantly less recreation space compared with other towns. Greytown is a growing town. This needs to be fixed because population is growing. Kuranui is a growing school and must not have an under funded gym. We must ensure it has a full sized gym which will be utilised by the entire south wairarapa community

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

The Greytown Sports hub is a once in a life time opportunity to take action to cater for the growing population of the south wairarapa. SWDC must take this opportunity to purchase the land from Greytown Trust Lands trust. Kuranui college must be supported to build a new full sized gym which will be an asset for the entire SWDC community. South Wairarapa is a growing community, Kuranui is a growing school and coming together to provide appropriate sporting facilities for the entire SWDC is imperative. SWDC must borrow long term to fund this.

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

It has always bothered me that we have to put plastic bags out every week, which is why I got myself a Wai bin. I realize that is also plastic, but the bag is far more likely to end up floating in our waterways. We use biodegradable bin liners in the house, which go in to the Wai bin.

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I believe there to be legal impediments to the proposal of Greytown Trustees selling the lands. My submisson is that the proposal should not be advanced pending all parties learning about the historical and title issues surrounding the lands. I believe there are alternatives that should be explored before any decisions are made.

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It's hotter longer and it keeps the community active! The pools are thriving

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

FUTURE PROOF A GROWING COMMUNITY - A growing community needs up to date facilities, the Kuranui gym is not fit for purpose so what better time than now to make it the best it can for the students and wider South Wairarapa Community. Green spaces are also one of the biggest assets we could look after for generations to come - Not to mention preserving history of what is supposed to be a "historic country village".

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I think there should be consideration/consultation given to neighbours of people setting up Airbnb and similar. In particular the situation where people run a business using access like a driveway which they only have an easement on and have no need to consult with the driveway's owners about the increased traffic, increased use and associated cost (which they don't have to contribute to), increased noise and disturbance etc. It removes property holders' rights to manage their own property and can decrease enjoyment of their own home and even property values.

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Additional multi purpose water storage and irrigation options

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Increased commuter population and longer summers are meaning pools are not currently being used optimally. We have the facilities, let's use them better e.g. into the evenings so commuters can use them as well.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I support as the population is growing and current facilities are struggling to cope e.g. community gym. A hub will also bring the community together more. The existing rugby and bowling clubs should be retained as is in order to maintain their respective histories and current functionality. Why sell them to housing only to have to re-establish them at a higher cost?

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes and have the footpaths, lighting and road widths to support them. We have a mix of young and older active peoples and should support a healthy lifestyle.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Take the lessons learnt from other areas and test them here

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Agree. Supported by clear, reported metrics

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Thank you. We need to plan now for our growing, active population

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Water conservation is only one part of what the SWDC should focus on. Access across the District is a core need, Waste is a huge issue and very costly to deal with, Rubbish and recycling are very concerning and above a balanced environmental policy is the most important issue that needs to be set in clear planning.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Greater access for people who are working during the hours the pools open at present.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The Land is already owned by the community so why should the SWDC need to purchase it from a community Trust?????

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes with approved access along river banks and other areas which are not roads. Napier and Hastings have a network of tracks which are exceptional. SWDC needs to do the same.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Greater segregation of rubbish and waste is needed and SWDC should provide bins for composting waste as well as the recycling bins supplied at this time.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Remember that the council is the employee of the community not the enemy - greater effort needs to be made to work with ratepayers in a constructive, cost effective and harmonious manner

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Regarding the Greytown proposal for the Sports centre - SWDC should not be involved in a development on Education Department land as the HSE and other legislative requirements for schools will keep evolving and changes may end up excluding other members of the community from being able to access the facilities.

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

We have the rainfall so must conserve this water in quantity for drier conditions.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It is excellent low impact exercise for all ages.... why have a facility getting limited use.
I would like to see salt water being used rather than chlorine.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

With other vital needs for rates, the limited use of such a facility and the Covid 19 effects on the communities, this is far from the right time to be even considering such a venture. Get what we have efficient and look at this in 2022

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Safe, totally off road walking tracks, available for cyclists who give walkers consideration.
A similar width to the Greytown rail trail .....away from any vehicles.
If the Wairarapa towns were linked in this way, it would not only improve the health of the population but also reduce pollution from vehicle use and bring cohesion to the area rather than competition amongst the towns.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

The introduction of wheelie bins for general rubbish should not incur more cost than the plastic bags.

Assist all stores to reduce waste at their end so that residents don't have it in the first place.

I do not support the employment of expensive consultants for any purpose.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I require specifics here....what is meant by, for example, 'investing in our people'..... all of this area needs clarification.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Only that CEO, councillors Etc keep their feet on the ground.... remember who they are working for/are employed by and do what is right by these people..... especially given the current world situation.
It is not about them!!

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I think its important to maintain footpaths and roads. My understanding is that there is already opportunity for walking and cycling in the region, improving walking and cycling tracks may have benefits to the community and tourism.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Charging extra for council rubbish bags or providing wheelie bins wont discourage people from placing recycling with their rubbish. Not collecting rubbish bags that have recycling in them may be a more effective method of encouraging people to recycle. Having small recycling bins in urban areas may have merit.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Building capability and delivery of services is important in any environment. $800,000 seems like a lot to spend - more transparency around proposed expenditure would be beneficial for rate payers to make informed decisions i feel.

Lois Pitt 21st May, 2020

Councillors,

On the subject of the **Sports Hub in Greytown**

Greytown District Trust Lands Amendment Act 1993

13 Trusts on which lands to be held

Subject to the express provisions of this Act, the Trust Board shall hold, and shall be deemed always to have held, the trust lands for the following purposes:

(a) establishing, assisting in the establishment of, or generally assisting, educational facilities (including libraries) in the district:

(b) promoting and fostering in the district, or among persons who are, or who at some time have been, resident in the district, education generally, including (but not by way of limitation)—

(i)the cultivation of; and

(ii)the imparting of knowledge, proficiency, and skill in—

arts, science, technical subjects, literature, physical welfare, and other cultural purposes:

(c) for the purposes of public utility and for the purpose of maintaining and promoting in the district the general well-being of the public.

I fully endorse the establishment of a Sports Hub in Greytown and the retention of the ground under the Rugby and Bowling clubs.

I do not endorse the Council buying this land from the Greytown Trust Lands Trust. **The land already belongs to the residents of Greytown** who have elected the Trustees of the Trust to manage it for the benefit of the residents. As the above extract from the GTLT Act states in section © the public utility and general well being of the public are two of the purposes the Trustees must bear in mind when making decisions about the grounds.

Greytown has been in danger of losing green space to housing for several years now. House sections are now covered by residences larger in proportion to section size than ever before.

Forward Council planning for the area in the West St/Kuratawhiti St/Mole St/Wood St block done before that was sub-divided had provision for a playground/green space. That space has vanished.

We cannot afford to lose these green spaces because they will never be replaced by Councils, Developers or GTLT Trustees looking only at the bottom line of a spread sheet.

The value of a Sport Hub in Greytown will be measured by the physical and mental well being of the residents, young and old, that will be even more important now in times of pandemics, economic uncertainty and the associated stresses.

We must retain these green spaces not only for Rugby and Bowls but for all the sporting activities now and in the future, be they organised competitions or impromptu games of tag or bull rush.

Please negotiate with the Greytown Trust Lands Trust to retain these grounds without buying something we already own. What will be next to feel the pinch of excessive rentals to GTLT? Cobblestones? Will you buy that too?

Offering subsidised water tanks, at cost, paid back over a period of time

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Water supply and safety need to be the priority not water resiliency. The water resiliency strategy appears to be focused on adding further penalties and water usage reduction for the community, with the exception of subsidising water tanks.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

This is a nice to have and not needed as an extra cost to the community. My family and I are regular Featherston pool users and standard hours work well for us.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I do not support this hub on the grounds it meets the needs of the few, there is an underfunded sports hub in Featherston which is our district's largest town, the cost is too high.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I support all activities outlined in the land transport plan. Yes we need more connecting trails and I would add investigating a connection between Featherston and the Tararua Forest Park via Bucks Road in consultation with DOC.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

No

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Any additional waste costs can lead to unauthorised dumping which Featherston sees too much of. The idea of waste minimisation needs to be tackled at a central government level and reduced at source to be effective i.e. reducing packaging, national recycling centres, and end of life recycling subsidised by manufacturers/importers as they do overseas.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

This plan was very light on detail. I support capability building but this is a significant amount and how is it targeted? Better technology or upgrades to create efficiencies makes sense.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I would like to add an additional priority to the Water plan. Storm water control and drainage is of particular concern to Featherston and likely to be across the other towns. I would like to see action on know hotspots rather than just a review as proposed. Increasingly heavy rainfall has resulted in flooding and property damage. Immediate remediation to existing high-risk drainage infrastructure will buy time until a comprehensive long-term plan is established.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Properties which have swimming pools and use excessive water volumes should not be treated the same as properties without swimming pools

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It is a community facility and if there is a need for longer hours this option should be available.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Rugby Club land,

Purchase of the Bowling Club land

Q11

Why is this?

I selected partial because does the land and facilities not already belong to the community and why should it be paid for by rate payers when it already belongs to them.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

As the terrain of the wairarapa offers great scope for walking and cycling this should be encouraged by providing safe roads and bike trails for walking and cycling

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I think increasing the budget LTP amount by double is not acceptable in the current covid 19 environment.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

No

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

We do agree a modest reduction in the household water allowance may be in order. But do not agree it should be reduced to the same as Carterton.
We agree with offering subsidised water tanks, potentially at cost, with the ability to pay off over a period of time.
We do not consider it necessary to change the current water meters to 'smart' meters. There will be considerable expense if this is done. The council could encourage property owners to keep their own record of meter readings so they will be able to tell if there is a leak.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Providing opportunities for our children to swim and to learn to swim is vital considering the number of drownings each year.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

We agree that monies be set aside to contribute to a new gymnasium at Kurunui College. This will be of great benefit to future generations from all of South Wairarapa.
We do not agree that monies be spent purchasing land from a Trust whose purpose, as set out in their mission statement below , is to contribute to the good of Greytown alone.
The Greytown District Lands Trust mission states; “As exemplified by our tag line “Growing the community since 1871” the reason we exist, and our constant mission, is to use the profits we generate from our commercial business activities to contribute in various ways to making our community as strong, cohesive, vibrant and progressive as it can possibly be. In short we strive to make a difference in our community.”
It seems in this instance they are wanting all of South Wairarapa to pay for what they should be doing.
In the Greytown District Lands Trust “Social, Cultural And Environmental Funding Strategy” adopted May 2019. They state “The Trust is as committed as ever to assisting in the development of the community.” Why don’t they apply this to helping the Bowling Club and Rugby Club stay where they are instead of trying to get the SWDC (and hence all of South Wairarapa) to pay for it. If either the bowling club and/or rugby club are not viable due to lack of members then they should consider amalgamating with a similar club in South Wairarapa.
The Greytown Trust Lands Trust has as its aims, to promote education and public utilities within Greytown. Why are they now selling a prime public utility?
With the proposal to purchase the rugby club and bowling club land, the residents of Greytown will benefit twice over, as the monies from the purchase must be used by the Trust to eventually benefit Greytown.
If Greytown residents want more ‘green space’ they should ask the Lands Trust not to sell the land for housing.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Respondent skipped this question

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

We agree the council develop a waste minimisation plan. We would like to see more information about what exactly happens to ‘plastic’ recycling. We would also like to have the types of plastic able to be recycled extended from types 1 & 2.
We do not agree with provision of wheelie bins for general rubbish as this could decrease the amount of recycling and increase what is going to landfill.

Page 9: Discussion Topic 5: Building Capability

Q16

Respondent skipped this question

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Reviewing Stormwater Hotspots
As each time there is a reasonable downpour of rain in Featherston a number of intersections flood we agree that ‘hotspots’ be reviewed. With the flooding over SH2 a couple of years ago at the northern end of Featherston, and water lapping at the undersides of house decks, and the comment from one of the SWDC employee’s that Featherston’s stormwater was “fit for purpose”, we would hope that a review would be a little more objective.

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Featherston currently has underutilised sporting facilities less than 15 minutes drive from Greytown. The amount of time this trip takes would be no longer than people living in larger urban centres travelling from home to their own sports hubs. Featherston's facilities could be easily shared amongst the various sports teams of the two towns without running into any scheduling or capacity constraints. There are many more vital issues to be spending ratepayers' money on at this time, namely around sewerage and water supply upgrades. As a district, we need to think hard about our priorities to ensure that we get the most basic infrastucture essentials up to scratch, instead of spending on luxury items, such as news sports facilities.

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

As a driver, I see no glaring issues with the state of either our arterial routes or secondary roads compared to other districts. As a cyclist, I would like to see a safe cycling link between Featherson and Greytown that didn't involve SH2, so I can skip using the car. I support further promotion of walking and cycling in our district.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

I would like Council to create an Action Plan that ensures long term healthy waterways, and environmentally friendly water conservation methods, over short term economic gain.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Enabling community wide and fees-free access to the swimming pools enables people everyone to have improved access to improved health and wellbeing. It is especially important for kids to be able to learn to swim and to enjoy water sports with friends and family.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

I support and believe a contribution to Kuranui College gymnasium replacement would support children, youth and adults from all South Wairarapa towns to have access to better facilities, health & wellbeing, as well as professional sporting careers. I do not support purchasing Rugby and Bowling Club land in Greytown as I don't believe this is a priority above for example developing other sports grounds in South Wairarapa such as Cards Reserve in Featherston which has superior drainage and whose junior soccer and rugby continues to excel. Featherston is, I believe, one of NZ's oldest rugby clubs, more than 140 years. Have these facts, needs and circumstances been considered when proposing to purchase Rugby and Bowling Club land in Greytown? I would also like to ask, when was the last real investment made in a project in Featherston?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

If we did not know it already, then we know it now. We have just come out from Levels 4 and 3 of a nationwide Lockdown. People of all ages, abilities and backgrounds have experienced clear benefits from walking and cycling around their neighbourhoods. It has supported people in being physically and mentally well. It has connected people with parks and reserves within walking distance/close to town. Please please please ensure that you invest into track and trails development, walking and cycling, as this will support health and wellbeing for everyone in the Wairarapa, this will bring more people to come to live in the Wairarapa and tourism to explore, and will therefore be a long term investment into health and wellbeing, welfare, conservation, biodiversity, and economic sustainability. Do it for the families, do it for the vulnerable, do it for the children: create real opportunity for your local communities and children in being able to fight climate change.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

"Rugby in Greytown has been around since the 1800's. We have seen our parents and ancestors perform here in different sports for generations. We need to keep our recreational areas for our local community so our young and old have a place to carry on what was started way back then. Sports will help both our young and old to unite and to promote a healthy community both physically and mentally. There are other green spaces that are not used and that could be sold but we mustn't loose our rugby and other recreational areas in Greytown".

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Protection of grape growing land and potential grape growing land

The relatively small areas within Martinborough and Te Muna which have gravelly soils are celebrated world wide for the quality of the wine grown and produced there and provide millions of dollars of income each year. Those parts which are taken for housing are likely to be never utilised again for this. Aside from what amounts to vandalism of these small horticultural areas of unique character, it becomes an irretrievable and permanent loss income which could be benefitting our residents and the people of New Zealand.

In my view, this land should be protected from any future development except for vineyards and wineries.

Dr NK McCallum and D McCallum
Formerly owners of Dry River Wines

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Increase funding for road network and maintenance. The roads have fallen in to disrepair because he road maintenance contractors don't know or don't care about what they are doing. They should be supervised by SWDC, properly trained and competent staff.

Page 8: Discussion Topic 4: Waste Minimisation

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

The council need a well trained, properly qualified civil engineer to organise and supervise the Council's engineering responsibilities with respect to water supply, water treatment, sewerage disposal, road and bridge maintenance and construction. The Council needs experts available (not contractor, but their own staff) who they can consult on engineering matters. I believe this situation is sadly lacking at present.

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Should actively be fixing leaks

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It is a relatively low cost that provides an opportunity for greater use of the pools.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Because it is a lot of money for no additional benefit to the current situation. Also, if the land was purchased for $2.7m using swdc rate payer money to the Greytown land trust that money would only be used to benefit Greytown (in grants etc) rather than the whole of the south Wairarapa.

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Work with other councils/find solutions to recycle other plastics (in addition to number 1 and 2) that are now going to land fill

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I think this is important and agree with the proposed additional funding.

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

I support encouraging new builds to install a water tank but this would be difficult to make mandatory as the primary legislation being the building act does not require this so I don't see how this could be enforced.

No

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Why should council use ratepayers money to purchase land when it already has a sports hub of some sort in Featherston, being card reserve and the stadium. Money would be better invested in developing this for use by all south Wairarapa residents. Given the cost involved any discussion on this should be a long term plan matter, it is fiscally irresponsible to entertain spending such a huge amount to money at the present time on a venture that does not benefit the entire district or the general population.

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Provide composting services. Show that recycled material is actually being recycled and reused in the community

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

The amount of money I do not have a concern with. Input into the way the money is used should be sort as there are a lot of skilled people that can provide information on good decisions for spending

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

More progressive ideas on the environment and waste reuse/minimization is needed

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

While the additional numbers using the pool we're not significantly higher, we think it is worth trialling it for a second year before making a final decision.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The physical and mental health and well being of our young people is hugely important and supporting the provision of sporting activities is an important function of the council. Access to sport should be available to all young people, regardless of their family's economic situation. With a growing older population, supporting sporting facilities for seniors will become increasingly important. The proposed hub will make a significant contribution to the health and wellbeing of its users and also to the development of community within Greytown.

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

The proposal to develop walking and cycling routes within the region is very timely and extremely worthwhile. It will benefit both the local community and attract more visitors to the region.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

The user pays model has been shown to be effective in encouraging more recycling And waste minimisation. We would favour wheelie bins for both waste and recycling, with possibly a tag system to pay for waste collection, while recycling is free. Using large bins for recycling and smaller ones for waste can help change people's attitudes And promote waste minimisation.
The aim of encouraging people to compost is admirable, but may not work very well due to lack of motivation, lack of space or capacity. Down the road, it may be worthwhile to consider the introduction of optional 'brown' bins for collection of organic waste - food, green waste and paper/cardboard - by the council. These have been shown to successfully divert food waste successfully divert food waste, provided they are collected weekly. They would also permit residual waste collection to be done every fortnight.
In relation to recycling, we ask that the council clarify the situation in regard to plastic types. While the wheelie bin information encourages only the inclusion of numbers 1 and 2, there is no prohibition at the transfer stations of numbers 3-7. While this is a bigger issue which needs to be tackled at national level and manufacturers required to change to use of recyclable packaging, clarification at council level is currently required.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

We agree that this is important but feel the priority should be updating of systems and processes and investing in people rather than spending money on, for example, new offices (while of course ensuring the accommodation meets health and safety standards)

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

The long term plan in relation to the Wairarapa Dark Sky Reserve is very exciting, but we are still concerned about the less than safe level of street lighting in Greytown. To walk down West Street at night, we need to use a torch, and we feel this is neither safe nor acceptable.
We are happy that the new council members are working hard for our community and that communication has made this work more transparent. Thank you for your commitment!

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Look at retro fitting water urban town buildings with gutters/collecting and storing the water- or putting into greenspaces- such as stella park. This would solve stormwater flooding in high rainfall events

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Its great to have a public pool, extending the hours, would provide great benefit.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I strongly support the Greytown Sports Hub, and think council support is vital for this to proceed. This would provide a hub for all of south wairarapa, and would bring huge benefits to the whole community.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, council should be playing a more proactive role in the design of urban streets to promote cycling and walking- as a safe and pleasant way to move around town. Streets such as the intersection of McMaster and State highway- have high pedestrian flow and is difficult to cross, this street should be narrowed and create a raised coloured area to signal to motor vehicles and give respect to the pedestrian flow, and increase safety. Streets can be made more cycle friendly- routes to school, college, library and pool should have cycle ways. New subdivisions should have pathways for cycle/pedestrian paths through or connecting to other roads to improve and promote cycling and walking

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Prevent any fast food inlets coming into towns. Ask cafes to support reusable coffee cups. Support the coordination of cafes/restaurants with Waiwaste. Have discussions with supermarkets to encourage bulk purchase, and less use of plastic in fruit and veggies and deli produce

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

yes on the understanding you are working smarter and alongside and with other organisations/iwi and there are meaningful measurable outputs that serve the wider community. I havent really heard much of iwi in this annual plan- please ensure you have iwi at the table on these decisions- this needs to be communicate more effectively and is absolutely mandate

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I havent really heard much of iwi in this annual plan- please ensure you have iwi at the table on these decisions- this needs to be communicate more effectively and is absolutely mandate

Greytown needs a skatepark in the centre of town.
The council ought to look into acquiring the RSA, and making the carpark into a skatepark and another urban park for greytown

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

more opportunity for community to use the pools.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

It's the wrong use of council money. There is already investment in more grounds earmarked. A 1.4% rise in my rates for something that has zero benefit for me and my family and can and should be invested in by others is unacceptable.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Great. Initatives that promote and assist individual health boost community health. Walking and cycling also reduce environmental impact of vehicles

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Become a champion of and innovator in waste minimisation and management. A lot of this demands a mental, cutural shift from community and that needs to be led by council

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Fully supportive of this, however what precisely that means in relation to the additonal funding and its use isn't clear

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Charges (increasing) for subdivisions and indeed the entire cost model are excessive for what is essentially a company or individual taking the risk in creating new housing. Which brings new ratepayers. Council needs to look at the opportunity of a new ratepayer rather than the seeming attutide of them being a cost or drain on council resources. We need innovation in how we add to the housing stock, make our region attractive to come to/invest in. And that means making processes easier and less burdensome cost-wise for investors.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

All domestic households should have emergency Water Storage tanks, not just new builds. With impact of climate change low river flows in summer.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

Keep to last summers hours, lengthening hours would put pressure on volunteer Life Guards

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Rugby Club land,

Purchase of the Bowling Club land

Q11

Why is this?

If the Trust Lands won,t gift to Council the Rugby & Bowls Clubs Land Council have no option to purchase at reduced price, not Market value.
Certainly want these green spaces to remain & definetly not go into housing.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes but currently more urgent issues required by Council ie infrasture with increase in new Sub-divisions

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Respondent skipped this question

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Think the current system is appropriate at this stage

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Respondent skipped this question

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Clearly the Maintenance of Trees growing in Greytown streets through Power Lines on Private property & including Council owned trees in Park Kuratawhiti St. With a major power outage in summer due to trees in lines west end Kuratawhiti St putting the Town Water pump out of action for several hours. Clearly no one has taken any responsibility on inspecting or enforcing trees to be trimmed away from all Powew lines. Its major problem waiting for more powew outage to happen. Also over-hanging trees on North St/ Udy street restrict clear vision with shade & sun with numerous walkers & cyclists on the road with no footpaths

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Respondent skipped this question

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Respondent skipped this question

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

They are well used.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Greytown has less sport and recreation facilities than Featherson or Martinborough. I would like more facilities locally so we don't have to travel as much. It will benefit the community.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Removing the Water by Meter Write-off Policy,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

1. More time and resources need to go into resolving the multiple localised floodings in Featherston township that occur when significant rain falls.
2. The Greytown and Martinborough townships must be guaranteed clean drinking/tap water through reliable water installations.
3. Although the previous application with GWRC has been withdrawn recently, I expect the SWDC to reuse the research and analysis materials that have gone into the previous application IF a new resource management consent process for the Featherston wastewater treatment plant upgrade is initiated. Instead of spending millions (!) of dollars AGAIN on external consultants and document writers.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

There are other, more important issues to address in the SWD region.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **No**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **No**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

There are plenty existing sporting facilities available in the SWD region. Money is better spend on more pressing topics on the SWDC's wishlist, such as clean and reliable tap water, issues with the current storm water system in Featherston.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10 **Respondent skipped this question**

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Q11 **Respondent skipped this question**

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

1. Maintaining road surfaces is a much, a bit more money towards that is needed.
2. Another important topic is the maintenance of footpaths; a simple sprays a few times in the weed growing seasons is required. Especially with more people working from home initiated by the Covid-19 pandemic, but expected to be a lasting change, the upkeep of the footpath needs more money.
3. No more promotion of, nor additional walking and cycling plans are required. Information on the SWDC website, listings with Destiny Wairarapa and the likes are sufficient.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I think SWDC are doing fine, there is support and direction from National Government agencies available if needs be; use that more often/frequent.
Publish on the SWDC website the spacial plans of the 3 townships and wider region, so interested parties can (parly) work out for themselves where residential development, retail, etc is planned/aimed for.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

More support (affordable housing, managing financial hardship, mental health, etc) is needed for the poor and needy in our district.

Yes

Q6

Why is this?

People who work can use the pools after work

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Because i think it is not for the council to fund this first they should get the water pipes sewage systems up to date and flooding areas in the towns.
To met this is more important than thr council funding a sports hub in Greytown do the core jobs first for our three towns.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes we should we have a lovely beautiful area and it is good for every one to be active for good health.
It was so good in lockdown to see so many people with in there bubble doing this around this around the streets of feathy.
But get our core water sewage up graded first in the 3 towns

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Encourage recycling i think over the past few years this has been a positive ways the council has taken with the help of the regional council i think, from our two recycling bins to the big one this seems to be all over the country good work thank you

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

No comment

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

The council has to spend the income of rates wisely
Watch how they spend the money a d dont think its easily to just put rates up out of control treat running the council like a bussiness and spend every dollar wisely

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

No

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

The Wairarapa has plentiful water. Previous council actions have made it difficult for new house builders to develop self sustainable water solutions.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

In gerneal I think it desirable to provide safe activities for young people to do (although older people also enjoy swimming of course). But as with so much else in this plan - the impact of making this decision does not get mentioned.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **No**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **No**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I am frankly appalled by the idea. Again- nothing in the document discusses the long term financial impact. And there can be no net benefit to the Sth Wairarapa community paying again for something it already owns.

I also object as there is nothing in the document that suggests that a large expense at this time would actually have a long term benefit. While it may be hard new for sprts clubs, more and more of them are not going to be viable into the future unless they have a major re-think.

The proposal in teh document at least confuses two issue - helping the school build er a larger gym, and buying the rugby/bowling grounds. Possibly one can be justified without the other. But I suspect the subsidy to the gymnasium would be better dealt with by a fund raising drive to see whether there were willing donors.

Additionally, the consultation document states , as if it were fact, that the "the Greytown Trust Lands Trust's financial support for Greytown Rugby and Bowling by way of rent subsidies on their East Street grounds has become unsustainable." There is no evidence to support this statement - and nothing on any document from the Trust that supports it either. The community already possesses these facility through the Trust, and that should remain. If the clubs that use that land are not able to pay a fair rent and pay suitable maintenance - then it raises, again, the question of whether these clubs are actually viable in the long term in their current form. Just as gold clubs are merging around the country (and in this district) maybe it is time for other sporting clubs to do something similar.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

Respondent skipped this question

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Q11

Respondent skipped this question

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I generally support this aspect of the plan.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Yes

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Q14

Respondent skipped this question

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I support the idea that we should be reducing waste - but I dont think any of the 5 points mentioned above will make much difference. Any start to waste minimisation has to start by identifying where the largest amounts of waste comes from - and then developing ideas accordingly. For example, in some parts of NZ, waste from construction is a major component of the waste stream. This can be reduced by putting incentives into the planing/consent process for example. But a lot of waste in NZ generally needs to reduced at a National Level, by reducing the amount of plastic being used in NZ, for example. The best way to reduce this might be through joint action with other Cities and Council since no single local authority can fight this one on their own.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Its a wonderful idea to build capability - but as with so much else in this document where are the details and where are the measures that would show the added expense is actually achieving anything. Surely you must have some idea on how you would spend $800,000 and how you could tell whether is was making a difference.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Yes I do. This plan is a work of fantasy in many ways. We are about to go into a period of economic uncertainty and some rough times lie ahead. We all know this - except it seems for the people who put this plan together. While other councils look for ways to cut rates increases - there is nothing in here to suggest that the idea has crossed the writers minds. The additional costs, especially for the Sports proposals, will come along at the very time when businesses are going bankrupt and people losing their jobs.

Other councils are already factoring in the considerable drop in income which will be happening this year. Does the SWDC really think its immune to the forces affecting everyone else. A key question for our council should be how to support local businesses and households in the current disaster. But that question is not even acknowledged.

The document is full of 'nice ideas', but almost totally without any indication of what actual actions that might be done to make the idea real. I am sure I am not alone in thinking that a document like this should have a lot more focus on
- what we intend to do, and why
- how we will know that the things we do are effective, both from a community perspective and from a cost-benefit perspective.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Respondent skipped this question

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

I would like to see our region to invest in bigger water reservoir so we don't have such a sortage. Here in Featherston we get so much water over the year it should be easy to have enough. Also I feel the main focus is always on Greytown and Martinborough but with rates as high as in those two places Featherston is always missing out. We are fed up with that.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

there are more important things than paying for swimming pools. There is always river in everyones background.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **No**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **No**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Because sorting out water is more important than people's leisure activities. The priorities should be straight. The budget is so small that doing little bits on many avenues doesn't actually sort much in either of the issues. Focus on the most important thing and then move on something else. If you want to do more on sorting waste water and wairarapa moana than I will happily pay more rates. But not on something in Greytown for start which will mean that someone else has somewhere to kick a ball or throw a ball. Not important. Clean the lake and you have recreation for the whole region.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

we use Wai bins which are reusable and cheaper than rubbish bags. Council should provide the same thing. Pay for reusable rubbish bin. But not through the rates. Each to their own

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

not important atm

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I think council should focus on Featherston as well as the other two towns. There is never a clear message about Featherston...the only time it is mentioned is when a plan or discussion should be made about Feathy..And we have so much to offer if there are any funds to be put in. Greytown and Martinborough has fancy new buildings and lot of funds put into library and tourist information and medical centre. Our newly build medical centre is probably the cheapest possible building so basic you can imagine. Same with community centre , it is used so much and the state of it is not good. We pay very high rates but we pay for the "fancy" other two towns. As I said though the priority is water. Treat your water as you would treat your mother. The issue with water is only gonna get worse. Get ready make changes. Protect our water. Be smart. Forget sport hub.. that is a luxury of last century.

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

If SWDC wishes to continue with land irrigation, it is suggested site are chosen with significant care to avoid environmental and social impacts. The Carterton plant appears to have removed significant wetlands, is next to housing, and SH 2, which is concerning. Additionally, it would be helpful for SWDC to consider enclosing the open drainage courseways, which can flood considerably during heavy rain.

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Bowling Club land

Q11

Why is this?

Although I support the investment into recreation and the Council taking over ownership of these areas, I am concerned about the potential impact of the proposed Sports Hub at the Rugby Club on the surrounding housing and East Street.

I question whether the Rugby Clubs are an appropriate site for all the sports proposed due to the surrounding residential housing, some of which backs directly onto the field, and limited available parking. Under current state, during winter months when the rugby field is in use, East Street is considerably congested, and the odd ball goes awry into a neighbouring property during practices and games. This, and the associated increase in noise during winter, is part of living next to the rugby field, however, this proposal will considerably alter the status quo, without any proposed mitigation, or consideration as to the impact of an increase in patronage at the Club grounds.

The cost/benefit analysis did not mention the impact on the surrounding property or East Street in general at all and there are many to be considered: Increased traffic, increased congestion due to parking, increased noise, increased risk of property damage, potential loss of land value depending on the attractiveness of the development, and a loss of privacy. The cost/benefit analysis also raised uncertainty around whether the proposal was suitable from a future-proofing view due to the size of the rugby grounds. Significant further investigation needs to be undertaken into the Sports Hub proposal, including a full assessment regarding the potential impacts on the East Street area and surrounding housing, and, if the Rugby Clubs is still considered an appropriate site, development of a design proposal that is suitable for the site in question, and mitigates any potential impacts.

I support the Council purchasing the Rugby Club and investing in the gym, field and buildings, and I support the investment in a Sports Hub. However, I am concerned about the appropriateness of the Rugby Clubs as the proposed site for the Sport Hub, and feel this requires further investigation.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

22 May 2020

Submission to South Wairarapa District Council.

Subject : Building consent requirements

Background : As a result of growth and high demand on housing, and the consequent higher house prices here in Martinborough, we have seen ,

1. An increase in single storey, maximum site coverage, housing “infill”, and
2. the demand to break up more productive rural land for housing and life style blocks.

Infill issues: These property's (small pockets of land covered to the maximum allow by a house) are suitable as short term rentals but no so attractive to long term family residential.

Demand to re-zone productive land.: In the case of Martinborough, this puts pressure on breaking up the close proximity rural land that makes this town so unique. The inevitable urban sprawl of the likes we have seen on the Kapiti coast, will eventually destroy the village feel of the South Wairarapa towns.

Proposal:
To develop a building consent policy that encourages the development of multi-storey housing (maximum of 2 , maybe 3 stories) to achieve higher density population, particularly close to village centres, to minimize the current impact of growth detailed above by:

1. Relaxing the “sun envelope” requirement without neighbours consent, (and the inevitable battles that ensues) that currently limits any multi-storey housing developments within existing residential zones.
2. Demanding a smaller percentage of a site allowed be covered by a building.

The impact of 2 above would also limit further claustrophobic single storey “in-fill”

Examples around the world.
There is many a village around world that have developed as proposed above (historically of security reasons) which now provide a fantastic “Village” atmosphere , but have preserved the productive land (in many cases grapes) around the village . Indeed it is the very combination of higher density residential housing , closely surrounded by productive land that creates the “atmosphere”

Thank you for your consideration

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Because sport and recreation is vital to our communities physical and mental wellbeing. Greytown currently has very little green space compared with other towns. Having a shared space also makes sense from a financial aspect where different sporting groups can share costs. Greytown is a growing town with a large number of young families who will make great use of such a facility.

Yes

Q6

Why is this?

More opportunity for those who work full time during the week to utilise the facility’s

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The money required would be far better spent elsewhere updating old, tired and run down waster water and sewerage systems that the other towns struggle with continually!! In particular... Featherston!!!

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes. Absolutely. In recent years, the centre of Featherston seems to have become one big massive car park. It’d be great to promote cycling and pedestrianism far more in the town - Starting with the town Centre.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Fees for using public amenities is starting to get prohibitive for smaller events and gigs. It’s a shame really to have a situation where smaller events will be unable to make much of a profit (if at all) for their performers and presenters. The whole town loses in ‘vibrancy and energy’ as a result - which is the opposite of what the SWDC says it’s strategic goals.

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It allows the facilities to be used by commuters and others who have other commitments during work hours.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I feel that the Greytown Trust Lands Trust has found a very clever way of increasing revenue for itself and, therefore, the Greytown community. In other words, they are double dipping. In my view, the land that the Rugby Club and Bowling Club sits on is, in effect, already the community's. As for the Kurinui Sports Hub, since when have school sports facilities been a council matter? If SWDC is taking this responsibility, can we see investment in all of our school's sports facilities? Finally, SWDC have committed very little the ongoing maintenance and promotion of its South Wairarapa Sports Stadium. Surely it would be more prudent to ensure that this sports facility is put to better use for the South Wairarapa region before building yet another facility?

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

The promotion of walking and cycling is a no brainer, in my view. Tourists and locals alike are looking for a mix of recreational experiences and this adds another string to the bow of what we have on offer.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

After reading the blurb on this topic, I don't feel I understand this enough to comment.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

It would be great if there was general maintenance of Council land and facilities. For example, the 'Squircle' (Featherston's big ticket Town Square) has lost some of the sones in its wall and they need to be replaced. Another area that needs attention is the Daniel St parcel of land (opposite the Police Station). It has a path that is so dangerous that is has caused one of my children to have two bicycle accidents. Either remove the pavers all together or replace the missing ones. Please.

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Keeping people active has ongoing benefits to the wider community such as improved health and wellbeing

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 — **Yes**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 — **Yes**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

A sports hub brings more people into the community which brings more $. The flow on effects are endless. Like the swimming pool hour extensions, the health and well-being for the community will have flow on effects as well. Such as improved mental health by being active and being part of a group who uses the hub for a sport e.g badminton, basketball, cricket etc

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10 — **Respondent skipped this question**

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Q11 — **Respondent skipped this question**

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes!!! The more activities people can do here the more people will visit and the more $ they spend at local businesses and overall improving the local economy

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Recycle recycle recycle

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

NA

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Get the sports hub up running ASAP you will not regret it!!! Do some research on other areas that have them (The hub in Hawera for example) and see how that brings people to the community due to the capability to hold events etc. Don’t scrimp on things and get the right people on th board with the right vision.

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Promote composting toilets. I e green loo, multi clivus, natural flow.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Lovely to be able to swim late as long as it is affordable. You would get much more uptake if the prices were cheap= increase use= increase revenue

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

It would be a nice to have, but rates are already too high!!! And water is more important although it is a great way to keep youth out of trouble.
Unless the sports hub is funded by reducing the over inflated salaries of government employees!

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Haven't read it yet. But yes. Kids should be allowed to cycle on footpaths until they get training by police at school. With simple road code lectures in class as well as practical training sessions with miniature roads on the playgrounds of the schools or in a carpark (I e netball commlumbi road)

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Recycle stations at beginning of Norfolk road /Normanave and other rural roads heading into towns to stop people burning plastic. (people in town and rural are seemingly using milk co trainers as firefighters so education desperately needed)
Push Supermarkets to use less packaging and more compostable packaging . Reduce consumerism and promote quality products that last. Less import of poor quality products =less packaging . Plastic drinking bottle and alu can refunds at supermarkets = less rubbish on roadsides.
Educate to wash recyclables at the end of washing the dishes, so no extra hot water is used or to loosely put into the dishwasher on top of normal load to get compliance with cleaner product at the recycling plant. Recycled products (fence posts of plastic or park benches should be cheaper than of virgin plastics. Takeaway foods in consumers own glass or porcelain bowls or even long lasting Tupperware . (Worked when I was a kid)

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Need to read more about it but sounds good

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Government wages are completely out of whak for the population that has got to pay for it. Our ratio of rich and poor is getting way to big and as history all over the world shows causes poverty , crime, environmental pollution, violence, and general discontent. We need to do everything we can to have a strong (80+%) middle class for a health economy ,healthy /caring/kind population and a health environment.

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

If council is offering a number of options or potential solutions (as above) could council please provide URL links or direct rate payers to relevant documentation, so that we (ratepayers) might make better informed decisions? I searched for information on 'Water by Meter write off Policy' on SWDC Website and various Search Engines and couldn't find anything with that particular wording. Also regarding Smart meters, there isn't enough information around costs or other social/economic repercussions to make an informed decision. I also think more public transparency of water use by agriculture sector in South Wairarapa would give clearer statistical context for rate payers. The consumption of water is a community wide issue; not just residential.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Community well-being, teaching our kids to swim is essential, builds confidence and is a great community service.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I do not support funding Greytown Sports Hub because Climate change and water security should be prioritised. While I acknowledge that sports is important for physical fitness and social interaction, there are less costly alternatives than traditional sports like Rugby and Bowls. We need to be innovative and smart. There are already lots of existing sports facilities that can be utilised around SWDC. This is also an opportune time to consider and encourage other types of team sports (triathlon, tramping, water rafting, Waka Ama on Wairarapa moana, walking, cycling, etc.) alongside traditional sports. I do however support extending the Kuranui College Gymnasium.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes. Promotion of Walking and cycling ties into the Greytown Sports hub spend as well.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Yes

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Q14

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Council could consider an Enviro-Recycling centre like the facility at the Owhiro Bay Refuse centre, Wellington. Raglan and Nelson also have established successful Zero-Waste focused community run facilities, encouraging Reuse, Recycle, Re-Purpose. A designated space could also encourage green waste and compost production. Earthcare have the contract, but council have also mentioned duplicity, so potentially, a localised Social Enterprise could be established to encourage innovative eco-conscious social practice.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I would hope that the current COVID lockdown has provided Council (and all of us) to think innovatively around use of resources (buildings) and to investigate all options available to us, including the possibility of working from home. I am a University lecturer and am able to deliver online lectures from home, cutting down travel time, road degradation and carbon emissions. Has Council considered alternative options?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Thank you for your leadership. I sincerely hope this council keeps an open-mind and be innovative towards ensuring well being and sustainability of our South Wairarapa Communities and future generations to come.

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Having facilities now and in the future for Greytown is important. The town is growing, as is a lot of the Wairarapa, so green space for sports of all types is important for the community. Space fir people to get outside and maintain health active lifestyle is an community priority the council needs to invest in.
Having read both sides of the argument with regards to the existing bowls and rugby club, having these spaces owned by the council/community seems the right option.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, more should be done to promote walking and cycling. We have seen in recent weeks a large increase in those activities and community has spent more time talking to each other because of it.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I don't see what every small town needs a big sports hub, there is already one in Featherston, if Greytown wants one, Greytown can pay for one, not rate payers who have already paid for one.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I would like to see rate payers money spent on upgrading, failing infrastructure and not on new ventures.
Water supply needs to be top of the list, simply telling people to stop using water, while center pivots run through the night and then putting rates up, with no intentions of providing a clean, constant water supply all year round, is theft.

Yes

Q6

Why is this?

Greater opportunity for locals to use the facilities

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Given the close proximity of sporting facilities to Greytown there has been very little evidence to suggest Greytown even requires the expansion, just a mere comparison to the other 2 towns without any real backup of necessity to Greytown. This coupled with the fact other issues facing Sth Wai residents are much more pressing and time critical (stormwater systems etc) which need replacing, not wasting further money on patch up jobs

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Encourage by way of discounted pricing, the ability to capture roof water in to tanks for use around the gardent etc.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It was not well publisised - so I think if it was, more would use the pools later in the day. Possibly have a dedicated swim lane for fitness swimmers?

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

Kuranui College has students from all over the South Wairarapa so this will benefit all. I have no objection to this.
I do object strongly to SWDC funds going to purchase the Greytown Rugby and Bowling land, however.
The Greytown community has benefited from the Trustlands Trust for over 100 years with its purchase of lands etc and then grants to the community. SWDC should not sort out what is an internal Greytown issue. Greytown needs to sort out what their priorities are and these should be reflected within the Trust according to the Act. The aim of the Trust has always been to "promote education and public utilities within Greytown". If this is the case then they need to continue and not sell off the Rugby and Bowls grounds if this is what Greytown think is a priority for them. If this means reduced grants - well that is a consequence of the decision made according to Greytown's priorities.
Martinborough and Featherston have never benefited from a "Trustlands Trust" with grants etc. All "public" grounds have always been in council lands (to my understanding). This is why there is a perceived "imbalance" of SWDC grounds in the towns.
Should Greytown decide that they do not want to have reduced grants from Trust Lands Trust and the Trust sells the land, then that is a decision for them to make.
Possibly they may need to drive 12 minutes to Featherston or 15 to Martinboruogh and use the facilities there.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

We agree wiht what is in the plan.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

One of the Mayors election platforms was this area. Proprosing looking at ways we can recycle better, and possibly creation of jobs. Would be good to see where these ideas are and if they may come to fruition.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Respondent skipped this question

Why is this?

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Yes

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8

Yes

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Greytown Trust Lands Trust have said they will sell the land currently used by the gym, and bowls clubs etc, so it's preferable that this land be bought by SWDC rather than a commercial developer so that the green space, and the interests of the organisations using the land, can be preserved. I think it's wrong that GTLT is selling the land off, but it seems its their right to do so, in which case it makes sense to sell it to SWDC, as they have the community's interests at heart.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

As someone who gets their water from their roof through water tanks, I think this is a great option for those on council water and who are not currently doing this. It is also more sustainable over time and ensures you only consume what you have.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Allows flexibility for families and means they are not so crowded during the early afternoon. Also, I have friends who have worked as lifeguards for CLM at SWDC's pools and this summer income has put them through university, so increased open hours will help students financially.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I think it is absolutely necessary to invest in the future of the town, we need to think about the long-term quality of life of Greytown residents. The proposed hub will support a range of sports, positively benefiting a large number of residents. As a child I played soccer, rugby, hockey and was a member of Greytown Swimming Club. I have made lifelong friends through playing sport at some of Greytown's sports clubs and believe sport is so important for both mental and physical well-being. I have also been fortunate enough to have received two education grants from Greytown Trust Lands Trust which assisted with purchasing university textbooks. It is vital we continue to invest in the people of Greytown, and the Trust is a brilliant way to do this, therefore it must be kept alive and continued to be supported.

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I believe that investing in cycle trails and walkways is important and support the Council teaming up to create a district-wide cycling and walking plan. The popularity of the Woodside Trail during the weekend and the evenings illustrates the significant positive impact this trail has had on our community.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Waste management and sustainability must be a priority to ensure the well-being of future generations.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I agree with the proposed ideas, council accommodation has neglected over the years.

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I fully support funding for the Greytown Sports and Recreation Hub as I believe this is absolutely essential for our children’s future and involvement in sport and exercise. We are lacking the necessary space needed in Greytown at the moment and especially with the way the town is growing. When you compare it with Featherston, Carterton and Masterton, we have very limited space.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

No. 1. The roading is in dire need of support. Simple maintenance is not enough. The Council should be looking at improving not just maintaining. There should be a schedule of roads to be improved. This will require some research, at which the Council has an exceeding poor record.
2. A classic need is to seal the Glenmorven Road. In our 20 years it has been very slightly improved only once. The Council promised to survey accidents, of which there are many; but failed insofar as not knowing of a fatality. Over recent years there have been several subdivisions resulting in greatly increased usage and more accidents, most but not all are on the hill section. The camping ground at the end of the road has experienced greater usage. This was formerly ute and trailer for tents etc. Now it is cars with caravans and motor homes, listed as a camping site. The state of the road is such that this summer some could not make it up the hill and had to be tractor-towed. Infrequent grading makes for very temporary removal of some but not all ruts and potholes. Usage by large trucks very quickly wrecks the road.
Council records will reveal the multiple subdivisions and added accesses to the road.

The Council provides us on Glenmorven Road with no services. We make do without.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

The Council has an appalling reputation as a place of petty bureaucracy, especially in the issue of consents and needs a radical rethink

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

A 3.531% increase in usage with extended hours over previous hours does not warrant a second year of "trial". I would like Council to consider other methods of administering the Greytown pool, e.g. opening an hour earlier in the summer holidays and charging for this first hour at the rate of $2-4 per person. This would allow for better usage of the pool by adults up to retirees who wish to actually swim, preferably in lanes. At times this last summer the pool was so heavily used that people were turned away at the gate and asked to wait for entry. Adults were not able to comfortably swim in the very limited lanes because of children crossing the 1-2 lanes. You say the increased hours included evenings- but I believe this was only for Club use, and not for the general public. A combined user pays and free entry programme would be fairer and better for all users. Improvements could also be made with the duties and training of pool staff-they have a difficult job at times with large user numbers but need more focus and authority.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

the Council should explore further with the GTLT what the actual status under law of the rugby club land is, and why GTLT should endeavour to extract a residential valuation sale price from the Council. It is excessive. Does or has the Council ever expended in the region of $750,000 for land and premises (Bowling club/ ? members) for one club ? What is the value of the Croquet club land for example, supporting how many members? The Bridge Club is one of your few regular tenants of Council premises at the Town Centre- would Council think of spending $750.000 on our 100 plus members surely?

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Bowling Club land

Q11

Why is this?

I think the costs involved in developing a multisport facility at the Rugby Club have not been fully assessed - $70,000 as quoted in the officers report seems very low. I think the sports clubs could be short changed and the community/Council would not be able to afford the development and maintenance of the facilities going forward.
I am a resident of East Street, and am concerned about parking facilities if this was to be developed.
I think Council's future focus should be on water infrastructure and Covid-19 management going forward, whilst also supporting community facilities.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It is really important that full time workers and commuters, who pay rates towards the cost of the swimming pools, have the opportunity to use these facilities after finishing work. For this same reason it is also really important that lanes for swimming laps are put into the pools so that people can exercise safely away from the risk of being jumped on by children playing.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

SW already has a number of sports facilities and I would much rather see investment made into these assets to maintain and uplift them than build a new facilities. I also consider that there are pressing issues this year and over coming years - such as the Three Waters, climate change, safe cycling and supporting our communities through COVID recovery that take much greater precedence for Council funding than a nic to have sports facility.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

The council should absolutely be doing more to promote safe walking and cycling in the district. For example by putting in the cycle way add on to the rail bridge to link up Uberhill Road so you can cycle safely from Featherston to Greytown. I would also like to see more cycleways and walkways provided

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I would like to see the council rubbish bags made from 100% recycled plastic that is quickly biodegradable in landfill facilities.

Council could also consider setting up a dump shop similar to Wellington's Sexond Treasures to reduce waste to landfill

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I support it provided that the money goes into lifting capability such as employing highly skilled policy staff, and lifting Council's cultural capability, and realising efficiencies. I do not support spending money on boosting the communications department as I think this is a waste of money.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I want to see more regular tree maintenance happening around the District, focusing on looking after their health rather than the tree feeling we have seen over the last few years. I would also like to see Council plant a lot more native trees.

I would also like to see the Featherston swimming pool more regularly cleaned and taken care of. I think it is great that the facility is free to use but I have noticed a drop in the cleanliness and maintenance level of the pool which is a real shame. I also would like to see the pool drained, cleaned and covered at the end of each season. I am every concerned that this still has not yet happened despite the 'dogs and togs' event being held there. I am concerned about the risk this poses to public health for next year

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

My children love their sports, as I did growing up. Sport, exercise and fitness play a huge role in a child's life, especially team sports. We need to invest in our facilities to ensure this continues in the future. Residential developments are increasing in Greytown and we need the recreational facilities to be able to accommodate this growth.

Q8 **Yes**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I fully support the proposal to fund the sports hub (purchase the land) , as well as the upgrade to Kuranui Gym. Greytown needs more green space and sports fields.

This is not the first time Greytown will have lost sports fields to housing development. Residents who are longer in the tooth may recall the 'Front field' of Kuranui College, where sports, namely football among others, were played. The field was situated along Hospital Road and was sold off to residential development - it is now the sight of the Oak Estate Motor Lodge and residential housing.

DON'T LET THIS HAPPEN AGAIN !! We have lost enough space as it is. Once it is gone, it is gone. Please do not let this golden opportunity pass!

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

1 - Water security needs to be focused on. I don't play sport, but I garden for my mental health and wellbeing. We should no bar in a situation of having water bans and things will only get worse in the future.
2 - I live in Featherston this sports facility is not for the people of Featherston. Clearly this is to benefit Greytown in reference to the comment in the consultation document. " "reduces reliance on motorised transport"
3 - this is going to be of huge benefit to Carterton residents given that a majority of their kids attend Kurtanui College. Why aren't they paying for some of this.
4 - I have lived in Featherston for nearly 20 years and I am sick to death of rates going to support Greytown and Martinborough whilst Featherston is neglected.
5 - Why can't the people of Greytown use the facilities already in the community ie come to the Featherston Sports Stadium.

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

The post-Covid economic climate demands serious reduction of public discretionary expenditure.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The post-Covid economic forecast demands that the District lives within its means without rates increases to finance activities that could be supported by commercial sponsorship. We have yet to understand the effects of the potential financiaal depression.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I propose that discretionary expenditure in this area be delayed until the next annual plan.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

No

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I cannot support a blanket increase in any budget line without a statement of deliverable target(s).

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Given the unusual circumstances for planning this year's annual plan, I suggest extreme caution on discretionary expenditure AND acquiring debt for the future. We have yet to understand how the District will survive financially.

Subject: Submission to Annual Plan Consultation 2020/2021
Date: Saturday, 23 May 2020 6:36:56 PM

To the South Wairarapa District Council:

Please accept this email submission in addition to my responses to your online survey regarding your Annual Plan Consultation 2020/2021.

My name is Tom Hartmann, and I have the privilege of being one of the founding members of the Spitfires Baseball Club based in Greytown. I am presently its head coach, focusing on the 16-and-under age bracket.

I would like to voice my support for the Greytown Sports and Recreation Hub proposal, in particular for Council to purchase the land currently leased by the Greytown Rugby Club and expand it to become a multi-sport facility that includes baseball.

The opportunity to add a baseball field there during summer would make a marked difference to the quality of baseball in the entire region, allowing us to offer all age groups a place to train and play what is a growing sport in New Zealand. Because of the country's previous and continued success with softball, we are confident of extending this into another related diamond sport. But we require a larger facility.

Our current home at Kuranui College has been an adequate location to start the club, and we continue to appreciate the college accommodating us on its grounds. Unfortunately, we have now outgrown the space and cannot offer any player above the age of 13 a space to train or play due to the size of the field required. Two of our club members were forced to play for a team in Levin this season, and we were not able to host any Sunday game or tournament play for this age group. The Greytown Rugby field would be a welcome solution.

As we have more and more players graduating into playing as teens and young adults in the future, we require a dedicated space to offer them as they improve their skills and chase the various opportunities available to them in the sport. Internationally there is significant funding to promote baseball, and players from our club have already been participating in tournament play in Australia and Japan. Players from the Wellington Baseball league, where the Spitfires compete, have ventured as far as Korea and the U.S. to compete.

Having a facility that accommodates baseball alongside rugby and other sports would open up opportunities for baseball players in the entire region to grow their skills, gain valuable life lessons, connect in a healthy environment, and reach the heights of their talent. It is my privilege to support them as they do.

Best regards,
Tom

No opinion

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I would like to address the issue of flooding between Fitzherbert Street, Boundary Road in Featherston which is always a threat and which is going to be even more likely now that storm water drains from the new subdivision are going to be feed into drains that already can't cope after periods of heavy rain.
Although there is an embankment to prevent flooding from Donald's Creek, the pasture north of the embankment is also prone to flooding.
After a period of heavy rain, usually a few weeks, the ground becomes water logged at which point water simply runs over the top of the pasture, past the embankment or around it, across Herbert Street East and into all the properties on the other side. Then it runs into the open drain that runs along Fitzherbert Street and south into Donald's Creek which runs under Fitzherbert Street.
In the past, every winter you would see water streaming across where the subdivision now is and into the drain in Fitzherbert Street. But then the previous owner of the land put small earth embankments along the Harrison Street East border and also northern border of the property, so all the water now flows across the properties north of the subdivision, and then heads back south into the Fitzherbert Street drain.
The drain overflows when the water in Donald's Creek gets so high that a trap door swings into place, stopping water from the drain evacuating into the creek. Making matters worse, the driveways over the drain have pipes that are too small for all the water to pass through them, forcing excess water to spill into the properties.
While flooding is more likely after a long period of heavy rain, it can also be caused by a sudden and large downfall, which is what happened in October 2018 when there was a huge thunderstorm.
In my presentation to South Wairarapa District Council and the Featherston Community Board in 2018 , I said the Donald's Creek embankment needs to be moved further north to catch the water flowing past it. But that isn't the ultimate solution because there is simply too much water for the Donald's Creek culvert that runs under Fitzherbert Street. The only solution is for a second channel.
The situation is going to be exacerbated now because the council has just installed pipes along Harrison Street East to cater for the new houses being built in the subdivision. This means even more storm water going into the existing pipes and drains.

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

The Kuranui gym will service all the SWDC teenagers.
I definitely don't support buying the Greytown bowls club as this is single use facility and is only supported by a few members.
The Greytown Rugby club have ignored the fact that their rebates are changing for years. It's a known fact they only upgraded their club rooms as leverage against the Greytown Trust. The club have taken no responsibility for this situation they're in and are blaming Greytown Trust for their own mistakes. Their members don't have to pay fees and they spend all monies on uniforms and haven't tried to help themselves out of this situation. I don't support the purchase of the facility and club rooms. The Greytown Rugby club are telling the public that the club will not exist if the SWDC don't buy the facility. I can't see why they can't share the Featherston Rugby club's facilities as the clubs play a home and away competition, until all other options are explored. I believe the SWDC should secure green space in Greytown but I believe there are other options that can be found over the next couple of years.
If the SWDC do purchase the Greytown Rugby facility I know that Greytown residents will won't to see it changed into a public facility. I believe it should be made available for all sporting codes in Greytown to call home. A place where meetings and awards nights can be held. It would be great to see memorabilia from all codes on display as Greytown have a great sporting history in a lot of sports. The club rooms should be overseen by a governing body to take bookings and handle the keys, possibly the Greytown Sport and Leisure Society.

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I am pleased that the Council has recognised the need to address the inadequacy of recreational reserve provision in Greytown. This proposal recognises that the Council has a need to acquire more land in Greytown and that the land currently held by the GDTLT is the most suitable available for this purpose. There are very few other opportunities for the Council to acquire contiguous parcels of this size and proximity to both Greytown School and Kuranui College. If Council does not act now the options available are only going to become more limited and expensive in future. I agree with the proposal to address intergenerational equity by funding this purchase through a 25 year loan. This is a sensible approach on behalf of the Council. The proposal also recognises the importance of Kuranui College as a facility for the entire South Wairarapa, particularly those of college age.

I am sure you will be aware of a suggestion that the Trust should gift the land to the Council. This is not possible. The Trust is governed by the Greytown District Trust Lands Act 1979. Section 20 (1) of that Act states that except as expressly authorised by the Act the Trust shall have no power to alienate the Trust lands. Section 23 authorises the Trust to sell the Trust lands. Gifting the land would not only be contrary to these specific provisions but also to well established principles of trust law including the duties of Trustees as set out in the Trustee Act 1956 which include the duty to act prudently and in the best interests of both present and future beneficiaries. It would not be prudent for the Trust to gift land for which the Council is a willing purchaser.

I also wish to address the comments that may have been made to you about the current amount of funds held by the trust. Pursuant to the Act the Trust is required to apply the proceeds of sale of Trust land to the purchase or development of trust lands.

Accordingly the proposal is of significant benefit to both the Council, current and future residents of the South Wairarapa ad particularly residents of Greytown as, through the sale of this land the Trust will be able to make further investments and apply the profits of those investments to community grants.

I strongly urge the Council to proceed with this proposal.

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Not much else for kids to do

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **Yes**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **Yes**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The whole community will use it so should pay for it

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10 **Respondent skipped this question**

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Q11 **Respondent skipped this question**

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

A recycling centre at the dump.

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

No

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Investigation, with a view to Improving waste water disposal. We need to go further afield, (worldwide) to look at current and innovative solutions.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

Because of the extra cost to ratepayers

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Purchase of the Rugby Club land,

Purchase of the Bowling Club land

Q11

Why is this?

The existing one million dollars in the Parks & Recreation Reserve account for Greytown, the ongoing development of sections in Greytown, together with the contribution from the new Orchards Retirement Development ($250,000) means that there is ample money to purchase the land from the GTLT. The Council has a moral obligation to spend this money on this land after selling the Old Stella Bull park for residential Development.

Page 7: Discussion Topic 3: Land Transport

Respondent skipped this question

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I have concerns about the growing popularity of the Greytown Rail Trail which I feel is being compromised. The vermin problem along with the smell from the Transfer Station needs to be addressed. It is common to see both rabbits and rats ran across the trail in front of you. The smell at times from the composting vegetation, and stagnant water is not pleasant as you make you way up the trail. The Transfer station has quite a long boundry so it is not just a fleeting whiff. In summer flys also become an issue. My understanding is this site was opened as a transfer station, but it is now being used as a large compost heap with vegetation left until it processed into compost on site (soil).

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I am against any more spending of Ratepayers money on increasing Council staff plus buildings to house these staff. Instead of Council being one of the largest local employers, we should look at becoming more efficient, and accountable with less staff. For example, the use of Xero Accounting Services for all financial matters. In my opinion, Council needs to continue discussion about sharing essential services with both Carterton and Masterton Councils.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

It is a disservice to all residents that the Consultation document 2020/21 that was meant to be in the Midweek was not delivered. A lot of people do not have the capability or confidence to do a submission online. For this reason alone the deadline should have been delayed. Then we learn that the survey site is not going to be active for the morning of the last day of submissions. For these reasons plus the Covid-19 factor I am disappointed that the deadline for submissions was not extended. Given the huge importance of this document and the discussion that could have taken place if Council had been able hold physical meetings (not on Zoom). I do not feel that the Public has had sufficient opportunity to give feedback given that the Midweek insert was not delivered and we were expected to know how to use Zoom. Difficult times call for difficult decisions - instead of sticking to your timetable extend the deadline and give all ratepayers a fair go. It is very frustrating that for a whole computer screen you can only see three lines deep of what you are typing for around 15cm across the screen.

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I support funding for the Greytown Sports and Recreation Hub.
I believe it is vital that all members of the community have access to sports and recreation facilities. Such facilities play a critical role in both preserving and enhancing the physical, social and emotional well-being of the community and as such need to be accorded a high priority. I have been actively involved in supporting and promoting sport for young people and have observed the benefits derived by them from participating - including increased skill and ability, increased confidence, and the formation of great and enduring friendships.

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

As the Greytown Early Years Board we have chosen to support funding the Greytown Sports and Recreation Hub for the following reasons:

It will continue to enable Greytown Trust Lands Trust to support Greytown Early Years, the only not-for-profit, community-focussed Early Childhood Centre in Greytown, to nurture and support our children to become life-long learners. Our vision is to empower children to be connected and contribute positively to our community. We are so grateful to receive these grants, and even though the amount has diminished in recent years, as the pool of recipients grows, without their support we would struggle to deliver such an enriched learning programme. Indeed, the community of Greytown, and all our available education pathways would be the poorer without the wide-reaching support of the Trust.

It will significantly increase the sporting opportunities and facilities for the Greytown community as we continue to grow. For example, as part of our curriculum, we hold an annual duathlon for our children and families. It would be great to have a purpose-built space, with appropriate facilities, that we could utilise, as we currently use the Greytown School playground during and after school hours.

Thank you for the opportunity to have our say.

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The trust should be supported to fulfill its fiduciary responsibilities and exist to give support to a wide range of community groups and education facilities, not giving all its funds to a few. Greytown has less recreational public space than other South Wairarapa towns, so i support the hub option. Its like to see a walking./running track added to hub. Circuit exercises/stations similar to that at Carrington Park in carterton, and a skate /wheels component.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes to the promotion of more walking and cycling

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Work with local retailers eg supermarkets, rural supply stores etc or identify the biggest generators of waste in our district and get them to start minimising. For example : the residents of Greytown have frequently asked the local supermarket to stop using plastic packaging in the produce department, to no avail. It's in your interests to empower citizens to refuse this packaging as you have to deal with the landfill wage in the end.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Good, communications and delivery of information requests and application of consents etc could do with modernising and improving

Page 10: Other Feedback

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

There is a need to enforce and fine those you do not follow guidance given when there are hose bans in summer time

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Many commuters don't have opportunity to swim until weekends. Late opening on Fridays is great to have a family swim in the evening.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The community,Kurunui College needs better facilities which are owned by council not by Trustlands. It would enable a greater variety of sports clubs to have access to good facilities. These facilities would be used by the school during the day and then at night by the wider community. It would also be great to finally see a skate park being developed for kids in Greytown.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

On going maintenance of roads is important. As is care of urban trees. With Covid-19 the increased amount of walking and cycling indicates these are pastimes that people enjoy and we should be encourage for the health and well-being of our community. Also cycle tracks encourage visitors to our towns.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Educating shoppers and what choices they make is essential. We also need to encourage supermarkets to lessen the waste they create.

Page 9: Discussion Topic 5: Building Capability

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

The cycle track to cross creek is a disgrace. Zero maintenance since it was introduced. It is unfit for use. Far more cyclists use the road due to this. Invest to maintain what is already in place.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Landfill transfer station in Featherston should be introduced

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Consider rate impacts. Agree if balanced with this.

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I do not support funding for the hub for the following reasons:

1. Due to the current financial environment around Covid-19 and strain on households, there should be limited spending on non-essential services.

2. Featherston already has underused sporting facilities that could be used for the whole South Wairarapa.

3. Carterton and Masterton students attend Kuranui, it is not fair that South Wairarapa rate payers foot the full bill for Kuranui upgrades. Kuranui should be fundraising this themselves to top up the government provided money.

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

water tanks is only part of the solution. we need all new builds to have waste water recycling as per AS/NZS1547:2012. the policy of sending grey water to soak pits is so very one dimensional when there have been options for years to recycle.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

why is it still a trial. the Q should be whether to adopt it or not!!

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

global pandemic, massive recession, job losses. Now... so is not the time unless land comes on at a crazy bargain price.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Now is so not the time. Rates money is not a lolly jar that just gets filled up annually for your benefit. but i would prefer this over the Greytown sports Hub.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

all the waste companies have the same main owner. it is ridiculous having all these different systems of waste collection. Best to negotiate with the contractor to have small wheelie bins and at the same time set some performance standards for the Martinborough Transfer station which still is underperforming to the benefit of the contractor!!

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

in general a really good idea, but now so is not the time. you are trying to do too much with too little money when peoples incomes are uncertain. i hope this is delayed until the next year when we see where the economy is placed.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Why is there no discussion topic on the rate rise!!! a prudent council would have shelved all unnecessary expenditure for the next 12 months. Any other year, this would be a well balanced and forward thinking plan. this year, not so.

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I do not support funding for the hub for the following reasons:

1. Due to the current financial environment around Covid-19 and strain on households, there should be limited spending on non-essential services.

2. Featherston already has underused sporting facilities that could be used for the whole South Wairarapa.

3. Carterton and Masterton students attend Kuranui, it is not fair that South Wairarapa rate payers foot the full bill for Kuranui upgrades. Kuranui should be fundraising this themselves to top up the government provided money.

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

I’ve seen this provision enjoyed by many young children -it’s about equity for all.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Such provision is lacking in Greytown and needs to be provided to future proof for the next generations. The links between exercise and mental well being are well researched. Incorporating park like beautification with walkways and cycle tracks should be part of the plan

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Having visited Greytown on a number of occasions I have some awareness of sports and recreation provision within your community. The South Wairarapa District Council is to be complimented in proposing that a Sports and Recreation Hub be developed. The development of such a hub is in line with best practice, nationally and internationally. The integration and consolidation of sport/recreation clubs and facilities into a single location has the potential to offer substantial efficiencies through the provision of shared resources. Including the proposed community recreation and events centre at Kuranui College in the Hub enhances these efficiencies and will increase its usage by residents. Importantly, the development of this hub so close to town ensures accessibility for residents. Investment by Council to support the Hub, generally, and the Kuranui College community recreation and event centre, specifically, is a wise decision as shared funding support for this facility at the school makes more sense than the Council "going it alone" and building a separate facility. The proposed Hub will have the benefit of, if well planned, to draw in a range of local sports and recreation organisations that have common goals into the facilities to be offered along with the well established rugby and bowls clubs resulting in shared outcomes (enhanced well-being for residents) and resources. I note that the Greytown Primary School is located near the proposed Hub which will also benefit from, and contribute to, this investment. Greytown is well known for its heritage of long established buildings and houses in the town and also has a good reputation for cultural provision (e.g., Greytown Little Theatre, excellent Library, Cobblestone Museum). The Greytown Sports and Recreation Hub will complement this heritage and cultural provision in enhancing the health and well-being of residents.

I note part of the proposed Hub is the purchase of greenspace by Council currently used by the rugby and bowls club. I understand that there is a proposal by the owners of this land to convert it into housing. Parks and greenspace will be an important ingredient of the Hub. The loss of this space to housing would reduce the Hub considerably in what it can offer the community. Outdoor recreation and sport (both active and passive) provide substantial health and well-being benefits to the community. Covid-19 has illustrated that such space is needed by residents for exercise and physical activity. That the Hub will provide for indoor sport and recreation, through the community recreation and events centre and associated facilities, and outdoor recreation, through the provision of sports fields, will ensure that a wide range of sporting and recreation aspirations (both elite and participation) and interests are catered for.

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Rugby Club land

Q11

Why is this?

I would support the proposal if it included a plan and costs to develop the hub at the Rugby Club. In reading the risks around the proposal it is clear that the proposal does not mean that a hub at the Rugby Club will be developed. I support the Council buying the land and committing to developing the hub with the proposed athletic track, baseball, and other facilities to make it a multi-use facility accessible to all.
The proposal for the Bowling Club provides no difference to the community to the current arrangement apart from perhaps that the Club can continue to operate - however this is still unclear as that Club relies on Lands Trust subsidy which looks like it won't continue. Whether the Council will provide grants / subsidy to allow the Club to continue to operate is uncertain, but if that is likely then I would not support because of the additional cost for no additional benefit. If there was a plan around how this land could be made useful for the community that doesn't bowl then I would support it.
I support the development of the new gymnasium at Kuranui provided a commitment is made to provide a full size gym with the facilities / equipment described. The risks around raising community/grant funding to meet MoE timelines appear significant and likely to mean a smaller facility. Given the current and projected demand for this facility it would be a missed opportunity and I'd support additional Council funding to meet the shortfall.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes I support these proposals. Promotion of walking and cycling is a good idea. However ability to walk and cycle is about whether there are safe provisions. Most trips would need to cross SH2 and this road is not appropriate for people wanting to get into cycling. Need to provide safe provisions for walking and cycling.
I support the development of a local mountain bike park. It's one of the fastest growing sports in NZ and has participation rates higher than most sports (refer Greytown Sports Hub background report) yet there are no facilities in the district. I propose leveraging off the existing park in Carterton or off the Remutaka Incline and track to Tauheranikau River.
Support the development of off road cycle paths to connect towns.

Reducing the water allowance per property,

Removing the Water by Meter Write-off Policy,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

It is especially important to include water resilience measures in the District Plan /rules relating to new builds.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

It would enable a larger section of the community to enjoy the facility.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I have prepared a document which I will either upload or send in a separate email. Basically, the council had no plans or policies in place to improve or change Greytown's sports and leisure facilities as proposed at this time and is being railroaded by the Greytown Lands Trust which needs to be challenged over their uncharitable decisions. Kuranui College needs to get its act together to obtain money from the Lotteries and other funding bodies. Council priority this year is the 3 waters.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, within existing budgets, though Council priority for the coming year needs to be the 3 waters.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

In a period of about 5 years, council has doubled from 25 employees to over 50 employees. Despite the still very low numbers of people needing to be managed, a very top heavy structure has been developed, with grand titles and $100k plus salaries to go with them. If you want to develop capability, then merge with Masterton Council. I have every sympathy with small councils trying to cope with the regulations heaped on them by central government but OUR POPULATION IS TOO SMALL to generate sufficient income.
Rates are already $70 per week on average and many people are on superannuation or benefits. That is about 20per cent of weekly income. Please stop our rates escalating.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Yes I would like to upload a document or two to support my comments above but I cant see an opportunity to do this?

Submission of Sue Fox dated 24 May 2020. To accompany electronic submission.

The Council should decline the Greytown Sports Hub proposal (Proposal) for the following reasons:-

1. A decision to include the Proposal in this year's annual plan **is premature**. The Council report (Report) only became available on 22 April 2020 and there has been insufficient time to consider other possible alternatives for dealing with the situation:

- Gymnasium: The Greytown Sports & Leisure Society (Society) should be asked to prepare a full analysis of charitable funding available to match the MoE input dollar for dollar. The most obvious candidate is the Lotteries Fund. A further alternative might be to explore a joint venture with a national gymnasium provider such as Les Mills. **It should be noted that once Council agrees to fund the work, this precludes subsequent grant applications.**
- GTLT should be challenged, legally if necessary, to present a range of options which could include finding other land available for sports fields and a tranche of money to help develop those facilities.
- The sports clubs should take professional advice on their position as tenants.

2. The Report does not include **other matters material to** the Council making a **sound decision**:
    - Has GTLT obtained the appropriate consent to alienate (sell or part with) the rugby field and bowls pitch (not allowed under their Act)? Has legal advice been taken as to whether permission is likely to be granted and how much the process is likely to cost and how long it is likely to take?? Is there a risk that Ministerial approval will not be forthcoming if effective lobbying takes place?
    - How will the Proposal impact on SWDC's obligations under the current central government directive that councils should seek to make as much residential land as possible available to deal with the national need for more housing stock? In the leaflet "*Greytown we need your help*", one aim of the Society is '*to save land from being sold for housing'*. This is in direct conflict with a key central government priority and its arguable SWDC shouldn't collude in this.
    - The report could be enhanced if it was split into two reports. One to deal with the possibility of acquiring land from GTLT, and one to deal with providing funding to enhance Kuranui College's gymnasium. Different council policies and considerations apply to each.
3. **The Report at 7.4 lists Disadvantages and Risks** of adopting the proposal which should be heeded.
4. The presence of the Mayor and 3 Greytown councilors on an advisory committee (along with the sports clubs and GTLT), being 'led' and chaired by the Society (see GTLT website), would appear to make it impossible for the council to reach a realistic independent arm's length decision on adopting the proposal . **That leaves a decision to adopt at the present time open to the threat of judicial review.**

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Wairarapa's rural sector is recovering from the effects of a serious drought, and on the back of this and COVID 19 we are in all likelihood entering the deepest recession in living memory with the rapid increase of redundancies and job losses just beginning to take their toll on the local economy. Now is not the time to increase the tax burden on ratepayers for a non-critical project.

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

South Wairarapa District Council Annual Plan Consultation

Greytown Junior Football Club Submission
May 2020

The Greytown NZ Football Skills Club is writing in support of the proposal to create a Greytown Sports and Recreation Hub at the rugby club grounds, a mini hub on the current bowls club land, and contributing to a full size gymnasium and events centre at Kuranui College.

The Greytown NZ Football Skills Club – has grown rapidly since its inception two years ago. We now have 110 local player registrations per annum – demonstrating the strong support our community has for the code and opportunities it presents for our kids. There is also a strong demand for children to attend the Skills Centre from other towns. However the Centre is not able to meet this demand due lack of access to a suitable sports field and lighting during winter for training.

The Skills Centre sessions are currently run on Greytown School property. With no access to toilets, changing facilities or storage facilities. The later means the Skills Centre has problems setting up and accessing the correct equipment for training.

A dedicated Greytown sports hub and mini hub will enable the junior football club to:
- A permanent home for our Football Skills Centre.
- The ability to open the Skills Centre to children from Martinborough and Featherston.
- Have clubrooms with changing areas and storage adequate for the number of children using the facilities and gear the club uses.
- Flood lighting for when the Skills Centre training sessions run later during winter months.
- Have central locations that makes it easy for everyone to bike/walk to training and games.

A full sized Kuranui Community Gymnasium will enable:
- If the Council contributes funding to a full sized gymnasium at Kuranui College, the facility automatically becomes much more usable and cost effective as competitive sport will be able to be played at the facility.
- Other codes such as futsal, basketball, and netball can play on competition sized courts.
- Greytown can host a wider range of fixtures from the region and nationally and has the potential to become a central hub for the region. As an example, the CEO of Capital Football has written a supporting letter for this proposal and indicated they would be interested in making Greytown the home of futsal in the Wairarapa.
- If the council do not contribute, the court will be 1/3 smaller and competitive sport will not be possible. Relegating it to a training facility only.

Greytown NZ Football Skills Centre would like to also make a verbal submission to Council in support of this written submission.

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Monitor leaks street by street. Devise a way for new houses with small sections to store water - tall flat tanks or underground. Encourage older houses to retrofit tanks and possibly hire a dedicated contractor for this work.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Every child should learn to swim, and be aware of water safety.
A good occupation during summer holidays

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

A lower priority at the current time

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

A big yes for walking, but cycling in towns should not be permitted on busy/through streets. E G Princess st in MBA with new riders looks dangerous

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Composting is useful, but needs balancing with vermin increase. Rats are common in urban areas

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

One day refresher courses for staff a plus.Accommodation is important, but is this OK in competition with other organisations/businesses. A common problem

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Revised rates seem sensible,

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

With economic hardships forecast for the near future, water access should not be an additional worry for people. Keep the Water by Meter Write-Off Policy but ensure people have other means of conserving/gathering water like water tanks and smart meters.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q8

No

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I don't support the funding for the Greytown Sports and Recreation Hub proposal because the cost is too high both financially and ethically due to the timing.

Greytown has sports facilities and the government, according to the consultation document, the MoE will finance the replace of existing court so Greytown will not be without facilities if this proposal is rejected.

Issues like Martinborough's water and Featherston's drainage are more likely to impact communities harder and should be a higher priority for Council.

The Sports and Rec hub is a nice idea but we're entering a recession. Now is the time for Council to ensure that all three communities have what they need to get through that. An expensive investment into a sports hub at this time with current community issues that need addressing more urgently is irresponsible.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

Respondent skipped this question

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Very exciting! Love all aspects of this. The Spatial Plan sounds like a great initiative. Having better footpaths and trails will help promote walking and cycling, show off the beauty of the Wairarapa, and make more areas accessible to people with mobility issues.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I like both the wheelie bin and bag price increase ideas.

Could there be an option to 'rent' the bins from council - with different sizes available? I've seen this done abroad so elderly people living on their own or couples pay less per year and get a smaller wheelie bin than a large household who pay for a larger bin. I've also seen families use getting a smaller bin as a way of managing their waste - if they only have a small bin but have lots of people in the house, they have to be more astute with their recycling/composting etc.

If it's a 'one size fits all' wheelie bin paid through rates, my preference is bag price increase.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I agree.

Yes

Q6

Why is this?

Supports community, and child health and water resilience for all tamariki and whanau.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **Yes**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **Yes**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Greytown’c community continues to grow rapidly, and has the highest sports participation in the district. The town has developed its sports facilities largely using its own resources for all of its history. Consequently the town has received proportionately less facility support from council. The town needs help for the next stage of its sports facility development. Sports facilities in the town need revitalisation. Council support will generate benefits for the town and the whole district (especially through Kuranui College). The town sports community through Greytown Sport is a leading network in New Zealand and is
an able partner. Whilst still town proud and competitive on court/field, the Greytown Clubs and Sports Society are very collaborative across the district off fields do will share their facilities for the benefit of our whole district.

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Positive

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Council needs to continue to develop its Iwi and Marae relationships. In addition to Treaty obligations, Iwi and Marae are not far away from being critical local economic and social development partners. The council needs a proper plan for bilingualism (Māori and English).

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Respondent skipped this question

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

It seems there's money for the Greytown sports hub but not for the completion of the Town Square (squircle) in Featherston. Doesn't make sense.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I support the council in their proposals. I am particularly keen to see a cycle link between the 3 towns (and eventually extending throughout the Wairarapa). But it must be an off road experience so as not to compete with 100km traffic and sheep/logging trucks. I look forward to cycling to other towns to do my shopping and exercise all in one.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Please, not another wheelie bin. This does not encourage people to reduce waste. More space=more rubbish. We are trying to be a zero waste household and don't need this capacity, nor should others. Also ugly and no space to put it. User pays and increase bag cost all the way.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Appreciate the necessity and support improvements especially for processes and IT

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I support a Martinborough with a real community - maintaining a rural aspect and avoiding overdevelopment leading to housing issues (we need rentals for low income earners not empty BnBs/party town)

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I am most concerned that there is no allowance for roading improvements. I live on Glenmorven Rd and over 22 years have see no improvement made to an unsealed road that has had an exponential growth in residential subdivision and and increasing demand for access to the river for recreational and commercial purposes. This unsealed road is in a constant state of disrepair. I would expect to see more consideration being given to fundamental roading infrastructure and not just urban water supply systems.

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

I cannot use the pool due to my working hours finishing 5pm, however I can use it if opening hours extended past 5.30pm and I did over the last summer for ecxercising.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I do not believe the council should borrow the amount of money it proposes to cover the new sportshub and Land purchase cost. The necessary increase in rates to increase council income to cover the debt will significantly affect many Featherston ratepayers already on economic tightrope . Retirees on Govt pension have little flexibility in income especially to cover rate increase.
The flow on to the ratepayer will not assist economic spending within our region as ratepayers will have less to spend.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

I think the Trust is holding the SWDC and ratepayers to ransom and that SWDC should call their bluff.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Absolutely yes, particularly in riverside cycle paths or, at the least, cycle paths between towns that achieve some separation between bicycles and vehicular traffic.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Increasing the cost of rubbish disposal just leads to more fly-tipping which the council doesn't have the resources to enforce. Why do rural properties pay more overall for rubbish disposal?

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Long overdue. If you pay peanuts (or are only allowed to pay peanuts), you get monkeys.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Excellent Annual Plan document.

Because I managed to use it more last season

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

I absolutely agree with this land continuing to be available for development of community sports and recreation facilities as proposed by the Council but fail to see why the Council (ie.the ratepayers of Greytown & South Wairarapa) should have to purchase it at this cost from the Trust, in order, so the Trust says, for it to contribute to the community. This is robbing Peter to pay Paul and is ridiculous - the community being asked to pay through one body something they already own but is controlled by another. The tactic of saying if the Council do not purchase this land the Trust will sell it for housing is deplorable and any payment should be peppercorn.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, and not just through footpaths, cycle and walking lanes should be mandatory in all new residential development, and providing more pathways away from roads would enhance opportunities for walking.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Kerbside rubbish bags should return to paper and do we really need those giant wheelie bins, surely the size just encourages more waste? They are visual pollution, make many footpaths unnavigable,and I do not believe the huge amounts of plastic they are made of are recyclable. We minimise packaging, compost and shred. We hardly use that behemoth of a bin, have never used the waste transfer station but get no reward apart from the satisfaction of living by sustainable principles.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I think more detail would be helpful. I agree the website needs upgrading, but I would also like to know how much this capability is related to efficiency in meeting the needs of developers and how much on serving the needs of existing ratepayers, many who have contributed to this community for decades.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

The Greytown community needs the Sports Hub via the retention of the rugby and bowling club land. I hope the community response can give all power to the Council to represent to the Trust the strong feelings about their actions.

Adults like to swim after work . The pools hours do not reflect this.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **Yes**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **Yes**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Critical that long term we have sport facilities for the next generation(as well as all the positive health benefits that are associated with sport in all age groups) The old adage that it will never be cheaper than now.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10 **Respondent skipped this question**

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Q11 **Respondent skipped this question**

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

promotion can be achieved without financial input.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

No

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Overseas waste is being incinerated and turned into electricity - we need to think along these lines instead of landfills

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

400,000 is excessive to improve customer service and communications. Needs more thought.

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Purchase of the Rugby Club land,

Purchase of the Bowling Club land

Q11

Why is this?

We support the purchase of the Rugby Club grounds and the Bowling Club grounds. The Rugby Club grounds can be reconfigured to provide needed space for junior football which is a growth sport. There is farmland beyond the grounds for future expansion should the opportunity arise. The draft Spatial Plan has identified that Greytown needs more green space. Purchase of these properties doesn't provide more space, it only ensures that Greytown retains what it has had for the past 100 years. We support the future development of a wheels park and walking track within the rugby grounds. The Bowling Club provides a place for older people to socialise and enjoy light exercise. The Clubs that use the clubrooms should be responsible for the internal upkeep of them similar to the Memorial Park Pavilion arrangement.
We don't support the Kuranui Gym proposal, particularly in the post COVID-19 environment. We feel the initial capital outlay, but more so the ongoing operating costs will be higher than the benefit the community will receive. The gym will only be available to the community after schools hours and sometimes not until the evening. Operating costs are ongoing, and will continue to rise. Whatever size gym the College ends up with, it could continue to hire it to community groups like it currently does. Junior basketball is likely to continue at Kuranui College regardless of whether it is a ¾ size court or a full sized court.
The provision of a new gym is likely to take business away from the Featherston Sports Centre and the Clareville Complex rather than introduce new competition. Badminton and futsal are still low participant sports, does the Wairarapa need another facility for these sports, currently played in Masterton and Clareville. Featherston Sports Centre has a full sized basketball court and could be developed and better used. We believe that high value capital sporting projects in the Wairarapa should be coordinated between all councils with needs analysis undertaken across the wider Wairarapa not one town. The Clareville Hockey Turf is a good example of a facility that has been sized and developed appropriately for Wairarapa as a whole. Not every town in the Wairarapa needs to provide facilities or have a club for every sport.
The gym is a MoE project which is underspecified and we are disappointed for the students. Can SWDC check the building file for the Kuranui Gym, we have heard that it is a leaky building not an earthquake prone building. The H&S risk for a leaky building would not be as high as for an earthquake prone building. Perhaps the gym doesn't have to be replaced straight away.
We would prefer that the Featherston Sports Complex and Carterton's Clareville Complex were renovated and that Kuranui College apply for a grant to assist with funding.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

The trails need to be built before they are promoted.

Page 8: Discussion Topic 4: Waste Minimisation

Q13 **Yes**

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Reducing the water allowance per property: the consultation document states the current maximum allowance (350m3) and compares it with Carterton (250m3) but doesn't indicate what current usage norms are which makes it impossible to guage the potential financial impact on residents or the potential for encouraging water conservation.

Removing the Water by Meter Write-Off Policy: There are very few details in the consultation document as to what the current write-off policy entails. It seems to be a provision for clemency for excessive water usage charges in cases of undetected water leaks and other hardship? If that assumption is correct and receiving unexpected water rates bill is a residents first possible indication that there is a problem then it seems only right that there is a provision for writing that cost off. The smart monitor may help mitigate this by alerting to possible water leaks sooner? However, there is insufficient information provided in the consultation document to recommend removing the current policy.

Requiring new builds to have their own water storage solution: Yes to the general idea but the execution needs to be flexible / adaptable to circumstances.

Installing Smart Meters: Smart Meters are very helpful for monitoring usage. What will the cost be to ratepayers be? What will the expected savings be from early detection of water leaks?

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Because it makes the facility more accessible to more people.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Respondent skipped this question

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

There are so many problems with this proposal!

It seems that the main problem / reason behind the proposal is that the GTLT chooses to charge market rents to the sports clubs using the land. That doesn't seem to be in Greytown's best interests. Is there not a different solution?

It doesn't seem right that the GTLT proposes to sell the land to SWDC at market rates. Especially as this means that all of the SW ratepayers will end up paying top dollar for the purchase but the profits from the sale of the land will only go to Greytown as per the trusts rules.

The ongoing costs to all ratepayers to repay the loan as well as to maintain the properties is a major concern as well as the plan to invest tens of thousands in building upgrades.

The projected growth rates used are questionable. Especially when Featherston has been one of the fastest growing towns in NZ in 2019.

There is a lot of focus in the proposal documents on comparing Council owned sports land and facilities in the three towns but this isn't mitigated by any details of how the differences came about or current costs per town.

What is included in the $228K per year maintenance for the Greytown Sportshub proposal? Where is the information regarding the comparative maintenance costs spent in the other two towns?

Why does the proposal include $70K to upgrade the buildings when, for example, the Council hasn't provided funding to repair the leaks in the roof or replace the floor in the SW Stadium?

Where is the equity in funding a "world class facility" in Greytown for the benefit of the wider district when there is no similar funding for facilities that already exist to make them more fit for purpose now and into the future?

The accompanying documents to support this proposal mention Greytown's lack of female changing rooms and lack of lighting for junior football training in the evenings when these same deficiencies exist in the other towns.

The only reason that Featherston, for example, has Rugby Club rooms with changing rooms, toilets and showers is because of local fundraising and initiatives. The upgrades to the building come about by the same means.

There is no objection Greytown having better sports facilities and for there to be a solution for the Rugby and Bowling clubs but it needs to be realised in a more equitable way.

The contribution to the Kuranui Gym has some merit but there are more important things for SWDC to borrow money for than this.

All of the above doesn't take historical discrepancies between SWDC investments in the three towns and stuff-ups made by SWDC that have left a legacy of nagative impact on Featherston.

E.g. the stuff-ups around the land swap with Trust House and the eventual creation of an open space (that the majority of the residents made clear that they didn't want) on the more usable part of the land which only added to the disjointedness of Featherston's main street which will continue to have a negative impact on main street bsuinesses in perpetuity while in the mean time SWDC puts a lot of money into the Waihinga Centre in Martinborough.

There is a LOT more to say about that as previously submitted to the FCB and SWDC on multiple occasions. Yes, it is done and can't be undone but the impact of those decisions live on!

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, in collaboration with existing projects and making use of funding opportunities outside of rates as much as possible.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Educating people and giving them suitable and affordable options are far better solutions than just making things more expensive.

There need to be more recycling solutions available in NZ! I don't know if that is anything that can be done at SWDC level but if it is possible to give incentives for waste processing initiatives in our District then that could also be of benefit in terms of employment.

Producers / manufacturers/ retailers need to be encouraged to minimise packaging and use recyclable or reuasable materials as much as possible.

A big problem with charging more for waste disposal is that it increases the likelihood of waste being dumped where it shouldn't be.

Wheelie bins for general rubbish have the advantage of not being so easily ripped open by dogs/cats/rats but are probably less "user pays" than the bags.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Communications have improved since funding was allocated to it. If further increase in funding has equally tangible outcomes then I support it.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Thank you for the good work that is being done.

Please continue to make improvements in becoming more user friendly.

Please focus on the essentials. If mow is a good time to borrow money then let it be for essential infrastructure so that we have reliable clean water, flood risk mitigation, environmentally friendly waste water disposal and safe roads and footpaths!

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

1. In preference to writing off excess water use charges, read water meters more frequently and provide water usage information to property owners/occupiers to help detect leaks early and encourage water lower use.
2. Require new builds to have separate plumbing for potable water from SWDC and non-potable water from rainwater collection, supplemented if necessary from SWDC, eg for laundry, wc flushing, bathing, gardening, vehicle washing, etc.
3. Place a moratorium on any structural and management changes to the Moroa and Longwood Water Races, pending completion of the proposed investigation and review of the future of these water races.

Respondent skipped this question

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

1. The Annual Plan Consultation document says that "the Council has been working with representatives from the Greytown community to develop (this) proposal". I object to this characterisation when the Greytown community has not been given any opportunity to choose its "representatives" on this issue.
2. I would prefer a fuller consultation involving the GTLT, SWDC, and the community, with a complete disclosure of information explaining the reasons behind the rise of this issue. None of the published information has adequately explained why the SWDC must buy the rugby and bowling club properties from the GTLT to maintain sports facilities in Greytown.

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

1. I hope the Wairarapa Trails Action Group, co-ordinator, feasibility study and The Spatial Plan will result in improvements to the tracks and trails in the South Wairarapa District. For example, Greytown would benefit from cycle trails that radiate out from the town and loop back to town along another route, rather than the current routes (road and trail) that mostly extend out and return along the same route. The Greytown situtation is in contrast to that in Carterton where existing country roads provide looping cycle trails away from SH2.
2. The Council's proposals for Land Transport include Money for Forestry and Trees. This item refers to an allocation of $50k for urban trees, and unspecified "additional costs this year to maintain our rural forestry blocks". How can I offer useful comment on such wooly detail.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Delivery of service on this Annual Plan Consultation seemed to have broken down when the Consultation Document was not included in or with the Mid Week newspaper as promised. I and others did not receive the Document with our MidWeek papers. Is SWDC paying for an undelivered service?
And the Survey Monkey that SWDC is using for the on-line submission process was shut down on the morning of the closing day for submissions.
And if questions must be submitted BEFORE the day of each Q&A event, that fact should be well-signalled. The closing date for questions was more important than the date of the Q&A events themselves.
The points raised above, particularly when taken togther, did not encourage involvement in the submission process.

Q1

Do you agree that the water supply should be Council's main focus next year?

No

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Removing the Water by Meter Write-off Policy,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Water is most important but not the "main focus" surely.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Better useage, more consumer friendly.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Purchase of the Rugby Club land

Q11

Why is this?

Cheapest and most central option. If Trustlands must sell, SWDC should acquire on behalf of community. Create multifunctional development and utilise land effectively!

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

SWDC has least amount of trails and some of worst cycling , walking options in the Wairarapa. WTAG support much appreciated and will result in rapid improvement.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Sounds impressive but how cost effective to achieve??

Reducing the water allowance per property

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Very concerning that little progress has been made in regards to the Featherston Wastewater Treatment Plant with the Council yet to determine even the cost of the resource consent process.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Seemed evident that it was well patronised in Featherston at least, with the facility better utillised by the community with more user friendly hours available over the last Summer period

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Opposed in full to this proposal. Will place too much of a financial burden on ratepayers including exorbitant ongoing costs, Suggest the school actively raise the funds through other avenues. Apparent that the community would have very limited access to the facility if it did go ahead. There is a facility in Featherston surrounded by acres of beautifully maintained sports grounds which throughout the year are largely vacant and unused. Suggest if the bowls and rugby clubs aren't sustainable that they consider shared use of grounds in other towns.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Support the proposals although costs to maintain forestry blocks is not specified. Funding of this should not be at additional cost to the ratepayer i.e. do not support a rate increase to enable this

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Increasing the cost of bags has shown to result in an increase in illegal waste dumping which the Council will likely bear the cost of remedying. More detail on the cost to ratepayers of wheelie bins would have been helpful in this Consultation. Suggest making the current recycling/transfer stations more attractive i.e. complete renewal which would likely result in more people utilizing the facilities. The current rundown state of these is appalling.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Work smarter. No support for this level of increase.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

It is not overly apparent in the Consultation document that there is a proposed rate increase of 2.54% followed by 1.5% increase every year for the next four years and this lack of clarity is concerning. There will be many in our communities including businesses and individuals who may be struggling financially as a result of COVID-19, but who do not meet the hardship rate payment deferral. The impacts of COVID will be far reaching and a rate increase will be yet another blow to those who at this time need support, rather than more financial demands.

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

South Wairarapa District Council Annual Plan Consultation

Greytown Swimming Club Submission May 2020

The Greytown Swimming Club is writing in support of the proposal to create a Greytown Sports and Recreation Hub at the rugby club grounds, a mini hub on the current bowls club land, and contributing to a full size gymnasium and events centre at Kuranui College.

We support:

- Having more recreation and greenspace to meet the demand from children through to seniors.
- Helping to balance the inequity in greenspace between Greytown and the other towns in South Wairarapa.
- Saving two of our heritage sports clubs. After all we are known as a heritage town.
- The goal to protect central greenspace for the whole community
- The plan a represents good value for money compared with building new facilities elsewhere in Greytown.

A dedicated Greytown sports hub and mini hub will enable sports club to:
- Have a permanent home supplied by the council
- Have clubrooms with changing areas and storage adequate for many different clubs.
- Flood lighting for when sport training sessions run later during winter months.
- Have central locations that makes it easy for everyone to bike/walk to training and games.

A full sized Kuranui Community Gymnasium will enable:
- If the Council contributes funding to a full sized gymnasium at Kuranui College, the facility automatically becomes much more usable and cost effective as competitive sport will be able to be played at the facility.
- Other codes such as futsal, basketball, and netball can play on competition sized courts.
- Greytown can host a wider range of sporting fixtures from the region and nationally.
- Greytown host large community events.
- If the council do not contribute, the court will be 1/3 smaller and competitive sport will not be possible. Relegating it to a training facility only.

Greytown Swimming Club would like to also make a verbal submission to Council in support of this written submission.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Rugby Club land

Q11

Why is this?

The gymnasium and rugby club land have the potential to provide multi-use benefits to the community. We support the council buying the rugby club land if it is developed to include an athletic track, baseball area and areas for other sports.
If the bowling club land was purchased with the plan to be used for more than just bowling then this would be of more use to the wider community.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, we should be doing more to promote South Wairarapa and the greater Wairarapa as a walking and cycling destination.
In addition to the 5 towns trail trust, mountain biking options for the area should be explored. Mountain biking is one of the fastest growing sports in NZ. Providing quality trails would encourage more visitors to the South Wairarapa. This would have a positive impact on the local economy.
We would also like to see a shared use trail along Woodside Road, like the one on Upper Plain Road in Masterton that allows walkers, cyclists and horses.
- This would provide a safe loop with the Greytown to Woodside Rail Trail (and allow big prams and bike trailers to use that can't easily use the Rail Trail)
- It would provide another alternative to driving for train commuters.
- As the community grows up Woodside Road it would also provide a safe cycle and walkway for students.

Q1

Do you agree that the water supply should be Council's main focus next year?

No

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

No

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

train commuters can't swim and we pay rates and get hot too. Weekend opens too late. Kids going nuts by then but it closes too early in summer at wknd when it is really hot. Closes just when we are all boiling.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Because it is unfair! South Wairarapa one is totally neglected. Give that a mil and south feath w need a mil too.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

no

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Get a packaging accord going. Support production if recycled products.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Not Much. council is an elephant with too much admin

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

Because this is of benefit to the school and hence the wider SW region as pupils come from all over SW.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, but only if the council can afford it without taking money from other required services - this is a nice to have, not a need.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

undecided

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

In the current climate after Covid-19 we must focus on continuing current services. People are struggling, jobs have been lost, businesses closed for long periods, and wages cut. We should not be looking at the "nice to have" in this round - these should be deferred until next year. This avoids unnecessary pressure on the cost of rates, maybe allowing a little more disposal income to be available to spend on the local economy.

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

Necessary to keep the gym up and running and would be excellent to widen use of this facility.

There are a lot of questions on the purchase of the land none of which are answered in the document. What is the business impact assessment of the purchases?
Why does the land need to be purchased from the Lands Trust - could it be donated?
How would purchasing the land benefit other ratepayers in the SWDC area?
How would motorised transport use be reduced for anyone other than Greytown residents?
What plans are there to reduce motorised transport use for Greytown residents?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, absolutely. Would like to see the Spatial Plan which is noted to be under development.
Promotion of walking and cycling would benefit the region immensely - health & wellbeing, economic oportunities, environmental benefits for example.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

A move towards user pays might have unintended consequences eg encouraging tipping which is costly to remove and to prosecute offenders.

A free wheelie bin would require may harm competition for waste collection services.

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

It would be good to see worm farms introduced as part of the food compositing initiative.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

The lack of detail in the Annual Plan makes it difficult to support this proposal. I am supportive of the council building it's capabiliy and improving its service where they are able to justify the costs. Unfortunately the justification provided is vague and full of weasel words. Council could not be held to account if they delivered nothing for the extra $800,000. No small sum given the economic outlook. Without clear detail, I do not support this spending.

Respondent skipped this question

24/05/2020

South Wairarapa District Council
19 Kitchener Street
Martinborough, 5711

Dear South Wairarapa District Council:

I am writing to express my opposition to the Greytown Sport and Recreation Hub outlined in the Annual Plan.

There are many reasons that I, alongside many other residents, am opposed to the proposal. In brief:

1) **Questionable Need.** The need is not well established. It is not that the Greytown Trust Lands Trust cannot continue to subsidise the rents for the two clubs, or that there is no greenspace available for sport within the district. It is that the Trust would prefer not to skew the ratios of their investments, and that the Council would like to secure green space before prices increase. These are not sufficient reasons for the council to take on 25 years' worth of debt on behalf ratepayers. This lack of clear need is made worse when considered alongside the risks of the project outlined in the council's own supporting document. As the council document states:

    a. without further investigation it is not clear if all the district and region's existing facilities are fully utilised. These may provide a more cost-effective option to meet demand;
    b. there is a risk that the facilities are not sufficiently available to the community and that sharing of the facilities across sporting codes is not workable; and,
    c. there is a risk that the facilities will continue to be associated only with the existing users and the benefits of the proposal will not be realised.

    The information provided by council to date suggests that the need is not well established and that the practical benefits are minimal.

2) **Short-sighted.** The councils own supporting documents state that: "The proposal may not meet the community's long-term needs" and that "the Feasibility Study indicated that an additional 4-6 hectares of land was necessary to meet current and future demand." While the council justifies the purchase of the existing land and facilities by comparing it to the

cost of building all-new facilities, they fail to mention that buying the existing land does not meet the forecasted future demand. This is compounded by the risk that "there may be additional maintenance costs for the older existing facilities that would not accrue for new purpose-built facilities." Purchasing the existing land and buildings will not meet future demand and will likely incur additional maintenance costs.

3) **Dubious Ethics.** The council proposes to take on a loan that will be repaid by all South Wairarapa ratepayers. This loan will be paid to the Greytown Trust Lands Trust. The Trust intends to "use income generated from the sale proceeds to further support sports and other community activities in Greytown". This is problematic in that all not only will Greytown residents benefit disproportionately from the overall project, they will continue to benefit as the profits from the sale are reinvested in Greytown by the Trust. In contrast, the ratepayers from Martinborough and Featherston will pick up the bill for 25 years for no meaningful change to infrastructure.

4) **Confused Priorities.** This proposal focuses on the 'nice-to-haves' while underinvesting in the 'need-to-haves'. The district is facing significant water management issues such as frequent flooding and emergency repairs in Featherston and poor water quality in Martinborough. Some areas also lack basic amenities (e.g. a lack of footpaths in Featherston). The money and time required to deliver the Greytown Recreation Hub project should be reinvested in delivering and maintaining basic infrastructure.

These are just some of the reasons that I do not support the Greytown Sports and Recreation Hub proposal.

I hope that the council will give the concerns of ratepayer's due consideration. Especially given the tangible impact this decision will have on annual rates in an economically uncertain time.

Yours Sincerely,

Joel Majer

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Trial for another year to see if the increase in visitor numbers is similar. I am new to the area so I do not know what the previous hours were.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I believe there are more essential things that need addressing before such a large amount of money is spent on a Sports and Recreation Hub in Greytown. I believe the plan only really benefits residents who live in Greytown, especially as the Greytown Lands Trust will continue to invest the profits from the sale only into Greytown. I also feel that residents from other towns will be disadvantaged when things such as improvements to footpaths and flooding are overlooked in favour of the Sports Hub.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I agree with all of the Council's proposals for land transport, especially the updating of footpaths as I find it difficult to walk around Featherston with a toddler when the footpaths are so sporadic.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I worry that if the cost of council rubbish bags increases, we will see more dumped rubbish. If households had a wheelie bin hopefully it would dissuade people from dumping rubbish.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I think the Council needs to outline what this extra money is going towards as the proposal in the plan is rather vague.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Yes - My partner Joel Majer has provided feedback on the proposed Sports Hub via email and I agree strongly with everything he outlines.

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

i dont think there is any great need for this to happen. i dont think it will be utilised enough to invest such a large amount of money on it in place of other urgent matter such as our water problem.

i wouldnt be opposed to the coucil buying the rugby fields at a resonable price,

i also think its a great idea to go into a partnership with kuranui school and invest in a joint venture for a community sports facility on school grounds which will be used heavily during the day and open to the public out of school hours just like Tawa college.

I agree with all proposals set out in the Land Transport topic.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Reducing the Council agendas is a no brainer and easy win (I would hope that this is implemented regardless).
Really love the idea of recycling stations & educating about food composting.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I understand the proposal but am somewhat disappointed with the results from last years increase.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

- That there should be no rates increases in 2020/21, except where increases are necessary to protect the health and safety of South Wairarapa residents. An example of an initiative that would be an acceptable reason for a rate increase is investing in infrastructure to ensure that the risk of storm water flooding is minimized or eliminated in Featherston (and any other areas with similar issues), because whenever it floods there is a significant risk to human health and safety posed by flood water entering homes.
- That any debt should only be taken on where absolutely necessary, because ultimately debt (and interest) will need to be repaid.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

the free water from to the vinyards in Martinborough should be charged at commercial usage rates rather than as I understand it free at present. At an absolute minimum it should be metered at each site so the council knows how much water they are providing subsidised by the ratepayers.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

The incremental number of users roughly cost $30+ dollars each to use the pool per time they visited. If i went to the pool and someone handed me $30 to swim I would go all the time! Expensive and not delivering sound return on investment

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

There appears some confusion about what is being proposed. Most of what is in the councils information is significantly at odds with the original feasibility study undertaken by the college / rugby club etc and in particular the assumptions underlining it. These original assumptions appear to have been applied to the newer proposal without revision or further thought.

As I understand it the actual active players of rugby number less than 100 and come from all over the wairarapa (not all are from SWDC catchment nor necessarily from Greytown either). The usage of the grounds it every fortnight for 8 months of the year. As I understand it there is little use outside of these times. That does not equate to a lot of usage for such a significant investment.

The membership of the club I understand is approx 500 ish. If the basis of this investment is to meet the councils objectives and requirements for health / sport / exercise, then the expenditure of over 2 million dollars to buy the grounds plus the significant annual running costs (likely heavily under estimated by the proposal) for 100 people seems a poor return on investment. If the investment is to then include the 400 other members to provide a social club / bar it seems again not a good investment and actually in direct conflict (alcohol consumption / driving etc) to the objectives of the council in the first place.

Rubgy is a declining sport activity as younger players move towards soccer, touch and other non contact sports. This has been a steady declining trend nationwide for many years and is likely to continue possibly at an increasing rate. Expending money on facility that has no other significant users with declining actual players nationwide seems a poor investment choice.

SWDC needs to decide how many times over it replicates the same facilities in every population center and what the right sizing of facilities should look like based on our overall population. As we have a very small rate paying base which increasingly live on fixed incomes and are widely dispersed, there needs to be an overview of where, how and what is provided and more significantly an explicit decision as to what will not be provided.

In this time of unprecedented financial stress and ongoing economic uncertainty to be expending money on a scale such as this is almost unbelievable irrespective of the timeline its spread over. The ever expanding expenditure of council on an ever expanding scope of activities both chosen and inflicted needs to be brought back to a reality that reflects the capacity to pay and provides a wide utility to the rate paying base. If the council could tell me that there are no more unexpected costs in the future to be met , that rates can confidently be contained within the CPI, that the Government will never require anything more of them, that they have in hadn all the money required to maintain the existing infrastructure then fine maybe we can afford it. The reality is that we are so far from every one of those items above its not funny. Is the SWDC going to offer Rates holidays like other councils in NZ ?

Greytown in particular and the SWDC generally, has a significantly aging population - the highest activity participation in the studies in the proposal was Walking and Cycling - a very high percentage of the activities undertaken regularly by residents requires no significant expenditure.

The Council via GWRC pays for the seriously underutilised bus service throughout the SWDC catchment. There are significant council rugby grounds at both Featherston and Martinborough - why dont the council offer free public transport to go to those fields instead for those that cant drive. The incremental cost wold be insignificant - a full bus and an empty bus cost the same to run the same route. People in the wairarapa are used to driving to particular activities and regard it as normal - I dont see how this is any different.

I have personally been directly involved in the consultation and construction of 3 gymnasia and associated with the construction of a further 4 for colleges of a similar role size to Kuranui College. This 3/4 size gym is usually always made larger to a full basketball court with help from the following
School fund raising
Local charities, trusts and businesses
Applications to lotteries grants
Application to specialised trusts supporting sport / health activity etc
I have never seen any council involvement in any gym.

The size of the gym finally built is usually just the basketball court size plus changing rooms, foyer (small), storage and a weights room or similar. Constraint in building gyms is normal given limited Ministry of Education funding - the wish list is usually huge but the cost is even bigger and with finite resources priorities must be made and then the sacrifices. The other point that often is a cause of budget blow outs is the difference between quantity surveyor estimates and final tenders submitted. The community couldnt commit to a scope and then end up paying for a high tender and then possible cost overruns. We have already had this problem with recent SWDC building projects!

The College is only funded for a 3/4 gymnasium in their operations grant therefore everything beyond that comes at a compromise to some other area of College funding. This may not be too bad for a modest increase in size but if outside users turn this into a 7 day / 10 hours a day operation how will the college fund / recoup this? As demonstrated by the huge subsidies that Rugby and Bowls currently receive (rugby appears to pay only $2000 a year for their lease) who and how will the substantial operating costs of such a facility be funded when current payments are at best minimal? Projections in the proposal of some $30k per annum fees being paid seems at best fanciful. Who will be left carrying the cost if projections for usage and income dont eventuate? Many of the interested users are not even operational. The council and rate payers cannot be left with an open ended liability for operating costs, administration, bookings, maintenance due to non college operations etc.

Who is going to run this college facility? Who is going to pay to use it and how will this not end up being a further cost burden on the rate payers of SWDC if it becomes partially or fully responsible for this operation?
As I understand it 1/3 of the pupils come from Carterton. Why is Carterton District Coucil not being asked for a contribution in the same breath that SWDC is? I am sure a significant number of the pupils come from Martinborough - Why is the farm trust set up for sport and recreation not being asked to part fund this? It appears that SWDC has the easiest and largest bullseye target attached to it.

The population growth in Greytown specifically is significant but from a very low population base and only forecast to just get over 2000 for the foreseeable future. The people moving to Greytown on the whole are generally significantly older than say the existing populations of Featherston and Martinborough. Generally house prices are higher and less likely to be bought by first home buyers or younger families as they are simply too expensive. There is also a low rate of rental properties which again tends to bias the age of the population higher. To provide rugby grounds for specifically for Greytown residents seems a little out of step then with the existing and arriving populations needs.

The existing sporting codes have as I understand it all they require to function. There is talk of "new codes" that might fill spaces , start up etc etc. This is an significant investment and as such must be based on hard facts and actual requirements - projections are just that - what someone thought wished or hoped for on a good (or bad) day are subjective at best. To be honest existing council investments in hopeful projections such as the Greytown town hall, the Martinborough equivalent, and the disposal of stella bull park land for a pittance (and without due process) does not inspire me to believe the proposal put forward by the vested interests has had adequate rigour and scrutiny applied to it. For example - if activity and membership of sport in Greytown is counted by the number of participants in each sport then you will likely have the same individual playing in cricket in summer, rugby in winter and some other sport in between - so one individual is counted three times or more - this might overstate the requirements for facilities in Greytown specifically. Add to that that many dont actually live in Greytown and the water gets muddier still in making a right size decision for the actual residents of Greytown - which I presume is what this proposal is all about.

Can the council use capex on land not owned by it?

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

Respondent skipped this question

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

---

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I dont think promotion its needed. Maybe rate payers should be encouraged to let the council know of poor condition surfaces, unsafe crossings, etc so that the council can keep on top of things

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

investing in people that stay is an investment, spending money on people who leave is an expense. Significant training costs should be attached to x years additional service or require some reimbursement if thats not the case.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

With predictions of an economic shock yet to come not seen for 100 years the saying "keep your powder dry" has never been more applicable. The council in the past has missed the opportunity to maximise its return on assets and minimise its exposure to costs which has led to not the best balance sheet one could have reasonably expected. We cannot continue to under perform with capex. More thought , more rigour and more pragmatism needs to be applied to significant undertakings.

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Respondent skipped this question

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I think the acceptable noise level for Greytown needs to be considered, My understanding is that more than two people having a normal conversation outdoors will be over the acceptable level at 10 pm. This severely restricts any social activity after 10 pm.

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

To encourage more use of the pool, enabling commuters to swim after work, and families to enjoy quality time there together during weekends. It's a good investment in the health and well being of the community.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

We need to focus on the necessities - infrastructure and water security. Prudent spending is crucial as we enter a recession.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, a district wide walking and cycling plan would reap huge benefits in terms of community health and well being, connecting our towns and the lake, and encouraging people to ditch their cars.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Recycling workshops, acknowledging the efforts of businesses who minimise waste with an annual award, leading by example, implementing strategies adopted by other councils, here and abroad.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Spending should be constrained in these difficult times. The proposed budget seems excessive.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Please adopt a prudent spending approach during this time of economic uncertainty, with the focus on water security, infrastructure, waste reduction, climate change mitigation, housing for seniors, and better walking and cycling opportunities.

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

Funding for the purchase of the rugby and bowling club land should be provided via private donations and fund raising. Shouldn't the rugby and bowling clubs contribute to the capital costs? Why doesn't the Greytown Trust Lands Trust donate some money or reduce the purchase costs for the land, this will meet their purpose to support sport and other community activities in Greytown. Will the rugby and bowling clubs be paying rent & what other revenue sources will there be ? How much of the estimated costs of $228k will be covered by revenue?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Do we combine and submit maintenance and renewal programmes along with Carterton & Masterton District Councils to roading contractors ? This would hopefully ensure more competitive tenders from contractors. Why has funding not kept up with increasing costs ?

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Ok if the additional $400k is a one off but should reduce back next year. Budget is done of what systems & processes need to be updated and prioritised and work carried out in highest priority items.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Is it possible to see a full detailed budget of all works including additional items not budgeted for that will most likely be required in the next 5-10 years. It appears that every couple of years there is another major project e.g. Martinborough Town Hall, Greytown Sports & Recreation Hub, Water Supply Networks infrastructure etc. Ratepayers need some certainty that there are not additional costs that will be raised in the future.

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I don't know - where is the information to back-up the need for extra space. Far too vague - the rugby club land is owned by a trust, why do we buy it?

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

In Martinborough, walking and cycling are already very popular and don't need promotion.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Respondent skipped this question

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Most of the documents provided should be addenda - not required for the immediate meeting. Reduce papers provided.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Far too vague - we need specific projects and robust cost/benefit analysis. Where have the extra budget figures come from?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

The whole thing is too vague - no figures given for last year. Why do we need so much more operational expenditure? The only capital expenditure needed in Martinborough is to fix our water supply issue. Other local authorities are not increasing rates post-Covid- very irresponsible of SWDC to want to do this without proper justification.

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

We are definitely against this going ahead, we live in Featherston and object strongly to our rates being used like this when there are pavements needing looked at. Also the gravel roads at the Wairarapa Moana are a disgrace and people are now driving on the grass to avoid them. Please see to these issues first.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I agree it should be computerised.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I do not support funding for the Sports Hub at this time because of the economic downturn. I feel strongly that Featherston Sports Stadium and other nearby sports facilities are a bit underused and could be upgraded instead of burdening the ratepayers with such a huge rates increase.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Fully treated wastewater disposal to land is the only option for Featherston. Save our lake! Onsite greywater disposal on all new builds.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Consideration could be given to developing one of our pools into a covered pool complex similar to Masterton/Upper Hutt for year round use. C lose other two pools.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Purchase of the Rugby Club land,

Purchase of the Bowling Club land

Q11

Why is this?

Reasonable to help out the Greytown Clubs from their financial predicament. However, further development and upgrading of these facilities is a step too far. The funding envisaged for the expansion of the education department property at Kuranui would be better used expanding the usage and upgrading the tin shed that presently houses a full sized basketball court at the Featherston Recreation ground. (Card Reserve)

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Level 4 lockdown demonstrated that more people cycle or walk if it is safe. More action needed to develop cycleways through and around urban areas.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Updating systems and processes goes without saying. In times when many ratepayers are undergoing financial hardship, frivolous spending on "improving accommodation" to the tune of half a million dollars is over the top.

Respondent skipped this question

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Water supply and safety
• That the work outlined regarding water supply and safety should go ahead. Ensuring our water is safe to drink is very important.
Water resilience
• That the current household water allowance should not be reduced. It should remain 350 cubic meters. Water is a very important resource and we have an abundance of it – it just needs to be stored and treated correctly so that it is safe. If anything, there should be no restrictions on water consumed for household use.
• That the current Water by Meter Write-off Policy (which gives provision for meter usage charges to be written-off when leaks are detected and fixed, or when there is real genuine hardship) should not be revised or removed. The current policy incentivizes people to fix water leaks, and provides help to people who are in genuine hardship.
• That subsidized water tanks should not be offered, as these should not be necessary if sufficient measures are taken to ensure water supply, safety, and resilience.
• That new residential buildings should not have to include their own water storage solutions. This would increase the cost of building at a time when many people are struggling to make ends meet because of COVID-19.
• That smart meters not be installed to enable closer monitoring of water consumption. Given purchasing and installing smart meters will cost Council money, this should not be a priority given other issues that are more pressing and need addressing.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

That the extended swimming pool hours should continue. These extended hours ensure that more residents have the opportunity to use the pool. The provision of pools with extended hours ensures that residents are more likely to be able to access the pool (when they are not at school or at work), and can use the pool to learn important water safety skills.

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

That the Council not proceed with its $1m contribution to the gymnasium replacement, the $1.91m to buy the Rugby Club land, $760k to buy the Bowling Club land, $70k to upgrade the buildings at these locations, or invest $228k per year in financing and running these new facilities. I do not agree with the Council's proposed investment.
• The Ministry of Education intends to invest in the school gymnasium so that it is safe and adequate for the size of Kuranui College. This is sufficient. I do not agree with the Council investing in the gymnasium.
• That the council repair and maintain the existing sports facilities and grounds located in Featherston. Repairing and maintaining existing facilities would cost less than investing in brand new facilities. In addition, Featherston has the largest population of any town in the South Wairarapa, and has a younger population than Greytown.1 Any investment in sports and recreation areas should be in Featherston, given the larger population and more youthful population.

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Increased funding for road network maintenance and renewal
• That additional funding be allocated for road network maintenance and renewal, as proposed in the plan.
Money for forestry and trees
• That no funding be allocated to forestry and trees, except where work is necessary to ensure no harm comes to humans, animals or structures. Urban landscaping is not a priority. Instead, priority needs to be given to other measures such as fixing storm water issues in Featherston.
Continue to renew and extend footpaths
• That work to renew footpaths to make these safe continues, but that no further work above and beyond this is undertaken until a future year.
Walking and cycling plan
• That no funding be allocated to promote additional cycling or walking in the district, beyond what is already allocated to ensuring existing footpaths are safe. Additional cycling or walking is a “nice to have”, so should not be a priority given many residents’ financial situations (because of COVID-19) and other more pressing issues that need to be addressed by Council.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

No

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

• That it is not important that the Council develops a Waste Minimisation Action Plan.
• That the price of kerbside rubbish bags not be increased. Disposing of rubbish is something that all households need to do, and increasing the price of bags will impact more on poor households than well off households. There are already incentives to recycle, because recycling is free whereas rubbish bags cost money. Increasing the price of rubbish bags makes it more likely people will put non-recyclable waste in their recycle bins because they cannot afford to – or do not want to – pay for more expensive rubbish bags.
• That wheely bins not be provided for rubbish and paid for by rates. The current system and pricing model is adequate.
• That food composting be encouraged, provided doing so does not cost much (if anything).
• That council printing be reduced, as proposed.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

• That an additional $400,000 not be allocated to investing in Council people and building on the Council’s capability to deliver. This investment can take place in a future year when residents are not going through the worst recession since the Great Depression, and people can better afford the increased rates needed to pay for investments such as this.
• Following the lead of Central Government,2 that all salaries of council members/employees, whether elected or not, should be frozen for at least one year. Similarly, all highly paid Council staff should receive a pay cut of 20% for at least one year.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

• That there should be no rates increases in 2020/21, except where increases are necessary to protect the health and safety of South Wairarapa residents. An example of an initiative that would be an acceptable reason for a rate increase is investing in infrastructure to ensure that the risk of storm water flooding is minimized or eliminated in Featherston (and any other areas with similar issues), because whenever it floods there is a significant risk to human health and safety posed by flood water entering homes.
• That any debt should only be taken on where absolutely necessary, because ultimately debt (and interest) will need to be repaid.
Extra maintenance for council-owned amenity buildings
• That work be undertaken to ensure council owned amenity buildings are safe and in a reasonable state of repair, but that no further money be invested in these buildings over and above this.
1 Stats NZ (2018) Featherston Census Data, Stats NZ (2018) Greytown Census Data, Stats NZ (2018) Martinborough Census Data.
3
Upgrades to housing for seniors
• That work on seniors' housing proceed to ensure these units are up to the Government's Healthy Home Standards.
Improving wastewater disposal
• That further investment not be made to automate the equipment and operations of the wastewater treatment plants. This is not a priority given other pressing issues that need addressing, and would mean that more jobs are lost as things are automated.
Reviewing storm water hotspots
• That the proposed review should happen immediately, with action taken urgently to address storm water hotspots in Featherston as soon as possible. Heavy rain in Featherston regularly causes flooding, which poses health and safety risks. Featherston residents have made many submissions over the last few years, many of which would identify storm water hotspots in Featherston. These submissions should be used to expedite the review and remediation process. This is a very pressing issue that should be given priority over many of the initiatives suggested in the plan.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

WellingtonNZ leads the facilitation of the Wellington Regional Trails Framework along with other trails partners and together we endeavour to make Wellington Region a world-class destination for tracks and trails and to encourage both visitors and residents to get out there and explore the outdoors.
The proposal to “making it easier and safer for people to get around and enjoy the outdoors by walking and cycling” is supported by WellingtonNZ. The eight counters along the Remutaka Cycle Trail which monitors the traffic of people walking, running and cycling counted over 466K in total (YE May 2020). Highlighting the volume of traffic that the trail currently receives and the importance to making the trails safer and easier for current and future users.
Improvement to the trails would be an investment, it would not only provide excellent recreational facilities for the locals but would also offer opportunities from a tourism perspective as more visitors seek for outdoor activities within our region.
WellingtonNZ also supports the council’s proposal to be promoting walking and cycling more in the district using the trails. In December 2019, WellingtonNZ along with other local authorities, Doc and other trails partners launched the FindYourWild Website and social media. These platforms continue to receive strong engagement – The Facebook group currently has 9.3K members and the trails website has had over 82.6K sessions from site visitors, highlighting the interest on trails. With stronger promotion of walking and cycling there is a lot of opportunity for the increased exposure and usage of the trails in the district.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

WellingtonNZ, the Regional Economic Development Agency for the Wellington Region (WREDA), supports economic performance throughout the region to enhance prosperity and liveability. We market Wellington region as a destination for visitors, migrants and investors; help businesses grow and innovate; advocate for Wellington's economy; attract and promote major events and run Wellington city's major civic venues.
As the agency responsible for promoting and developing Wellington region as a visitor destination, WellingtonNZ believes it is important to make its views known in relation to proposed Council activity that could influence its operations, as well as Wellington's destination development and marketing in the future.
WellingtonNZ supports the initiative to adjust the lighting in the district to enhance the experience of the Dark Sky Reserve. Enabling a greater experience would be an investment into the district and the Greater Wellington Region. Great stargazing experience has been proven to attract visitors from all around. Visitors spent over $72million in South Wairarapa district in the YE March 2020. Having a great star gazing attraction will compliment Wellington's existing product offering and will be yet another reason to visit Wellington.
We support all councils proposed initiatives to enhancing the Dark Sky Reserve experience.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Reduce speeds in the Greytown Area

A/ Kuratawhiti, Wood and Humphries Streets
The speed for these streets should be 50km/h for their entire length ie from the Main Street to their end points.

B/ Hawke and Wilke Streets
Reduce the speed on these roads to 50km/h in keeping with the above. Hawke is a gravel road between Kuratahwhiti and Wood Streets. Wilkie is half sealed, half gravel between Wood and Humphries Streets.

C/ Woodside Road
Following on from A above – 50km/h from the intersection with Humphries Street to a point midway between the start of the pine trees and No 72 Woodside Road. Then from this point 70km/k to the railway line.

D/ Woodside Road(remainder), Underhill Road, Waiohine Valley Road
The remainder of Woodside Road (from the railway line) should be reduced to 50km/h and also Underhill and Waiohine Valley Roads. These are all gravel roads.

Reasons for the above speed reductions
1/ There has been an increase in subdivisions in Wood Street, Kuratawhiti and North Streets as well as on Woodside, Underhill and Waiohine Valley Roads. Vehicles have increased, as have the number of walkers and cyclists. The popularity of the Greytown Cycle Trail has also increased the number of cyclists in the area.
2/ As the number of subdivisions have increased so has the number of cars travelling to and from Woodside Station. Wood Street, Wilkie Street and the gravel section of Humphries Street have increased traffic during the peak commuter train times. These commuters have their timing down to a fine art and unfortunately speed plays a large part in getting to the train on time (and home).
3/ On Woodside Road/Humphries Street it is not uncommon to see a convoy of some 50 cars travelling at speeds of 100km/h in close proximity to each other. The correct following distances are being ignored. This is an accident waiting to happen.
4/ At the joining of the gravel sections of Wilkie and Humphries Street there is a 90 degree blind corner. Dust from the gravel road combined with late evening sun also reduces visibility and walkers/cyclists run the risk of being run over.
5/ Coming from Greytown, Humphries Street naturally curves to the left and becomes Woodside Road which has created a blind spot for vehicles continuing down Humphries Street. It is a dangerous exercise trying to cross the road safely, not only do you have to inch over the white line to see if vehicles are coming down Woodside Road but also keeping an eye on the rear vision mirror for vehicles approaching from Humphries Street at speed. This is particularly bad when the sun is low.
6/ Vehicles exiting Woodside Road into the gravel section of Humphries Street. As mentioned above, with high speed commuter train traffic (travelling too close) coming down Woodside Road it is often difficult for vehicles to make a left turn into Humphries Street

Safety concerns
We believe there is an accident waiting to happen on these roads and besides the speed reductions would like to see the following upgrades:
- Give Way/Right Turning Bay at the intersection of Humphries Street and Woodside Road
- If this is not possible then turn Wilkie Street and the gravel section of Humphries Street into “One Way” with direction only from Wood to Humphries.

Reduce speeds cont'd

E/Main Street,Greytown
Reduce the speed on the Main Street from 50km/h to 40km/h between Wood/Church and Kuratawhiti/Jellicoe Streets. This area includes the main shopping area and the three pedistrian crossings. There has been an increase in volume of cars and trucks on the

Main Street (in fact on all of SH 2). It is dangerous trying to cross the road on the pedestrian crossings. It is also difficult exiting the side streets onto the Main Street in this area.

F/ SH2 South Greytown
At present the speed limit changes from 100km/h to 50km/h in this area. We would like a 70km/h introduced slighty south of the cemetery entrance up to the present 50km/h near Bidwills Cutting Road. This would be in keeping with the current speed limits to the north of Greytown and also on Bidwills Cutting Road.

Other Traffic concerns

A/ Engine Braking
As noted above there as been an increase in cars and trucks on SH2. Numerous trucks are approaching and leaving Greytown at speed. We have noticed an increase in noise and the use of engine braking. We live some distance away and can hear the noise from early in the morning to late at night. People living closer say they are at their “wits end” over the noise. Logging and metal trucks appear to be the worst. We suggest the current “No Engine Braking – At all Times” signs be moved to the 70km/h signs on SH2 to the north and the new 70km/h sign near the cemetery and also on Bidwills Cutting Road.

B/ Roundabout Humphries/Main Streets and Papawai Road
This area is becoming a bottle neck with the increased traffic flow and with the only petrol station in Greytown being on the corner. A roundabout would help alleviate congestion and also help to slow the speed down on Main Street.

C/ Sealing of the gravel sections of Wilkie/Humphries Streets
Some 20 years ago the council indicated it would seal the remainder of Wilkie and Humphries Streets when the Tosswill subdivison on Wilkie/Wood Street occured. Tosswill contributed half of the cost of sealing part of Wilkie Street and council indicated it would seal the remainder of the road in the future.....we are still waiting for this promise to be fulfilled. As already mentioned above these roads are increasingly being used by the train commuter traffic. The use of the road will only increase with more subdivisions being planned in the north/western areas of Greytown.

D/ New Road connecting Wood and Humphries Street
It appears that Greytown is expanding west and we believe that a new road should be considered when/if the land between Wood and Humphries Streets is developed. We suggest a road be formed from the existing Mole Street to connect to Humphries Street. This would alleviate future traffic and congestions problems in the future.

E/ Walkers
Sadly far too many walkers – both young and old continue to walk with their backs to the traffic, often wearing headphones. The Road Code has following guidelines for pedistrians..”walk on the side of the road facing oncoming traffic (except on curves, where it is best to walk on the outside edge of the curve)”. We would like more publicity given to these guidelines when walking trails are being published.

Final Comment
The above comments and suggestions for speed reviews have been discussed with the council before. Each time it has been turned down as either it was not the responsibilty of the council or that a review would be done in the future with other councils in the region. We now see other councils going ahead with their reviews so it is timely that SWDC commences theirs. We are also often told that drivers “should drive to the conditions”. Unfortunately this is not happening.

Greytown Trust Lands Proposal to sell land to SWDC for Recreation for a few?
No!!!!!!
The residents of Greytown should not pay more Rates as a result of purchase of land that “they already own!”
Cap rates at 2%, not 18% going forward!
Rates are unaffordable to most people now, anyway!
Zero increase would’ve better?
How long will it take for Council to realise that they do not have a god given right to spend other people’s money!

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Respondent skipped this question

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Respondent skipped this question

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Respondent skipped this question

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Water supply and safety
• That the work outlined regarding water supply and safety should go ahead. Ensuring our water is safe to drink is very important.
Water resilience
• That the current household water allowance should not be reduced. It should remain 350 cubic meters. Water is a very important resource and we have an abundance of it – it just needs to be stored and treated correctly so that it is safe. If anything, there should be no restrictions on water consumed for household use.
• That the current Water by Meter Write-off Policy (which gives provision for meter usage charges to be written-off when leaks are detected and fixed, or when there is real genuine hardship) should not be revised or removed. The current policy incentivizes people to fix water leaks, and provides help to people who are in genuine hardship.
• That subsidized water tanks should not be offered, as these should not be necessary if sufficient measures are taken to ensure water supply, safety, and resilience.
• That new residential buildings should not have to include their own water storage solutions. This would increase the cost of building at a time when many people are struggling to make ends meet because of COVID-19.
• That smart meters not be installed to enable closer monitoring of water consumption. Given purchasing and installing smart meters will cost Council money, this should not be a priority given other issues that are more pressing and need addressing.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Yes

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Q6

Why is this?

That the extended swimming pool hours should continue. These extended hours ensure that more residents have the opportunity to use the pool. The provision of pools with extended hours ensures that residents are more likely to be able to access the pool (when they are not at school or at work), and can use the pool to learn important water safety skills.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Respondent skipped this question

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Greytown sports and recreation hub
• That the Council not proceed with its $1m contribution to the gymnasium replacement, the $1.91m to buy the Rugby Club land, $760k to buy the Bowling Club land, $70k to upgrade the buildings at these locations, or invest $228k per year in financing and running these new facilities. I do not agree with the Council's proposed investment.
• The Ministry of Education intends to invest in the school gymnasium so that it is safe and adequate for the size of Kuranui College. This is sufficient. I do not agree with the Council investing in the gymnasium.
• That the council repair and maintain the existing sports facilities and grounds located in Featherston. Repairing and maintaining existing facilities would cost less than investing in brand new facilities. In addition, Featherston has the largest population of any town in the South Wairarapa, and has a younger population than Greytown.1 Any investment in sports and recreation areas should be in Featherston, given the larger and more youthful population.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Increased funding for road network maintenance and renewal
• That additional funding be allocated for road network maintenance and renewal, as proposed in the plan.
Money for forestry and trees
• That no funding be allocated to forestry and trees, except where work is necessary to ensure no harm comes to humans, animals or structures. Urban landscaping is not a priority. Instead, priority needs to be given to other measures such as fixing storm water issues in Featherston.
Continue to renew and extend footpaths
• That work to renew footpaths to make these safe continues, but that no further work above and beyond this is undertaken until a future year.
Walking and cycling plan
• That no funding be allocated to promote additional cycling or walking in the district, beyond what is already allocated to ensuring existing footpaths are safe. Additional cycling or walking is a “nice to have”, so should not be a priority given many residents’ financial situations (because of COVID-19) and other more pressing issues that need to be addressed by Council.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

No

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I submit:
• That it is not important that the Council develops a Waste Minimisation Action Plan.
• That the price of kerbside rubbish bags not be increased. Disposing of rubbish is something that all households need to do, and increasing the price of bags will impact more on poor households than well off households. There are already incentives to recycle, because recycling is free whereas rubbish bags cost money. Increasing the price of rubbish bags makes it more likely people will put non-recyclable waste in their recycle bins because they cannot afford to – or do not want to – pay for more expensive rubbish bags.
• That wheely bins not be provided for rubbish and paid for by rates. The current system and pricing model is adequate.
• That food composting be encouraged, provided doing so does not cost much (if anything).
• That council printing be reduced, as proposed.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

That an additional $400,000 not be allocated to investing in Council people and building on the Council’s capability to deliver. This investment can take place in a future year when residents are not going through the worst recession since the Great Depression, and people can better afford the increased rates needed to pay for investments such as this.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

There should be no rates increases in 2020/21, except where increases are necessary to protect the health and safety of South Wairarapa residents.
• An example of an initiative that would be an acceptable reason for a rate increase is investing in infrastructure to ensure that the risk of storm water flooding is minimized or eliminated in Featherston (and any other areas with similar issues), because whenever it floods there is a significant risk to human health and safety posed by flood water entering homes.
• Any debt should only be taken on where absolutely necessary, because ultimately debt (and interest) will need to be repaid.
Improving wastewater disposal
• That further investment not be made to automate the equipment and operations of the wastewater treatment plants. This is not a priority given other pressing issues that need addressing, and would mean that more jobs are lost as things are automated.
Reviewing storm water hotspots
• That the proposed review should happen immediately, with action taken urgently to address storm water hotspots in Featherston as soon as possible. Heavy rain in Featherston regularly causes flooding, which poses health and safety risks. Featherston residents have made many submissions over the last few years, many of which would identify storm water hotspots in Featherston. These submissions should be used to expedite the review and remediation process. This is a very pressing issue that should be given priority over many of the initiatives suggested in the plan.
Extra maintenance for council-owned amenity buildings
• That work be undertaken to ensure council owned amenity buildings are safe and in a reasonable state of repair, but that no further money be invested in these buildings over and above this.
Upgrades to housing for seniors
• That work on seniors' housing proceeds to ensure these units are up to the Government's Healthy Home Standards.

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Greytown Primary School would like to express its wholehearted support for the proposed Greytown Sports and Recreation Hub.

The following are key reasons:

Roll Growth

Greytown School is growing, as the town is. Our roll is forecast to continue to increase as it has done in the last few years. This has the following impact:
-We have a new classroom building commencing this year, with the possibility of a further building to address roll growth. This will begin to "eat up" our playing fields which are considered a treasured and integral part of Greytown School's whole ethos. To live in and around Greytown is to enjoy outdoor activity.
-With the roll growth, we are potentially stretched to continue to hold annual athletics day and other key sporting events at our school as we will not have space. An alternative, nearby venue would be excellent to address this.
- There will be increased demand from clubs for use of our grounds – see below

Current use of our school grounds

Our school grounds are used for a range of sports. The fields currently take a real "hammering" throughout all seasons, with sports practices held most days after school, not to mention daily physical education activities that are of course a curriculum requirement. The after-school sports practices are usually for local South Wairarapa club sports, not school teams, and we do not receive financial contribution to maintain them to the standard required

Currently the grounds are utilised throughout the school year outside normal school use for: football practices, golf lessons, cricket practices, kindergarten and playcentre sports, netball, hockey, skateboarding and scootering, etc.

Sports participation

Greytown School has one of the highest levels of participation in sport in the country. Figures show more than 80 percent of our children play a summer or winter sport.

We would be very concerned if a lack of local facilities impacted negatively on this. It is not only something to be proud of, more importantly, it is something crucial for children's health and wellbeing – both mental and physical. As well, it contributes to the active and energetic community spirit we have in abundance.

Funding

Government funding to our school has reduced in recent years. We are heavily reliant on the grants from the Lands Trust to enable us to provide additional support for educational activities and items that is truly excellent and best reflects our community. Specifically, we are able to provide up to date technology, play-based learning initiatives etc through Trust funding. This funding has already dropped due to the Trust's reduced ability to achieve sufficient income from its assets, and we are very concerned funding will drop further as has been signalled.

Range of sports

We are more limited than our urban counterparts with the sorts of sports we are able to offer. Newer sports such as futsal and floorball which are widely played and loved by urban children are not able to be played here due to lack of facilities.

It is also true that children in urban areas are achieving advantages in many sports due to covered winter facilities, flood-lit grounds and better all-round facilities. Hence, our great support of a full-sized gym at Kuranui.

Hubs
Management of sport and recreation in hub facilities is unquestionably the way our region should head. We have the foundations ready to build on, with a committed Greytown Sport and Leisure Society. Internationally, sports hubs are definitely the way forward. If anything, we are slow here (and in New Zealand) on the uptake and should be delivering sport from hub facilities already. Parochial and siloed approaches are no longer possible.

Summary

In essence, our school is doing a lot more with a lot less as our roll grows and as demand for a greater range of sports increases. We need to work together as a community to ensure we have excellent resources for our young people and facilities that match the enthusiasm and demand for sport that we have nurtured and achieved over many many years. It would be devastating to lose facilities that are there and waiting to be enhanced.

Reducing the water allowance per property

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

I do not think the main focus should be on water supply. This should be ongoing, but kept within a budget.

If you develop a water conservation action plan, there should be a budget for this and not unlimited funds.

I agree to reducing the water allowance per property, those that use it should pay for it.
I do not agree with removing the water by meter write-off policy.
I do not agree with subsidised water tanks at cost. All new builds should require a minimum size water tank on a property of 20000 litres.
If you install smart meters to monitor water consumption and leaks, this cost should be on the property owner who want these. If the leak is inside the property beyond the meter then its that person that pays for it and the consequent overuse charges. Those that are connected to the water system pay for it.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

As a rural rate payer, I do not agree, we have given free use of pools to 3 towns, and in light of the Covid 19 I would not like to see this.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

No I do not agree with Council providing more space for sports and recreation in Greytown. I do not agree that Council buys any land for a sports hub.
Each town have their own sporting communities that rely on that sport to provide facilities for that sport.

No I do not support funding for the Greytown Sports and recreation Hub

I do not support contribution to Kuranui College gymnasium replacement, or the purchase of rugby club land or bowling club land. These are separate entities and council should not get involved in running of these.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I think we need more for roading than we do for footpaths. All footpaths should be paid out of the urban rate as they are the total beneficiaries. The urban vote is greater and hence you will spend money for footpaths whereas, roading gets left. Surely there is not such a rush of people that a footpath on every urban road is needed. After all in rural areas, one walks on the road and watches out for the traffic, which can be going as fast as 100kms. As an avid cyclist, I see shoulders of rural roads no longer maintained, thereby leaving precarious dropoffs from the shoulder whitelines. There are numerous holes in the tarseal that never get fixed, they are marked, but by the time you come to fix them, the markings have gone and hence get left again. One does not like ringing Council to advise them of this pothole, of trees needing trimming off the road burn etc.
Maintaining existing cycle trails yes, but not increasing them in light of Covid19.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Yes, Council need a plan for waste.

Yes, user pays. However, if you increase the cost of rubbish bags, are we going to see an ever increasing dump of rubbish on the sides of rural roads.

I thought you already provided wheelie bins for general rubbish in urban areas. Otherwise, provide urban recycling stations as in Featherston Greytown where I am sure both urban and rural people use.

Yes, food composting should be encouraged. User pays

Whilst I agree with the district sending less waste to the landfill, there are the older persons who are not computer literate that need the availability of reading a document etc.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I would like to see the rubbish reduced on the sides of the roads (rural) Too much is dropped on the sides of our roads, in particular when you see the drinkable, eatable distance from towns and its just chucked out of the vehicle onto the side of the road. Could we have signage to remind people that we want to Keep NZ clean.

Edging of the SH53 from Featherston to Martinborough, this narrows right down to almost the whiteline with very little burn on the side of the road. This has been a popular route for cyclist over the past few years, riding the length of New Zealand. I would like to encourage Council to take the next step to Government to fund this as an essential burn on the side of the road to take one cyclist in order to keep them out of the flow of the traffic that has speeds up to 100kms. Council put up signage on the bridges on this SH 53 asking traffic to go 40kms when a cyclist is on the bridges. What a joke, people ignore double yellow lines and pass cars and I have yet to see people slowing to 40kms on the bridges when I am biking.

There are several signs that are far too close to the edge of the road, the signs actually are into the shoulder of the road making cyclist move into the carriageway of fast moving vehicles. Ie Kahutara Road, the Knoll on SH53 .

I would also like to encourage the council to have a once a year chuck out of rubbish whereby, trucks come around on the 1st of June and collect peoples metal, wooden, plastic and other large stuff. This is done successfully in parts of australia on an annual basis, and hence there isn't as much dumping of rubbish on rural roads. There would be 3 separate piles on the nature strip, so the metal truck picks up metal, the wood truck picks up only wood and the other trucks picks up the remainder.

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I do not agree with Council buying the Rugby and Bowling grounds from the Trust.

Having two community organisations that are meant to be doing things for the benefit of the community, why car’nt the Trust and the Council work together to develop the above areas into a multi sport facility, without one buying the other out.

It has only become unsustainable for the Trust because they have put a $ value on the land and thereby lost sight of their purpose, one of which is to support sport.

If the Trust do not wish to continue to support sport then they should donate the land to the rugby and bowling clubs or to the Council for the benefit of the Community.

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I oppose any more money to be spent on footpaths unless the funding is changed. At the present it is the General rate which sees rural paying 75% Urban 25% to urban general rate only. Footpaths are not a must have but are a nice to have and are an urban function. Therefore, they should be funded by Urban ratepayers. Las year it was stated that the funding would be reviewed. Council are giving more importance to urban footpaths than potholes on rural roads.
Walking and Cycling
Large potholes on the burn of the road and signs too close to the tar seal make it unsafe for cycling.
I wish to speak to my submission.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

It is disappointing that the information given in the Supporting Financial Information to the 2020/21 Consultation document is poor. The only mention about the amount of UAGC is that the 30% cap has not been exceeded. What percentage is it?

In the said document it only states the sources of operating funding as General Rate, Uniform Annual General Charge, Rates Penalties then a total, all lumped together, there is no brake down between each type. For no extra cost it could be shown which of the 3 it is funded from as the information has to be collected in the first place. This shows Council does not want to be transparent.

The whole 30% allowed should be used excluding water, sewerage, rubbish collection as it was in the past. Most of the functions are for the benefit of the community (the people of the district). The rural only have about 30% of the population so should only pay about 30% of those functions but if funded by the General rate on land value they pay 75%.

By using a UAGC it makes it fairer, overcoming the problems with different land values between the 3 towns and between farmers and lifestyle and urban and rural.
Housing for Seniors

It was stated last year that this was to be reviewed, it looks like nothing has changed.

Council should not be in this business, however, if Council is to keep pensioner flats then Council need to get real and charge a realistic rent. Thereby covering all the cost, maintenance and creating a reserve for emergencies. Rents should be more like $150 - $175 per week.
Council is looking after a privileged few at the expense of those seniors living in their own homes on the same income and have to subsidise those in the Council flats.

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

- Walking and cycling – Bring it on need to consider vineyard area biking connection and the impact of hedges onto public footpath space
- Love the tree planting initiative but want to understand the commitment to ongoing care to the planted trees. There needs to be funds to ensure they are well maintained and protected from rough mower drivers!
- We would like to see a stronger commitment to encouraging cycling in the area - it's not just about tracks and trails? the paragraph on page 5 needs some work in our view - should include roads as well? - eg. more signage regarding cycle courtesy and safety and wider berms on key rural roads and it should include encouraging a cycling/walking culture - There may be reliance on the "spatial plan" for the detail on these aspects?
- So: the answer to the question "What do you think about Council's proposals for land transport? Should we be doing more to promote walking and cycling in the district?" should be YES and recommend strengthening the wording as follows
- Draft wording: Making it easier and safer for people to get around and enjoy the outdoors by walking and cycling requires some investment in our roads, tracks and trails and an investment in changing the dominant culture from vehicle usage to one in which everyone is using other forms of transport where possible.
- The council may be relying on the spatial plan or the trails action group for this next aspect also - but we suggest that understanding the potential for Cycle Tourism in our area is another aspect that current thinking is light on?
- Draft wording to add to or amend existing paragraph: The South Wairarapa District Council will be proactive in ensuring that the potential for Cycle and Walking tourism to add value to our economy is well researched and that key projects are prioritised for action by the Wairarapa Trails Action Group - we will be an active participant in this work - rather than passively "waiting for something to happen".
- The wording of the last bit above is not quite right - but the point I am trying to make is that it's real easy in this work to think that "someone else is working on it" and for years to roll by with nothing much actually happening?

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Respondent skipped this question

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

- Like the waste minimisation stuff and support increase of council rubbish bag rates

- Waste reduction. It would be good to have the ability to do recycling at the tip 7 days a week for glass as cardboard given nature of business. The plastic seems more hands on and residential in nature.

Page 9: Discussion Topic 5: Building Capability

Q16

Respondent skipped this question

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

- Venue hire. Is the pricing based on a market rate? Should rate payers and non-rate payers be charged the same? Should a community event be charged the same as a commercial event? Is it worth worrying about.
- No tie into ‘educated community’
- No mention of business
- No mention of domestic tourism as a response to Covid
- Support the special plan but this needs to happen quickly as it feels like it has been stalling for a long time!
- Pretty good information doc over all compared to past ones.
- However lacking in strategic direction overall and doesn’t not tie back to the community outcomes very well

The Plan was clearly developed prior to Covid-19. Given the economic and social impacts we would like to see some actions by Council in the plan to support the recovery and development of businesses and collaboration with MBA , Destination Wairarapa, Business Wairarapa etc...

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1 Do you agree that the water supply should be Council's main focus next year?	**Yes**
Q2 Do you think it's important for Council to develop a Water Conservation Action Plan?	**Yes**
Q3 Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank	**Offering subsidised water tanks, at cost, paid back over a period of time** **,** **Requiring new builds to have their own water storage solution**

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Martinborough in 2019 had 701mm of rainfall measured at Nga Waka vineyard. A 3 bedroom 100 sq metre house would have been able to collect 70,000 litres of rain water during that year which could have reduced the usage of treated drinking water supplied by SWDC to that property.

The Waihenga Centre is approximately 1034 sq metres in area and with 701mm of rain falling, 723,432 litres of rain water would have been collected. This amount of water could have been used for an emergency drinking water supply for the community, it could be used to irrigate The Square and the Playground, all reducing the use of treated drinking water supplied by SWDC.

I would like all SWDC properties to have rainwater tanks installed to capture rain water which is a natural resource and reduces the reliance on our town water supply systems.

The two Pain Estate buildings should have rainwater tanks and filters installed so that their reliance on town water supply is reduced.

There are also options for the retention and detention of water which can be installed into new build homes. Examples are using grey water from showers or kitchen sinks to flush toilets so that potable treated water supplied by Council is used twice, rather than only for one purpose before it is sent into the sewage system.

See attached link from MBIE
https://www.smarterhomes.org.nz/smart-guides/water-and-waste/re-using-greywater/

I would like to see Council investigate and require new builds in the District have these systems installed as not only does it reduce the use of treated potable water, it will reduce the water flowing into the sewage systems by reusing that water.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

I support this, however, would be keen to see Council cover the costs of this by selling advertising space around the Swimming Pools to businesses, both within the District and further afield.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I do not support Council providing more space for sports and recreation in Greytown.

I do not support funding for the Greytown Sports and Recreation Hub proposal!

The purpose of the District Spatial Plan is to identify what the District will require and need in years to come and this issue should be addressed by the Spatial Plan.

There are already sufficient sports and recreation facilities within the three communities of our District which are all within a short 15 minutes drive and other facilities at Clareville and Masterton; ie Rec Centre/Indoor Pool which our ratepayers already use. In larger Metropolitan centres, residents often travel 30 to 45 minutes to access sports and recreation facilities so for Greytown residents to travel to Clareville, Featherston or Martinborough is not an issue.

Previously Greytown Rugby Club merged with Tuhirangi Rugby Club (Pirinoa) so members for both Clubs travelled significant distances to participate in their sports.

District ratepayers should not be funding facilities which are already owned by the Greytown community and should not incur maintenance costs for these facilities.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I support increasing funding for the District's Roading network with grading and re-metalling of rural gravel roads a priority. Our rural gravel roads provide a lifeline for your isolated rural communities.

I do not support Council spending to replant trees to comply with the Emissions Trading Scheme. Organisations who have felled trees on Council land and profited from those trees should be paying for replanting, and Council when they felled trees should have budgeted for replanting from the profits and not expecting current ratepayers to face those costs. Council should look at obtaining funding for replanting from

I support Council spending $50,000 on planting new urban trees, however, want Council to utilise Community groups and volunteers to do the planting so that Council maximises the value for money by not paying for contractors to do that planting. I would also support Council using Community groups/volunteers to identify what trees should be planted to ensure they are suitable for the area, environment and conditions.

I do not support Council promoting or developing a walking or cycling plan at this time. South Wairarapa is a destination which has been extensively promoted over a number of years. In this period of economic uncertainty, Council spending should only be necessities and not nice to haves.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I support Council developing a Waste Minismisation Action Plan.

I support increasing the cost of kerbside rubbish bags to $2.70.

I do not support providing wheelie bins as that would increase costs to ratepayers and decrease recycling.

I support installing of public recycling stations in public areas. Below is a photo of the recycling station at the Carterton playground. I would encourage Council to purchase and install these in public areas around the District.
I support Council should be encouraging food composting amongst ratepayers in their own houses, as well as businesses within the District.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I support Council building capability only if there has been a cost benefit analysis that shows the money to be spent will improve services and structures within Council

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I do not support Council increasing rents of the Council owned pensioner flats.

I do support Council improving the pensioner flats and bringing them up to the required legislated standard. I would also like Council to set aside a portion of the income obtained every year as a maintenance fund so that in the future there are funds available to provide urgent and scheduled maintenance.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Cobblestones Museum in Greytown is Greytown's number one tourist attraction. It has approximately 6,000 visitors annually, a large proportion of which are from overseas. We are also used by most local schools and for several community events each year. SWDC pays Cobblestones an annual grant of $15,000, and has a seat on the Cobblestones Trust Board.

Cobblestones is in a similar position to the Greytown Rugby and Bowling Clubs in that Greytown Trust Lands Trust owns two-thirds of the land at Cobblestones. Cobblestones owns the other third. Cobblestones pays the Trust rent, and the Trust usually rebate that rent payment back to Cobblestones by way of a grant of the same amount. But this year the Trust advised Cobblestones that the rent rebate arrangement will end and that this years grant payment will be the last. This will mean a reduction in Cobblestones income of $34,000 per year, which is one-third of our total income.

The loss of that income will be undoubtedly fatal to Cobblestones, and of course having to close during the Covid19 crisis and the prospect of reduced visitor income is compounding our problems. But we do have financial reserves that will allow us to continue to operate for another 2 years.

Cobblestones has had discussions previously with SWDC about the possibility of SWDC buying the GTLT land at Cobblestones and then SWDC charging Cobblestones less rent than we pay to the Trust. That does seem to us to be the best option to preserve the future of Cobblestones as an important community asset. The Trust land has a current value of $660,000.

An alternative option is for Cobblestones to seek a higher annual grant from SWDC to cover our rent payments but given increasing land values in Greytown, and the consequently higher rents, that option seems the worse of the two, both economically and by providing no long-term security.

However we don't propose asking that SWDC consider our funding issues in the 2020/21 Annual Plan. But we do ask that our request that SWDC buy the Greytown Trust Lands Trust portion of our land be considered in the Long-Term Plan discussions that your council will commence later this year, and ultimately be addressed in the 2021/22 year. We are of course happy to discuss this with you at a later date.

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

With regard to council intention to increase the annual rates of local ratepayers to facilitate the creation of a Greytown Sports Hub.

In short, I strongly object to this intended proposal.

My Thoughts.

Although I can see there are long-term benefits for mainly the Greytown population, and any future adolescent from the wider area that attends Kuranui Collage, In case council is not aware, there is a proportion of the South Wairarapa population that do not enjoy a three figure salary, even struggling to pay their way on a low two figure salary perhaps even working two or more jobs and indeed are living nothing less than hand to mouth, with no income left spare at the end of the month after paying for the necessities, let alone to facilitate the increase of this proposal, how would these families fare long-term with such a proposed increase?

Could it not be an idea to perhaps sell off either the Hodder farm or the Golf course or both or part there-of, of each, both purchased in error for an ill thought out waste water to land proposal, (Im understanding the collated sum land value is around $7million?), the revenue's collected any of these sales would or could be then allocated to facilitate not only the proposed Greytown sports Hub but also a badly needed refurbishment of the Featherston Sports Gymnasium Facility (which is council owned) , even extending to the Swimming Pool, Rugby Club, and Football Club, all of which are in urgent need of upgrade.

As the Featherston population is currently in a state of growth along with its property prices including into the foreseeable future could you not agree that investing in the existing Featherston sports infrastructures would have significant benefits to the wider communities.

Do you not think with some wisely placed investment in Featherston, its land values and property prices would undoubtedly in the long-term emulate its neighbouring township's, thus enhancing the benefits to the whole district, which in turn would bring benefit council financially?

In the early to mid-2000's council sold the Featherston camp ground for a song to a private investor, the proceeds of which, I am lead to believe were absorbed by the then escalating costs of the Greytown Library refurbishments. Now looking at the evident predicted long-term growth of Featherston, also including tourism (once it picks up again) especially now the freedom campers have now discovered local swimming holes, could now the sale of this camp ground be deemed somewhat short-sightedness. Although we are unable to turn that clock back, we are indeed in prime positioning to prevent any similar short-sighted situations re-occurring.

Could council please become a bit more creative on sourcing and allocating funding's for any new council lead financial initiatives, rather than just hit the ratepayer in the wallet.

Please do not impose a rate increase on the residents of Featherston that some of which may never benefit of any developments in Greytown.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

With climate change and the South Wairarapa generally going into drought conditions every summer and the amount of water taken by the dairy farmers for irrigation we desperately need to get the population to realise that water is a precious commodity and must not be taken for granted and wasted.
There are some really simple ideas which are cost effective and simple.
STOP dripping taps - Council could employ retired plumbers to visit properties and identify problems and fix them.
Subsidise fitting of water saver showerheads - educate on length of shower time, supply simple timers stuck on shower walls (suction cup) so people become aware of the time spent.
Toilets with half flush option mandatory.
Encourage people to take a bucket into the shower and save the excess water for the garden. Save rinse water from washing machine for use on gardens.
Educate - have a Council employed person to visit all our schools and early childhood centres and educate children on use of water and how they can save water. Brushing teeth with tap off, soaping hands well before turning on the tap to rinse, shorter shower times. Children will then go home and educate their parents. Distribute water gauges in schools and ask children to take daily measurements and send to Council - involve them and make them aware.
Use of irrigation systems in gardens rather than sprinklers - inexpensive and easy to install. Water only the fruit and vegetables not all the surround area. Timers installed on watering systems. If Council can buy in bulk so ratepayers can buy at a cheaper rate.
Water tanks - subsidised water tanks, at cost, paid back over a period of time - a No brainer. Wow do we have a smart council? How much water runs off the average house into the storm water drain every year. In previous times everyone collected their own water and were very aware of how much they were using and always knowing the level of the tank water. We now have efficient filters to make it safe to use our collected water which is evident from all the rural population. Town water is too cheap and too easy, ratepayers are not aware of what they are using and often don't care. We need to make water cost more so it encourages thinking, caring and trying harder. Distribute water gauges at schools and ask children to send in reports to the council.
Wouldn't it be great if our Council became known nationwide as the clever council who has reduced water usage and educated ratepayers and assisted in water conservation.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Most South Wairarapa children live too far away from the beach and rely on the pools. Our drowning statistics make it vital our pools are open.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

The Rugby Club and Bowling Club are all owned by the community already. Council does not need to spend this money, or own this land.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

- I think the funding should be increased by 2 million for the Wastewater project. I think this increase in funding needs to be balanced with responsible fiscal management so I support Council borrowing 1.5 to 2 million dollars to progress the Featherston Wastewater project. I do not support borrowing money for any other expenditure. It is not OK for Council to continue to put treated wastewater into our waterways. We need to be healing Lake Wairarapa.

- The sign at the intersection of SH2 and Wakefield St to the One Tree Hill walking track is faded and dirty. The surrounding garden is overgrown with weeds and the bushes need to be trimmed. This is near the south entrance to Featherston and does not give a good impression of our region. Can you please arrange for some funding so that this area can be given love and attention?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Cyclists are not a rare breed – many people have bicycles and would like to ride them in a safe environment enjoying the many benefits – the number of cyclists has increased significantly in Wellington and can reasonably be expected to continue to do so given the constraints on land available for garages / time taken to cross the city by car / cost of running a car compared with a bike etc and development of safe cycling infrastructure. Cyclists have expressed their joy on dedicated Facebook pages at the opportunities presented to them during lockdown given the empty and peaceful roads.
During lockdown, many people took to the streets on foot and enjoyed walking around local areas.
Many of us would like more opportunities such as this and the Wairarapa does offer spectacular varied scenery and a playground close to home for those from Wellington. Should we offer short and long rural trails and safe and easily navigable around town routes then this will enable residents and visitors alike to benefit. The long term plan of the Five Towns Trails Trust for a cycle route through all the main towns and ultimately an alternative loop back is to be applauded. Most would-be cyclists are not in fact road racing cyclists who may regularly travel significant distances multiple times a week, but rather Are a mix of off-road cyclists (mountain bikers etc), irregular scenic riders (e.g. Otago Rail trail or Whakarewarewa Forest) and parents taking their young children out for a ride. This is evident in the patronage of the Greytown Rail Trail. Mostly people want cycleways and walkways that are not shared with a motorcar or bus or tractor or the like and is safe and quiet – the Western Lake Road track was never built with cyclists in mind and is unusable except for horses due to its manifestly cheap and poor construction.
Bearing the above in mind, even more opportunities for riders in South Wairarapa would be most welcome near and far. An additional relatively short and predominantly flat route from Featherston off road to the Wairarapa Moana (which has wonderful views to the Remutaka ranges through pockets of Kahikatea) which already has a working group and visible support in the local community would be a drawcard for the region. It will also tie in nicely with the Five Trails route. The route should have Interpretation signs which explain some of the (many) local points of interest (the lake flora and fauna especially kākahi freshwater mussels / the heritage site of the historic Carkeek observatory / myths and legends etc on kahikatea / the dark sky reserve / etc.)
Additionally a safe cycling route around the three towns – especially Featherston - would be beneficial to publicly mark and promote.
p.s. Its seems inflammatory to refer to “encouraging people to DITCH their cars” - that seems likely to subconsciously inflame some car drivers and is not positive. Many cyclists have motor vehicles and don’t need to be advised to ditch their car or motorbike etc. And car drivers don’t need to be advised to get rid of their car.
p.p.s. promoting cycling and walking has a cascading series of holistic benefits, including improved public health, better air quality, fewer road accidents, and reduced asset wear-and-tear on roads. Walking and cycling reduce our energy/technology reliance and provide resilient local transport alternatives - especially during emergency circumstances.

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Respondent skipped this question

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Respondent skipped this question

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Water supply and safety
• That the work outlined regarding water supply and safety should go ahead. Ensuring our water is safe to drink is very important.

Water resilience
• That the current household water allowance should not be reduced. It should remain 350 cubic meters. Water is a very important resource and we have an abundance of it – it just needs to be stored and treated correctly so that it is safe. If anything, there should be no restrictions on water consumed for household use.
• That the current Water by Meter Write-off Policy (which gives provision for meter usage charges to be written-off when leaks are detected and fixed, or when there is real genuine hardship) should not be revised or removed. The current policy incentivizes people to fix water leaks, and provides help to people who are in genuine hardship.
• That subsidized water tanks should not be offered, as these should not be necessary if sufficient measures are taken to ensure water supply, safety, and resilience.
• That new residential buildings should not have to include their own water storage solutions. This would increase the cost of building at a time when many people are struggling to make ends meet because of COVID-19.
•That smart meters not be installed to enable closer monitoring of water consumption. Given purchasing and installing smart meters will cost Council money, this should not be a priority given other issues that are more pressing and need addressing.

Improving wastewater disposal
• That further investment not be made to automate the equipment and operations of the wastewater treatment plants. This is not a priority given other pressing issues that need addressing, and would mean that more jobs are lost as things are automated.

Reviewing storm water hotspots
• That the proposed review should happen immediately, with action taken urgently to address storm water hotspots in Featherston as soon as possible. Heavy rain in Featherston regularly causes flooding, which poses health and safety risks. Featherston residents have made many submissions over the last few years, many of which would identify storm water hotspots in Featherston. These submissions should be used to expedite the review and remediation process. This is a very pressing issue that should be given priority over many of the initiatives suggested in the plan.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

I submit that the extended swimming pool hours should continue. These extended hours ensure that more residents have the opportunity to use the pool. The provision of pools with extended hours ensures that residents are more likely to be able to access the pool (when they are not at school or at work), and can use the pool to learn important water safety skills.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Respondent skipped this question

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

• That the Council not proceed with its $1m contribution to the gymnasium replacement, the $1.91m to buy the Rugby Club land, $760k to buy the Bowling Club land, $70k to upgrade the buildings at these locations, or invest $228k per year in financing and running these new facilities. I do not agree with the Council's proposed investment.
• The Ministry of Education intends to invest in the school gymnasium so that it is safe and adequate for the size of Kuranui College. This is sufficient. I do not agree with the Council investing in the gymnasium.
• That the council repair and maintain the existing sports facilities and grounds located in Featherston. Repairing and maintaining existing facilities would cost less than investing in brand new facilities. In addition, Featherston has the largest population of any town in the South Wairarapa, and has a younger population than Greytown.1 Any investment in sports and recreation areas should be in Featherston, given the larger population and more youthful population.

1) Stats NZ (2018) Featherston Census Data, Stats NZ (2018) Greytown Census Data, Stats NZ (2018) Martinborough Census Data.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Respondent skipped this question

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Increased funding for road network maintenance and renewal
• That additional funding be allocated for road network maintenance and renewal, as proposed in the plan.

Money for forestry and trees
• That no funding be allocated to forestry and trees, except where work is necessary to ensure no harm comes to humans, animals or structures. Urban landscaping is not a priority. Instead, priority needs to be given to other measures such as fixing storm water issues in Featherston.

Continue to renew and extend footpaths
• That work to renew footpaths to make these safe continues, but that no further work above and beyond this is undertaken until a future year.

Walking and cycling plan
• That no funding be allocated to promote additional cycling or walking in the district, beyond what is already allocated to ensuring existing footpaths are safe. Additional cycling or walking is a “nice to have”, so should not be a priority given many residents’ financial situations (because of COVID-19)
and other more pressing issues that need to be addressed by Council.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

No

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Q14

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

• That it is not important that the Council develops a Waste Minimisation Action Plan.
• That the price of kerbside rubbish bags not be increased. Disposing of rubbish is something that all households need to do, and increasing the price of bags will impact more on poor households than well off households. There are already incentives to recycle, because recycling is free whereas rubbish bags cost money. Increasing the price of rubbish bags makes it more likely people will put non-recyclable waste in their recycle bins because they cannot afford to – or do not want to – pay for more expensive rubbish bags.
• That wheely bins not be provided for rubbish and paid for by rates. The current system and pricing model is adequate.
• That food composting be encouraged, provided doing so does not cost much (if anything).
• That council printing be reduced, as proposed.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

• That an additional $400,000 not be allocated to investing in Council people and building on the Council’s capability to deliver. This investment can take place in a future year when residents are not going through the worst recession since the Great Depression, and people can better afford the
increased rates needed to pay for investments such as this.
• Following the lead of Central Government,2 that all salaries of council members/employees, whether elected or not, should be frozen for at least one year. Similarly, all highly paid Council staff should receive a pay cut of 20% for at least one year.

2) State Services Commission (2020) Our Work - Employment Relations.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Extra maintenance for council-owned amenity buildings
• That work be undertaken to ensure council owned amenity buildings are safe and in a reasonable state of repair, but that no further money be invested in these buildings over and above this.

Upgrades to housing for seniors
• That work on seniors' housing proceed to ensure these units are up to the Government's Healthy Home Standards.

Rates affordability
I submit:
• There should be no rates increases in 2020/21, except where increases are necessary to protect the health and safety of South Wairarapa residents.
• An example of an initiative that would be an acceptable reason for a rate increase is investing in infrastructure to ensure that the risk of storm water flooding is minimized or eliminated in Featherston (and any other areas with similar issues), because whenever it floods there is a significant risk to human health and safety posed by flood water entering homes.
• Any debt should only be taken on where absolutely necessary, because ultimately debt (and interest) will need to be repaid.

I am happy to discuss my submission if more detail if required, but do not otherwise wish to appear before
Council to make an oral submission.

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I support the proposal to establish a Sports and Recreation Hub in Greytown in conjunction with the contribution to the replacement of the Kuranui College gymnasium in the interests of the South Wairarapa and Carterton districts.

Community members from both districts have been beneficiaries of Greytown District Trust Lands Trust grants to Kuranui College. This proposal can be expected to further enhance the well-being of both districts and their communities.

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Water Supply

The previous Council agreed to fix the very long-standing problems with the Martinborough water supply around chlorination and manganese at considerable cost to the whole District. Now Wellington Water has come in and has a long wish-list of all the things that should be addressed in the various supplies and at a much greater cost again. I would have expected that Council would prioritise items and address these progressively rather than wanting to have all the bells and whistles so quickly, especially in these financially troubled times.

Water Conservation
If the Council is serious about really saving water, it needs to address how water is charged for. The present water metering charging policy is partly based around the desire of not sending bills to a very large majority of ratepayers. This policy has been reasonably successful in gaining an acceptance of water meters and reducing consumption and leakage, but it is losing its effectiveness over time. Most people have worked out by now that they can use a rather significant amount of water annually without incurring any additional cost, and therefore there is no incentive to reduce water use.

I believe SWDC should be exploring the charging approach adopted by Kapiti and several other councils whereby every cubic metre of water is charged for, plus there is a fixed annual charge for being connected to the system. This is the same approach long used for electricity.

Investigations I have undertaken in the past indicate that the charge per cubic metre can be substantially less than is presently charged. It would mean that a pensioner living alone and others who use little water would get a reduced charge and someone with a swimming pool would pay what it really costs to provide the volume used. I believe such a change would be a much more effective way of encouraging citizens to value and conserve water.

Respondent skipped this question

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Q6

Why is this?

The previous Council agreed to trial extended swimming pool hours for the past summer period. It is disappointing that Council now considers that a further summer trial is necessary before a decision can be made.

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I support the concept of a sports hub, but I am very concerned that at present there is only half a proposal and no indication as to the likely final costs to ratepayers. A suitable contribution to a proper gym at Kuranui for shared use is fine by me.

However, jumping in and agreeing to buy two blocks of land because of extreme pressure from the Greytown Lands Trust does not seem appropriate until the community knows more about what sort of sports hub; e.g. artificial surface or not, etc, and what magnitude of final cost will be involved. In my view, it is all rather too vague at present for Council to be making a long-term commitment.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Financial
Expenditure in the Proposed Annual Plan is a very substantial departure from the current Long Term Plan. It is also very different to the official Pre-Election report prior to last October's election and any candidates' profiles at election time. Annual operating costs for next year are budgeted to increase by 18%, but the community is being told that rates will increase by only 2.5%. This sounds too good to be true – and it is!!

Firstly, the % figure quoted is not the increase in total rates required by the Council which is 4.3%. Instead we are given a 'growth adjusted figure', presumably as it looks better.

Secondly, because Council intends borrowing for some operating expenses for next year, what happens in the following year? It seems very unlikely that the annual operating expenses will be reduced – they rarely do in local government because they largely pay for salaries and services which continue on in the future. It seems to me that if the Council adopts all of its present proposals, then Council is actually committing to increase the rates over time by at least 13%, especially as the Greytown Sports proposal is not currently included in the figures. And in 2021 and again in subsequent years, Council will have inflation and, no doubt, other items that they would like to add in, resulting in an even larger increase over time.

In addition to the above, Council is budgeting for a deficit in the coming year, instead of having a balanced budget which is clearly signalled as being desirable in the local government legislation. In my view, the Council should have been much more upfront with the community about the proposed increase in expenditure and the full impact on rates, rather than making it look like they were getting a bargain.

Covid19 has changed many things and in my opinion the Council needs to re-assess what are its real priorities and most pressing needs at this time. Can the community afford to fix most of Council's perceived issues so quickly? It might be a little different if SWDC didn't have such a 'flat' rating system that charges a similar amount to most ratepayers, especially those in the towns, whether they are rich or poor.

Senior Housing
The Council's Housing Working Party in the last triennium concluded that the Council was not necessarily the best provider of this service. A proposal to gift the properties to a long-established provider of accommodation for elderly folk was held back because the legislation requires such a move to be part of an agreed Long Term Plan. As a result, ratepayer money is having to be used to upgrade the housing and to pay off a deficit from the housing activity.

I suggest Council should be seriously considering other options to retain this housing in the three towns other than Council itself providing the service. At present, just 32 elderly people get the benefit and all the other elderly people in the District and others are helping pay for it.

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Waste should be a focus it is crazy to think we generate more than Carterton

I would prefer an option for a non plastic bag and pay more than simply have added cost for the plastic bag. paper or compostable option if supported by facility to make sure it could be compostable.

User pays wheelie bin would work if paying on pick up as opposed to weekly which is why I didn't opt for way pay bin.

More recycle facilits in urban be god for the tourists as watching camper vans stuff local bins full of their rubbish as there is no option not great.

the region needs to look at this as a big picture too, better recycle facilities etc.

Like the idea of food composting and an intuitive has been looked at by a local group so be worth opening up for a conversation to include people who have been looking at it and the community garden, better to work together as a community city on that initiative, and schools.

I would imagine the impact of Covid and lockdown will enable people to be more aware of what is required having operated with a lot less printing.

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I am not sure the configuration of venues is correct and feel there should also be options for local rate payers to pay less?

The town hall facility in Martinborough should be being used and thriving in the community as well as for events but community groups would be hard pushed to be able to pay the suggested rates, community groups should have a seperate criteria.

Out of district rates should be considered.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Thank you for the opportunity to submit to the plan. I consider it unfortunate that the Plan was not able to be fully assessed and discussed with councilors prior to its distribution as revealed in the minutes of the Council meeting of 22 April. I know that Covid-19 has disrupted our lives, but to have such an important document issued to the public without councilors reviewing it is to my mind inappropriate.

My submissions is related to the financial aspects of the Plan as follows:
1 The Council's spending is budgeted to rise by 18% from 2019 to 2020. In a time when every other council in NZ is attempting to restrain spending so as not to impose further hardship on ratepayers, I believe that SWDC should also be looking at their expenditure, and hence the level of rates they will charge.
2 In my opinion that implies that spending should be concentrated on the Must-Have items, and none of the Nice-to-haves.
3 Borrowing makes sense for one-off purchases of long term assets that future residents will get to use and enjoy. It makes no sense, and is economically suicidal in the long term to use borrowing to pay for running costs. The Government is doing enough of that for the whole country in its response to COVID-19. I note that the Council does have plenty of room to borrow in terms of the 250% of revenue ceiling and that discussions are being had at a national level concerning whether borrowing to pay for operating costs might be allowed. However, that discussion centres around a shortfall in potential income and consequential necessity to slash service levels, not an excess of spending, as I interpret it.
4 Yes, water supply and sewerage disposal are important to get right for us now. But do we need a gold-plated solution, which I understand the current options are? Are you sure that there might not be solutions that are just as good in terms of effectiveness, without costing as much? Can the work be staged over time as to when the financial capability is not as constrained by COVID-19 induced difficulties?
5 As a consequence of the current crisis, it is my strong view that you need to consider that the resulting recession (that is guaranteed) could well be worse than currently planned for. You need to plan for a reduction in the quantum of rates collected, either through ratepayers losing their jobs (see also 6 below) and/or should property values fall. Increasing expenditure in such an environment is irresponsible in my opinion.
6 In that sense I am definitely in favour of an enhanced relief package being developed for ratepayers who may have lost their jobs or otherwise facing serious financial pressure as a result of the COVID-19 economic fall-out.
7 The Annual Plan presents us with an operating deficit of almost $400k. Sub-part 3 of the Local Government Act requires that operating revenues be set at a level to meet expenses. There are exemptions "… if the local authority resolves it is prudent to do so…" I cannot see how, in the current situation of facing a recession how the Council can consider it 'prudent' to increase spending by 18%, with consequential impact on ratepayers who have to meet these costs. And such costs fall on the ratepayers irrespective of whether they be by immediate increases in rates, or by paying over time in interest and loan repayments. Both methodologies have the same present value. It is irresponsible to portray one as being cheaper than the other. The plan talks of borrowing $1.5m to meet operating costs incurred this year. I would suggest strongly that as it is almost inevitable that these operating costs WILL NOT REDUCE next year. So Council will need to borrow again next year another $1.5m+ and so on into the future, or bite the bullet and increase the rates by the required 13% approx. that represents.
8 I note that in the draft 2021 plan's financial position statement, there is a one-off $5m current portion of Public Debt, with basically no change in the non-current portion from 2020 nor in the LTPs for 2021 & 22. So we have $4.7m more in the current portion relative to the LTP. This increase in debt is not mentioned in the Annual Plan – where the amount talked of is only of some $1.5m being borrowed to pay operating costs. Concurrently the interest to be paid in the 2021 Annual Plan blows out to almost $3m from a budgeted 2020 figure of $600k. Some explanation is required please.

In conclusion, my submission is focused on the absolute necessity for Council to cut their cloth to what is happening in NZ and reduce their spending, not increase it, irrespective of how necessary the particular projects might appear to be. Your income is about to come under pressure. Borrowing may alleviate some of those pressures in the short term, but over time they cost ratepayers the same, or more, never less.

There are other specific aspects where I believe insufficient thought has been put into the proposals, but will leave that to others to focus on.

Water supply and water resilience, Our waste treatment needs to be turned into safe water and stored for future use in drought conditions or when water is restricted due to limited rainfall and drier conditions. All new houses should have a water tank and established houses encouraged to have there own water supply for gardens. Focus should be on decent water and water supply.

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I totally oppose the use Featherston rates payers funding to build or be part of a build for the Greytown Sports Hub. Within 6 - 10 minutes of Greytown there are a number of facilities already available. One of the first things that went in the lock down was sports and this is only the start. Most cities would love to have a sports hub on every corner but like in Wellington it can take you more than 10 minutes to drive to a sports facility.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I agree with planting more trees and may they be productive trees as in fruit or nut trees so you can also feed the community. You might also like to involve the Featherston Beautification Group in the tree planting as they have been trying for years to get council approval but most streets have under ground infrastructure. So would be an interesting concept of what you are planning.

I agree with making it easier and safer for people to get around the towns either walking or on bike or mobility scooter.

Possibly concentrate on the bus options to run regularly between sporting venues, including swimming pools, A HOP on and off sporting bus. That would also help with our carbon admissions

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Respondent skipped this question

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Waste minimisation I agree with council working on an action plan to help minimise waste and have more recycling stations and rubbish disposal centres, Bearing in mind our weather conditions when considering waste programmes.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I agree that the council needs to build capability to modernise systems and the delivery of services.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I think it is important that our infrastructure in our towns is maintained and upgraded. The basics of what our rates pay for. Fresh drinkable water, sewage and waste disposal. lighting and pavements, roading, a safe community. Maintenance of our council own historic building - library, swimming pool and meeting halls.

At times like these we don’t not need to be wasting rate payers money on purchasing new acquisitions unless it is to upgrade the current infrastructure. Let alone borrowing additional money for items outside of council basic services.

Stop wasting Featherston rate payers money on white elephants - the Martinborough centre, when they can't drink the water.

Waste money on an a proposal for an obsolete waste treatment for Featherston. And purchasing land and assets when this is not your duty to be buying up land and buildings unless it is for the sensible repair and maintenance and upgrade of our basic infrastructure. Please stick to what you are there for and manage and maintain our community infrastructure - Safe people and community, safe drinking water, suitable sewage. Safe from flooding etc.

I agree that we need to look after our elderly and vulnerable people with safe healthy and maintained housing.

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The primary focus of our feedback is the Greytown Sports and Recreation Hub. We are supportive of the project, including the opportunity to contribute to the development of the Kuranui College gymnasium.
The Regional Spaces and Places (Facilities) Plan development is a Living Well project and was signed off at the end of 2019 by the Mayoral Forum. The plan provides a high-level strategic framework for future sports facility planning for regional, national, and international facilities, and for supporting the optimisation of the current regional network.
While as a wider region we have almost enough supply to meet demand (with the exception of some facility types) we are not well set up to cater for expected population growth, changes to participation preferences (the fastest growing sports in our region are floorball, basketball, futsal and gymnastics) and demographic change which may impact physical activity choices.
Key to the successful implementation of this plan is the consistent application of the facility planning principles contained within it. These principles can be found in all regional facility plans in the country and are derived from work carried out by Sport NZ as part of their development of the national facilities framework.
These principles are:
PRINCIPLE EXPLANATION
MEETING AN IDENTIFIED NEED Facilities should meet an identified need and be fit-for-purpose. There is often insufficient rigour applied to this fundamental question. The best outcomes are achieved when all the potential facility users are identified, and a deep understanding gained of their range of needs. This will also ensure that there is a community return on investment – measured both socially and economically.
SUSTAINABILITY Facility sustainability requires consideration of the ongoing operating and maintenance costs of the facility and how these will be funded. The best outcomes are achieved when the 'whole of life' costs of the facility are considered at the outset and how it is intended that these costs will be met. Often, upfront investment in, for example, facility features that enable greater energy efficiency, can deliver huge dividends over the life of the facility.
COLLABORATION Historically sports facilities have tended to be planned and built in isolation. This has led to over-provision and duplication. The best outcomes are achieved when partnerships are developed with education, health, Iwi, and/or the private sector. This increases the likelihood that facilities will be used to their full potential, maximising the return on investment and utilisation.
FLEXIBILITY No one can predict the future, but what we can predict is that things will change. Facilities should be designed to accommodate changing community profiles and associated sporting trends and needs over time. The best, long-term, outcomes are achieved by designing facilities in ways that enable them to be adapted, developed and extended in response to future demands
INTEGRATION AND MULTI-USE Facilities need to be fit-for-purpose, and sustainable. The best outcomes are achieved by sharing. Creating multiuse facilities or hubs, or co-locating with other sport and recreation, community, education, or transport facilities and infrastructure is an effective approach
INCLUSIVE AND EQUITABLE ACCESS Experience shows, that while society is generally more inclusive, barriers remain for many in accessing sport, recreation and physical activity pursuits. To ensure all members of the region's community have equitable access to and opportunity for participation requires us to consider the needs of a wide range of our community when making decisions. Focus should be given to ethnic, financial and ability barriers including but not limited to age and disability.
The principles represent good practice. We believe that the work carried out to advance the project to date is consistent with these principles
There is a strong trend of co-location of indoor sport and aquatic facilities with other public or private facilities such as sports parks, retail centres, libraries, schools, and community centres to create social infrastructure hubs and generate economies of scale.
There are economic, social, community, and health and wellbeing benefits to be gained through the development of community infrastructure that are well-documented. It is our view that the benefits to the community will be many - not only for local communities, but for the wider region.
We also understand that the opportunities creating the conditions for this project are unlikely to be available again in the near future. As has been observed in other regions, most notably the post-earthquake rebuild of facilities in Christchurch, facility projects only increase in cost over time.

SUBMISSION

SOUTH WAIRARAPA DISTRICT COUNCIL ANNUAL PLAN 2020-21

Thank you for the opportunity to submit against your Annual Plan 2020-2021

Sport Wellington

Sport Wellington is the independent body for sport and recreation. We were established in 1990 with charitable status under the Charities Act. Our main funding partners are Sport NZ, New Zealand Community Trust, Eastern and Central Community Trust, Ministry of Health, and Wellington Community Trust. We are one of 14 Regional Sports Trusts (RST) operating throughout New Zealand.

We operate within a wide geographical area, spanning the region between Otaki in the west across to Masterton in the east and Wellington City in the south so have a regional focus. We have an office in Wairarapa where our dedicated team works across a wide range of areas.

We are currently finalising our new strategy which looks to 2032, however we will focus on three four-year blocks to provide us with the agility to adjust to changing needs and the strategic environment. The focus of our work is broad: physical activity (play, active recreation, active transport, and sport), health and wellbeing, and community development.

Sport Wellington plays both a lead and supporting role across the region in increasing physical activity and community wellbeing by working with and on the system that supports physical activity. We have a regional view while recognising community differences and developing our connections, partnering, and collaborating to ensure efficiency in delivery while agility to meet changing and developing needs.

Living Well – the Wellington Region Physical Activity Strategy

Sport Wellington led the development of *Living Well*, the regional physical activity strategy, in 2017. The current revised plan is built around a planning framework, adapted from the World Health Organisation's Global Action Plan on Physical Activity, and seeks to build a robust system that can support all forms of physical activity.

Living Well is the outcome we want for people in the region. This means improving physical and mental wellbeing; personal development and achievement; and social and community cohesion and development; through regular physical activity – play, active recreation (including active transport), and sport.

The purpose of the Living Well Strategy is to achieve greater collective impact on wellbeing outcomes acquired through physical activity. By working better together we will be able to provide quality opportunities and support for people to be physically active. The Living Well framework is being used currently as the basis for the work of the Regional Response Group we have established to respond to the challenges faced by the sector because of Covid-19.

Covid-19 and the physical activity sector

The impact of Covid-19 on the play, active recreation, and sport sector is significant and likely to impact for some time to come. Some organisations may not survive the effects of Covid-19 which could have some implications for physical activity levels in your communities.

There is an immediate economic impact due largely to the significant change to Class 4 gaming from which the sector nationally, benefits annually to the tune of around $150 million. And while we appreciate that councils are not immune to the effects of the pandemic, any steps taken to provide rent relief and fees waivers, or any other mechanisms that reduce costs for sector groups in your community would go a long way to helping them to cope and ultimately thrive. There are immediate and short-term needs but their challenges will be ongoing.

Longer-term the sector will continue to feel the effects of Covid-19 for some time. From our surveying and insights work we have determined several critical changes likely to occur. Some of these are:

- Increased unemployment and lower incomes suggest that cost will become a greater barrier to participation
- It is likely that current inequities will increase, and we know already that where there is high deprivation there is less physical activity
- There may be a drop in people's confidence to be in groups of people which will impact participation and volunteering. At the same time this could have implications for demand for activities that involve physical contact such as rugby and perhaps netball.
- Ongoing requirements for sanitation surveillance and contact tracing may become part of the new normal for provision
- The effects of changing work routines may lead to greater demand for flexibility in work/life balance management, with similar expectations of how people access physical activity opportunities

These will change what we have been used to in terms of physical activity, but we believe they also create opportunities for doing things differently and potentially better then pre-Covid. What will not change is the value to individuals and communities of more people being physically active. Physical activity, including play, community recreation and sport will be vital to the social and economic recovery of our country from the covid-19 pandemic.

Their benefits on wellbeing domains, is well known and proven. Being physically active improves mental and physical health, quality of life and individual wellbeing. In contrast, disengagement and physical inactivity are associated with poor health, a rise in health costs, loss of productivity and associated costs, such as pain and unhappiness to individuals and families.

Without sustained or increased investment, our sector and communities will suffer, and that will create significant consequences for New Zealanders into the future, resulting in much wider issues for us all to manage. The provision of well-maintained infrastructure, facilities and open spaces that provide equitable access for physical activity is critical element in this.

At Sport Wellington we know that change is required to the regional system that supports physical activity and with sector organisations. The current system has several vulnerabilities that have been highlighted only too well during this crisis and we are keen to work with you in the months ahead to effect change and maximise the opportunities that also exist.

Phil Gibbons

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Respondent skipped this question

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Respondent skipped this question

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Respondent skipped this question

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Water supply and safety
-That the work outlined regarding water supply and safety should go ahead. Ensuring our water is safe to drink is very important.

Water resilience
-That the current household water allowance should not be reduced. It should remain 350 cubic meters. Water is a very important resource and we have an abundance of it – it just needs to be stored and treated correctly so that it is safe. If anything, there should be no restrictions on water consumed for household use.
-That the current Water by Meter Write-off Policy (which gives provision for meter usage charges to be written-off when leaks are detected and fixed, or when there is real genuine hardship) should not be revised or removed. The current policy incentivizes people to fix water leaks, and provides help to people who are in genuine hardship.
-That subsidized water tanks should not be offered, as these should not be necessary if sufficient measures are taken to ensure water supply, safety, and resilience.
-That new residential buildings should not have to include their own water storage solutions. This would increase the cost of building at a time when many people are struggling to make ends meet because of COVID-19.
-That smart meters not be installed to enable closer monitoring of water consumption. Given purchasing and installing smart meters will cost Council money, this should not be a priority given other issues that are more pressing and need addressing.

Improving wastewater disposal
-That further investment not be made to automate the equipment and operations of the wastewater treatment plants. This is not a priority given other pressing issues that need addressing, and would mean that more jobs are lost as things are automated.

Reviewing storm water hotspots
-That the proposed review should happen immediately, with action taken urgently to address storm water hotspots in Featherston as soon as possible. Heavy rain in Featherston regularly causes flooding, which poses health and safety risks. Featherston residents have made many submissions over the last few years, many of which would identify storm water hotspots in Featherston. These submissions should be used to expedite the review and remediation process. This is a very pressing issue that should be given priority over many of the initiatives suggested in the plan.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

That the extended swimming pool hours should continue. These extended hours ensure that more residents have the opportunity to use the pool. The provision of pools with extended hours ensures that residents are more likely to be able to access the pool (when they are not at school or at work), and can use the pool to learn important water safety skills.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Respondent skipped this question

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

-That the Council not proceed with its $1m contribution to the gymnasium replacement, the $1.91m to buy the Rugby Club land, $760k to buy the Bowling Club land, $70k to upgrade the buildings at these locations, or invest $228k per year in financing and running these new facilities. I do not agree with the Council's proposed investment.
-The Ministry of Education intends to invest in the school gymnasium so that it is safe and adequate for the size of Kuranui College. This is sufficient. I do not agree with the Council investing in the gymnasium.
-That the council repair and maintain the existing sports facilities and grounds located in Featherston. Repairing and maintaining existing facilities would cost less than investing in brand new facilities. In addition, Featherston has the largest population of any town in the South Wairarapa, and has a younger population than Greytown. Any investment in sports and recreation areas should be in Featherston, given the larger population and more youthful population.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Increased funding for road network maintenance and renewal
-That additional funding be allocated for road network maintenance and renewal, as proposed in the plan.

Money for forestry and trees
-That no funding be allocated to forestry and trees, except where work is necessary to ensure no harm comes to humans, animals or structures. Urban landscaping is not a priority. Instead, priority needs to be given to other measures such as fixing storm water issues in Featherston.

Continue to renew and extend footpaths
-That work to renew footpaths to make these safe continues, but that no further work above and beyond this is undertaken until a future year.

Walking and cycling plan
-That no funding be allocated to promote additional cycling or walking in the district, beyond what is already allocated to ensuring existing footpaths are safe. Additional cycling or walking is a “nice to have”, so should not be a priority given many residents’ financial situations (because of COVID-19) and other more pressing issues that need to be addressed by Council.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

No

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I submit:
-That it is not important that the Council develops a Waste Minimisation Action Plan.
-That the price of kerbside rubbish bags not be increased. Disposing of rubbish is something that all households need to do, and increasing the price of bags will impact more on poor households than well off households. There are already incentives to recycle, because recycling is free whereas rubbish bags cost money. Increasing the price of rubbish bags makes it more likely people will put non-recyclable waste in their recycle bins because they cannot afford to – or do not want to – pay for more expensive rubbish bags.
-That wheely bins not be provided for rubbish and paid for by rates. The current system and pricing model is adequate.
-That food composting be encouraged, provided doing so does not cost much (if anything).
-That council printing be reduced, as proposed.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I submit:
-That an additional $400,000 not be allocated to investing in Council people and building on the Council's capability to deliver. This investment can take place in a future year when residents are not going through the worst recession since the Great Depression, and people can better afford the increased rates needed to pay for investments such as this.
-Following the lead of Central Government, that all salaries of council members/employees, whether elected or not, should be frozen for at least one year. Similarly, all highly paid Council staff should receive a pay cut of 20% for at least one year.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Rates affordability

I submit:
-That there should be no rates increases in 2020/21, except where increases are necessary to protect the health and safety of South Wairarapa residents. An example of an initiative that would be an acceptable reason for a rate increase is investing in infrastructure to ensure that the risk of storm water flooding is minimized or eliminated in Featherston (and any other areas with similar issues), because whenever it floods there is a significant risk to human health and safety posed by flood water entering homes.
-That any debt should only be taken on where absolutely necessary, because ultimately debt (and interest) will need to be repaid.

Extra maintenance for council-owned amenity buildings
-That work be undertaken to ensure council owned amenity buildings are safe and in a reasonable state of repair, but that no further money be invested in these buildings over and above this.

Upgrades to housing for seniors
-That work on seniors' housing proceed to ensure these units are up to the Government's Healthy Home Standards.

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Boar Bush Gully in Featherston could be used in times of water shortage - even if it means boiling for drinking.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Respondent skipped this question

Why is this?

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Respondent skipped this question

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8

No

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I STRONGLY DISAGREE with these proposals. Given the present circumstances, now is not the time to commit ratepayer's money to a new Sports facility. As a Featherston ratepayer, we are already paying for the ongoing maintenance of underutilized community facilities e.g. the Waihenga Centre & the Greytown Town Centre Forum. We do not & cannot afford any more White Elephants! In Featherston, the Sports Stadium could be upgraded with proper designated parking as it was in the past, utilizing the area on the west of the building - through the existing locked gate.
I would like to suggest that the Greytown Sports & Leisure Society & associates stop spending their money on propaganda in the press etc & instead use their funds to pay their rent! Surely the idea that the ratepayers of South Wairarapa should subsidize their facilities is ludicrous.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

Respondent skipped this question

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Q11

Respondent skipped this question

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I AGREE that we should do more to encourage walking & cycling BUT I think the rural roads should have the speed limits reduced accordingly. As witnessed in Underhill Rd Featherston, over the past two months, the 100kph is far to fast for families out cycling or walking, with or without dogs.This is a Health & Safety issue & should be attended to ASAP

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I would like to see a Public Compost area at the Transfer Stations to encourage food composting for people who don't need the compost but making it available to others who do - for a small fee.
We do NOT need another PLASTIC Wheelie Bin & neither should the price of the rubbish bags be increased. Some people would dump their rubbish illegally rather than pay more.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Given these uncertain times, now is NOT the time to invest in new facilities for Council. Times are certain to get tougher over the next few years so I think it would be prudent to wait for the economy to improve before committing to these improvements.

Respondent skipped this question

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Sports and recreation: I have already submitted separately on the proposal to buy the Greytown Rugby and Bowling Club land. Don’t do it, unless you can get the land at a heavily discounted price, say 25% of valuation. Tell the Trust Lands Trust to accept less income than it would have liked.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

The section about walking and cycling speaks of ‘encouraging people to ditch their cars’. They will do this only if they see their community leaders, the Mayor and Councillors, doing the same. Lead by example! It will cost you nothing, and will be (to quote) ‘good for the environment and beneficial to your health and wellbeing’.

Also, tracks and trails are fine for recreation, but if we’re serious about transport we need much more walking and biking for ordinary road travel within and between our towns. Therefore, apply lower speed limits and work with NZTA to eliminate life-threatening spots on our highways such as the narrow Mangatarere bridge on SH2, where motorised traffic speeds through at 100 km/h, inches away from cyclists who are trying to follow the advice in Section 3 of your plan.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Charging more for rubbish bags will have little effect on reducing waste to landfill unless the increase is substantial, for example to $10 or $20 per bag. However, this would only lead to more illegal dumping. The answers are reduction and re-use.

Yes, encourage food composting; indeed require it. To send food waste to landfill is wasteful, uncivilised and environmentally insensitive. Surely most thinking residents abandoned the practice long ago. It remains only to educate the few who cling to it.

A question under Discussion Topic 4 asks, ‘Is it important for Council to develop a Waste Minimisation Action Plan?’ The implication that Council has no such plan horrifies me. We need it urgently.

Also, we must abandon the idea that recycling will solve our waste problem. Recycling has been in place since the 1970s and clearly does not work. It’s a 1970s solution to a 2020 problem. Recycling should be our last resort. Much of the material that we put in recycling bins ends up in landfill anyway because there is no market for it.

The answers must be reduction and re-use. Council may have been working with supermarket proprietors and other retailers to reduce plastic packaging, but it keeps the negotiations secret. This should be public information.

Just as Council exhorts us to save water in summer, all year round it should remind us of the need to reduce waste to landfill. Landfill levies must be much higher, placing a significant burden on ratepayers. That will be an incentive to reduce waste

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Respondent skipped this question

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Housing for seniors: Build more community housing. Borrow the money. In Greytown at least, we have the land. We must provide more housing that is affordable, not only for seniors but also for the many other people who need it. Our immediate goal should be to double the amount of community housing in each town.

Resource management: No mention is made of a population policy for South Wairarapa. If we do not control population inflow, we'll become a jungle of highways, megastores and shopping malls like the Kapiti coast. This is creeping up on us now and it is impossible to reverse. Put the population policy in place urgently!

Transfer stations to have longer opening hours.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Employ qualified staff and spend less on consultants. Combine more services with Carterton.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

The Greytown Bowling and Rugby Club land would be better as residential land. The money the Council would get from the Developer from a subdivision could go towards the Sports Hub. There is a lack of parking at both these venues. If a Sports Hub was developed at the Rugby grounds more space would be needed for more parking. Cut out community grants. Not what ratepayers money is for.

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Rate payers seek assurance about our water supply. Our existing population already faces significant water restrictions. There is concern that increasing subdivisions/developments will erode our ability to meet household needs. Some suggestions in this context:
a) Do we need further storage ponds?
b) Do we need a moratorium on further subdivisions, unless, and until we can make more water available?
c) Should we be allocated charge neutral smart meters?
d) Agreement that we should be focusing on water conservation and reduction in usage.
e) General agreement that water and sewerage are two of our biggest issues

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Rugby Club land

Q11

Why is this?

Greytown has many attributes but for teenagers there is a lack of amenities. The town is growing and with a larger teenage population we have to plan for their needs. Teenagers need more out of school activities. There is a general belief that Greytown has been funded significantly less than other Wards for clubs and leisure activities, and that at present young people have to be bussed to other Wards for sports. The town needs capital expenditure to be used for youth activities. Such facilities need to be easily accessed by all and centrally located. In this context:
a) Greytown supports the development of a Sports Hub involving the Rugby Club grounds and Kuranui College. At present Greytown has only an outdoor pool and outdoor sports facilities. There is a need for indoor facilities.
b) Strong support exists to include a wheels park as a component of this sports development.
c) Are all developers adequately supporting recreational costs?
d) Young people wish to be consulted in any future developments, to avoid Council spending in areas that they do not value or wish to use. They would like more social activities to make the town more inclusive, and more places to congregate and have fun.
e) Greytown is perceived as a town for retired people, but there has been a growth in families moving to Greytown and facilities for families are lacking.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Greytown, through its Community Board (GCB), has requested funding for new footpaths in the town in the last 4 annual/long term plan processes. This work remains to be completed.
The following areas are close to schools and preschools, have traffic at speed, lots of walkers, and broken footpaths.
Should funding be available we support the following:-
a) Continue footpath from Greytown School gates to the end of Reading Street and then to the road junction on East Street.
b) North Street (southern side) footpath between West and East Street
c) Footpaths, curb and channelling to be completed along East Street, North of the school
d) Provide a safe zone from Tararua Junction to the cemetery for walkers and cyclists.
e) Footpaths needed on the Western side of Udy Street
f) Wood Street, curbing on the corner of Kempton and Wood Street, and footpath (from Kempton Street to the new development on 33-44 Wood Street)
g) Continue the footpaths from Humphries Street to Garrity and Elmstead lanes
h) Repair of broken footpaths

Page 8: Discussion Topic 4: Waste Minimisation

Q13 **Respondent skipped this question**

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Q14

Respondent skipped this question

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

a) Ratepayers are conscious of the need to reduce waste, recycle and reuse but there is an enormous task ahead for the waste minimisation officer. This needs to be a priority. Waste management means the reduction of waste not just recycling. The Council's goal should be to eliminate single use plastics from our district.
b) Young people feel that supermarkets should be packing in paper, not plastic. We should discuss with supermarkets and encourage them to minimise packaging waste and move to eliminate single use plastics from the district.
c) Supermarkets to stop double packaging.
d) Better e-waste logistics.
e) SWDC also needs to accept e-waste at all three transfer stations.
f) The SWDC website requires better information on all aspects of waste, including hazardous waste.

Page 9: Discussion Topic 5: Building Capability

Q16

Respondent skipped this question

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

g) Papawai sewerage ponds require attention, as the smell is becoming an issue. The Marae is a heritage building but visitors to the Marae are accosted by the smell from the sewerage ponds.
h) Do we need to consider small sewerage ponds (management systems) as new developments are planned?
There is a general belief amongst ratepayers that little has been spent on amenities in Greytown. We urgently require:-
a) The repair and replacement where necessary of the spectator stands at Greytown pool.
b) The repair and painting of both male and female changing rooms at the swimming pool.
c) If feasible, GCB also supports extending the fence on the eastern boundary in long run and replacing the old wooden fence.
d) A continued annual maintenance programme for our key assets (buildings, parks, cemetery, reserves) and regular maintenance of our trees and parks.
Water Races
a) To continue and increase checks on water races in public places and parks.
b) To provide information/printed brochure about water races and the responsibilities of new owners. To also consider a reminder in upcoming rates newsletter regarding water race responsibilities.
c) To consider working with estate companies for the distribution of any brochures
5. Community Based Emergency Response/WREMO-CD
a) Greytown is growing and the risk types and probability levels are also increasing, e.g. serious fire, drought, flood and earthquake. Resources to enable continuing and adequate public outreach and awareness building need to be ensured. Information about the Community Emergency Hub and its function needs to be clarified across the wider community.
b) As part of the community response preparation, Greytown must be assured of a fully functioning Neighbourhood Support capability, with adequate resources to fulfil an important brief, which supports cohesion, information collection and information dissemination. This also links into Community connectedness and identification of issues.
6. Strengthening Ties with Maori
We support all initiatives to strengthen our relationship with the Maori Standing Committee and our local iwi.
We would like funding to develop a Papawai Marae website as this is one of the most historical Maori sites in New Zealand and this links well with the LTP of supporting tourism in the Wairarapa.
5. Community Based Emergency Response/WREMO-CD

We would like funding to develop a Papawai Marae website as this is one of the most historical Maori sites in New Zealand and this links well with the LTP of supporting tourism in the Wairarapa.
Transport
Young people have stated a genuine need for a shuttle between Greytown, Featherston and Bidwells' Cutting and then on to Martinborough. Transport needs to be available after 6 pm, as currently they are reliant on parents or their own cars to get them home (Not all young people own their own cars, or have parents with cars, and many older people do not have transport and are isolated).
a) A shuttle would help change behaviour of young people away from private car in favour of public transport.
b) Better transport means more work opportunities.
c) More information is requested on bus and rail services.
d) Rail service frequency needs to be increased.
e) We need to foster relationships with the Regional Council about these issues.
Community Cohesiveness
a) Isolation of seniors and people in rural and urban areas needs to be better understood. We need plans around mental wellbeing for all.

b) The young are isolated and isolation causes depression, and a council wellbeing policy is needed.
c) We need indoor facilities to bring communities together, and to become more inclusive.
Speed Limits and Safety
We support SWDC ongoing review of speed limits across the district.
IT Networks
We would support cooperation between SWDC and Carterton to develop a business hub.
IT Networks
We would support cooperation between SWDC and Carterton to develop a business hub.

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Do you agree that the water supply should be Council's main focus next year? The question does not indicate any cost and so a yes no answer is a bit simplistic.
YES but... see comment below

Do you think it's important for Council to develop a Water Conservation Action Plan?
YES and should be a community council joint effort which may include good ideas not listed.

Do you support any of the proposed water resilience actions:
1. Reducing the water allowance per property - hard to comment without knowing the impact, I think it should be assessed and information presented to Council for a decision based on cost benefit and issues
2. Removing the Water by Meter Write-off Policy - hard to comment, what is the expected impact of this?
3. Offering subsidized water tanks, at cost, paid back over a period of time - if the council are acquiring the tanks at cost what is the 'subsidy'? If it is simply the cost of being paid back over time then I would expect this to be insignificant - what exactly is the expected cost?
4. Requiring new builds to have their own water storage solution
YES... but understood this cannot be done until the District Plan is re-written (email from Mayor) and so I would expect that this is part of District Plan changes consultation? What does the Council expect to do with the response to this question?
5. Installing smart meters to monitor water consumption and leaks - what is the cost/benefit of this? Cant comment until I know the numbers.
5. Do you have any other comments you would like to make on the actions proposed above or have other ideas for the Action Plan? Include smart interested members of the community to develop ideas.

Additional comments:
a. In Nov 2019 Council approved the $500,000 for urgent water repairs as an exception to the usual consultation. This plan states that the cost of $5 million has not been budgeted in the LTP and therefore is this consultation document asking for comments on the $5 million expenditure? If so, why is there no detail on how the $5 million will be allocated across the work plan, some of which may already have been completed within the current budget, and what variance has been allowed for? Was $2.600 million previously approved for the manganese plant, or is this included in the $5 million number. Very skimpy financials for a significant work plan.

b. Improving waste water has a cost of $1 million but does not say how this is being funded and if it only funds the resource process, the work plan notes 'delivering improvements'. Can the Council not "progress" a resource consent for less than $1 million or does the $1 million buy more than the resource process?

c. Just surprised that the water race strategy will take three years.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

NO... because
We don't actually know if the additional people visited during the extended hours, that would be a more useful number. The additional people could have been during regular hours as all we are told is the total number of visits.
It would appear that the additional cost is $36 per person (I think.. 22515-21747 = 768. $28,000 / 768 = $36) if all the additional visits happened during the extended hours, or a higher number if they visited at other scheduled times. On that basis I'd say do not do it again, the regular hours are sufficient, but I'd be happier making a decision based on the additional use figures and the cost per visit overall.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Respondent skipped this question

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Do you think that the Council should provide more space for sports and recreation in Greytown?
Not at this time

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4)?
NO
Why is this?
Work needs to be completed on how appropriate it is for the Greytown Trust to sell the land if Greytown is in need of recreation space.
Further work required on options and sense of being put under pressure when alternatives are not addressed.
Not the right time and not clear why so much pressure from the Trust to take over the land at commercial rates and if the people of Greytown really want the Trust to sell their recreation land.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Respondent skipped this question

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

What do you think about Council's proposals for land transport (page 5)?
In May 2019 Council said of the new strategic joint roading contract: "The joint approach came after a review in 2018 from an outside consultant showed a collaborative approach would deliver a more efficient and cost-effective service."
Someone at Council was confident that the contract they had negotiated would result in cost savings, and/or improved service!
a. Why then, less than a year later, did 20% less maintenance get completed in the year, and a further $600k over the $2.1 million already funded is required for the future year?
b. Was this an error in the negotiation process or lack of Council oversight of completion of the work plan?
c. What attempts have been made to get better value for money from the contract as expected in May 2019 and is funding an additional $600,000 just an easy way of "managing" the relationship which has not delivered efficiency or cost savings?
Until these questions are answered how can we have confidence that this is money well spent and we should approve more?

Should we be doing more to promote walking and cycling in the district?
Of course any promotion of walking/not driving is good and I believe is part of your climate change strategy already? To what additional promotion does this question relate? I would not allocate any additional budget for promotion. Happy funds already already committed to tracks and trails.

Footpath - How can we see what value was achieved for the additional $375,000 allocated last year - all the information given shows is the overall work plan and no targets or indication of additional benefit or if all the allocated funds were used. Sweeping leaves seems to be a maintenance activity not an extension of footpaths so question how money was used without a breakdown.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Respondent skipped this question

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Q14

Respondent skipped this question

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Do you think it is important for Council to develop a Waste Minimization Action Plan?
YES but...There is no information on the current Council spend and achievements on waste minimization but Council have had staff on board for a while and developed some community zero waste programmes. The role of the zero waste co-ordinator is to develop strategies for waste minimization, now with a supporting climate change coordinator. Councillors spend time year after year attending regional waste minimization meetings.
The question should be why isn't this happening as just business as usual and a strategy or plan already been done? Just what activities have those Councillors influenced?

Do you support any of the waste minimization ideas proposed (as detailed on Page 6)?
There are community groups very interested in this issue, why not develop and implement strategies together?

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags F Providing a wheelie bin for general rubbish, paid for through rates
These two things seem contradictory - charging more for bags to encourage less waste and giving bigger waste bins free? The current recycling seems very limited and since the new bins have been implemented more waste has been created, maybe this could be addressed.

Reducing the availability of Council agendas and papers at meetings
Instead of documenting that Council print 20,000 pages for Council meetings and 'propose' it stops, why not just stop it immediately? If Councillors want a hard copy they can print it at home as I have to do if I chose to not read online. This is a no brainer on so many levels. Just do it!

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

The level of funding is very high and should be significantly reduced. This is a difficult economic time and effort should be in saving costs, not adding costs.
It is hard to comments as it is not clear what the money is going to be spent on.
Very vague question is not easy to answer or comment.

Respondent skipped this question

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Here are my views on water-related issues.
• Work relating to water supply and safety should proceed. Ensuring water is safe to drink is vital.
• The current household water allowance should not be reduced.
• The current Water by Meter Write-off Policy should not need to be revised or removed.
• New residential buildings should not have to include their own water storage solutions. Economically, this is not a good time to increase costs for new houses.
• Economically, this is not a good time to purchase and install smart meters. Even if the economic outlook looked more promising, I don't believe this is a pressing need.
• Automation of the equipment and operations of the wastewater treatment plants is not a necessity and should not be given priority.
• Some priority should be given to addressing storm water hotspots in Featherston. Heavy rain in Featherston regularly causes flooding.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Extended swimming pool hours allows more residents to use the pool and should continue.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I agree increased funding for road network maintenance and renewal should be allocated, as proposed in the plan.

Footpath maintenance is important for safety reasons but extending footpaths or providing additional cycle ways should be postponed for a later time

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Respondent skipped this question

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Respondent skipped this question

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

I do not believe that the Council must develop a Waste Minimisation Action Plan right now.

I do not believe increasing the price of kerbside rubbish bags can be justified. In times of economic uncertainty it would be a mistake to increase council charges for anything.

There are existing incentives to recycle because it is free whereas rubbish bags cost. Existing costs are low. Why spend ratepayers' money on unnecessary bins?

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I submit:
• That an additional $400,000 not be allocated to investing in Council people and building on the Council's capability to deliver. This investment can take place in a future year when residents are not going through the worst recession since the Great Depression, and people can better afford the increased rates needed to pay for investments such as this.
• Following the lead of Central Government, that all salaries of council members/employees, whether elected or not, should be frozen for at least one year. Similarly, all highly paid Council staff should receive a pay cut of 20% for at least one year.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Concerning buildings:
Council-owned buildings maintenance should continue as usual to ensure the buildings are safe and up to standard,
but this is not the right time (same economic reasons as above) to further invest in these buildings.

Rates affordability
I submit:
• Increased efficiency is desirable but not where it involves increased expenditure in such a time of economic uncertainty.
• There should be no rates increases in 2020/21.
• Debt should be minimised. There is no telling how long it will take for the economy to recover.
• Too many local authorities are burdening future generations with debt must be repaid. Interest payments
should be kept to a minimum until an economic climate that permits wise investment for future community benefits obviously arrives.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Reduce water allowance to 300c/m not 250c/m.
What size would new build tanks be?
What are the cost of meters? Currently bad timing.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Continued communication with Swimming Club is paramount.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Respondent skipped this question

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

More "sports space" is a leading question which needs to have much added to be answered.
Contribution to Kuranui College is something that affects many Featherston youth.
Rugby and Bowling Clubs need to be funded by Greytown.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Absolutely. This is an area that Featherston groups are already promoting and are passionate about.
Whose responsibility would it be to maintain tracks and cycleways?

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Providing wheelie bins possibly a good idea but bad timing.
Food composting - what is involved, where would it be and who would maintain it?

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

SWDC procedures such as building consents need to be dealt with inhouse, not outsourced.
Improvement and capability of services is a necessity but will come at a cost. How will this be managed?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

FCB needs to have more immediate input and decision power when making decisions impacting our community without having to first consult Council.
Traffic speed when approaching and while travelling through Featherston needs immediate attention especially around speed reductions and signage for both speeds and pedestrian crossings.

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I am totally opposed to this section of the plan as it is currently proposed and would submit that it should be withdrawn so that further and more detailed work can be undertaken, and broad community consensus can be achieved.

I would submit that the proposal as presented is not one single proposal but in fact three projects;
1. A funding contribution to a new gymnasium at Kuranui College that would have community use outside normal school use
2. The development of a sports and recreation hub on the sports fields current utilised by the Greytown Rugby Club.
3. The purchase of land currently occupied by the Greytown Bowling Club and leasing it back to them.

The proposal as outlined does not constitute a 'hub' as they are on three separate sites along East Street. The original proposal as I understand it was in fact a 'hub' (except for Bowling Club) being the Kuranui Gymnasium and playing fields adjacent and relocation of Rugby Club. I understand that this opportunity has now gone and hence the presentation of the revised proposal.

I believe that this approach is flawed and should be further evaluated to and the disadvantages and risks identified on page 27 of the supporting document should be investigated in more detail and quantified.

Disadvantages and risks
The accompanying report that supports the proposal lists 5 key risks and disadvantages but provides no detailed analysis or weighting to the risks, a process I would submit is critical for good and robust decision making.

However the risks identified have one glaring omission and that is; what will the impact be of the Covid 19 pandemic. The world has changed in a period of just a few months and we do not have a full understanding of the impact on New Zealand and our own communities in the South Wairarapa including Greytown. It is not business as usual I am very surprised that the SWDC has given no recognition to this in their accompanying officer report. We have little idea of what the broader and ongoing impacts of the pandemic will on our community. This is the time for Councils and organisations such as the Greytown Trust Lands Trust to take a cautious approach and maybe reset some of their expectations and spend time on working collegially through all of their strategies and proposed actions and their likely impacts, including financial. across our communities.

I support the concept of a sports hub on the current rugby club grounds, but I do not believe the project has been fully tested and a viable business case developed. Bringing together a number of sports and recreation activities on a site with shared facilities and with a single management structure makes good sense. I note that many clubs and sports are seeing this as the way forward in the post Covid environment. As part of this process a robust feasibility study (partly undertaken for earlier project) with accompanying business plan that will convince funders and the community that the project is viable long-term should be completed.

I support the concept of a new gymnasium at Kuranui College that can be shared by other community groups when the facility is not needed by the College. I have always been a supporter of shared community and education facilities where it possible. This is highlighted more so in small communities where there are limited resources available. The amount and financial contribution by the community and how it is sourced is the issue.

I do not support the purchase of the current bowling club land and leasing it back to the club. The club is reported to have less than 50 members, and this would be an extravagant purchase to be used by so few. Bowls as a sport has been in decline for many years and clubs are amalgamating or winding up and often assets are redirected into amalgamated facilities. Many clubs are now constructing all weather greens that give them greater utilisation and can be used all year (weather permitting) . This is demonstrated quite clearly in the WTA article of 22 May 2020 which reports how the Carterton and South End Bowling Clubs merged to form the Carrington Bowling and Croquet Club and is a now laying an all-weather (Tiger Weave) surface. The article also states that a similar all-weather green has been installed at Queen Elizabeth Park in Masterton where the Lansdown and Masterton Bowling Clubs share the green.

It would make more sense to develop a new all-weather green of eight rinks at the proposed sports hub and share some of the facilities. I would submit that there is more likelihood of the bowls surviving as a sporting activity in Greytown as part of a hub. Alternatively the

Bowling Club should be encouraged to revisit the potential of sharing a facility at The Orchards Retirement Village.

Reserve funds
I understand that there is currently just over $1m in the Reserves Fund. I am not sure if this has been collected from Greytown developments alone or covers the whole of SWDC. I also understand that Reserves Funds can only be used for reserves/recreation projects from the area they are collected. I also note that there is forecasted revenue from The Orchards, Retirement Village development which is spread over the development period of the project. I'm not convinced that borrowing against future reserves fund contributions from developers is a sound strategy. How can we predict future developments and what if there is a major downturn in subdivisions and developments in Greytown as a consequence of the current crisis and this revenue is never realised? What about future community recreation needs, and the cupboard is bare having been locked in to service the loan. I would submit there needs to be a more serious discussion on this option.

Greytown Trust Lands Trust
can understand where the GTLT is coming from although I do not necessarily agree with all their strategies and how they have gone about their endeavours to achieve what they regard is a more equitable return on their investments and a fairer distribution to the community through grants etc. The Trust has been around for 150 plus years and it cannot ignore the past and the implications of its actions on existing long-established organisations that form an integral part of the 'fabric' of the Greytown Community. While this current project is about two sports club sites I understand two further community organisations will be impacted next year.

I would urge the GTLT to hit the 'pause button' and put a moratorium on their strategy to extract commercial rents from the organisations impacted for say a period of two or three years. This would enable a broader community dialogue to be undertaken to review the broader aspirations and Greytown community needs (including those espoused in the SWDC Annual Plan). Through this process hopefully the Trust's own expectations (or in part) can be achieved. The GTLT does not sit alone and is a major player in the town and must work collegially to achieve not only its aspirations but those of the broader community.

A moratorium would be very little impact on the Trusts income streams taken in the context of its long history and future going forward. I would submit its times to reach out and to engage more meaningfully and hopefully for the Greytown community to achieve a better understanding the GTLTs role and how we all might get on the 'same page'. I know the Trust believes that it has been engaging with the community but its clear the message hasn't got through when we look at the current debate. We all want what's best for Greytown and having the community divided is not helpful. I know that in the early 2000s there was a great divide over the Town Hall/Town Centre redevelopment, and it is hoped that we can avoid such divisions if we work together.

I support the general thrust of the balance of the Annual Plan and support all efforts to upgrade water and waste management/sewerage projects. These are high priority for the well-being of our wider community.

I trust my submission is helpful and I would appreciate the opportunity to speak to it if that opportunity is offered.

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Martinborough Community Board agree and support that water supply for Martinborough be a main Council focus with the progression of the manganese plant in Martinborough and the search for an alternative bore closer to the town's tanks.

Martinborough Community Board want Council to develop both a Water Conservation Plan in conjunction with a Water Capture and Storage Plan rather than these being looked at as exclusive of each other.

Along with subsidised water tanks for residents and ratepayers and requiring water storage for new builds, Martinborough Community Board support Council to take leadership with water conservation by promptly repairing all notified leaks.

Martinborough Community Board strongly suggest Council investigate water catchment on the roofs of all Council buildings to start. This would include the Pain Estate and help to reduce its reliance on town water supply.

This first step taken by Council will ensure the availability of emergency water supplies at all Council buildings.

Martinborough Community Board do not believe that this is the time to remove or revise any policies which support ratepayers suffering from real, genuine hardship.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

MCB support Councils contribution to Kuranui College's gymnasium replacement which will benefit all students who are from the South Wairarapa

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Martinborough Community Board still look forward to seeing a completed footpath on Esther Street by the end of 2020.

Martinborough Community Board want Council to keep their focus on roading maintenance and footpath maintenance. In particular, rural road grading maintenance and metalling to be completed promptly whenever it is notified, and required, over and above any programmed works. This is more important now with everyone being told to travel and discover our own country and knowing without a doubt that we have the finest piece of it!

People are more likely to be driving and walking if they have well maintained roads and footpaths that are safe and accessible.

There are additional costs this year to maintain our rural forestry blocks including requirements to replace trees under the Emissions Trading Scheme (ETS). Martinborough Community Board feel that funds for replacing trees under the ETS should have been set aside when the trees were felled by Council or the Organisations who benefitted, therefore the burden of replacing those trees should not be on ratepayers in this term. As an alternative Martinborough Community Board would like funding to be sought from other alternatives, such as the 'One Billion Trees Scheme to replant these areas.

Martinborough Community Board support SWDC in allocating $50k for maintaining our urban trees and planting new ones. Martinborough Community Board would like Council to spend money on buying new trees and utilising volunteers/Community Groups to plant them, rather than Contractors so that our Council gets greater value for the $50k.

Martinborough Community Board would like to work with Council and the Martinborough Business Association to lobby NZ Transport Agency to progress replacement of the Waihenga Bridge/SH53 which was built in 1912, as each time the Ruamahunga River reaches 4.5 metres in level, the bridge is closed to traffic which economically affects Martinborough Businesses and Community.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Respondent skipped this question

Providing recycling station in urban areas

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Martinborough Community Board support Councils Waste Minimisation Plan as long as its development includes discussion with the MCB so we can ensure information goes to our community.

Martinborough Community Board strongly support providing recycling stations in urban areas.

Martinborough Community Board do not support a wheelie bin for general rubbish (which promotes not recycling) but would support higher costs for a biodegradable Council rubbish bag.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Martinborough Community Board believe that Council, as an employer, should be actively investing and upskilling their staff to keep them up to date with relevant policy and applicable legislation relevant to their jobs. Council should be looking to have the best staff possible to support our residents and ratepayers.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Community Housing
Martinborough Community Board would like Council to look at cost savings in their proposed purchases and expenditure in Greytown by the amounts that would enable Council to upgrade all the Senior Housing in the 3 South Wairarapa towns, which Council is already responsible for. As seen with the Pain Estate, the longer investment is not made, requires more funds to be spent in the future. This would future proof the Community Housing for many more years to come and not require a rates increase.

Considine Park
We request that Council continues to allocate funds to implement the Considine Park Development Plan and that those funds are spent according to priorities set by the Considine Park Committee. We are pleased to note that Council has provided access to the pool toilets for park users.

Beautification Fund
We request that SWDC continue to allocate funds for town beautification to be managed by the respective Community Boards.

Martinborough Community Board seek Council's support with NZTA to erect a "Nau mai Haere mai ki Waihenga, Welcome to Martinborough" sign like our other towns, with final decision on wording to be agreed between Martinborough Community Board, Māori Standing Committee and Council.

Pain Farm
Martinborough Community Board seek Council to approve the release of up to $100K for repairs and maintenance on the Pain Farm Estate.

Restorative Justice for our waterways
Martinborough Community Board seek Council's support for the following from Wellington Water as restorative justice:
The gifting of 150 trees to be planted on the Pain Farm by the children of Martinborough as recognition of 150 years of settlement at Wharekaka/Waihinga with Council to investigate the best site/s for planting.

That Wellington Water undertake riparian planting along the Ruamahanga with locations to be agreed in liaison with the Māori Standing Committee and affected landowners.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Respondent skipped this question

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Go back to having a charge - user pays!

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Unless the Trust donates this land which I feel is should do; or at least make a contribution (i.e. doesn't support if Trust donates land)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes to more walking and cycling, dedicated cycling tracks

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Do more to remove non-recyclable plastic from stores and encourage businesses to switch to other products.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

streamlining services yes, five permits crossing five desks before approval not efficient use of time

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Very much support the waste minimisation plan. More businesses need to take responsibility for the waste they generate. packaging is where it all starts, the consumer should not have to be the one to deal with the crazy amount of non-recyclable materials coming out of stores and businesses in New Zealand e.g. polystyrene

Reducing the water allowance per property,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Would be interested to know what my consumption is. Have tried to be frugal with the resource.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Can see no reason for them being free though. Perhaps very small charge would be useful.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Partial

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Respondent skipped this question

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

Q11

Why is this?

So long as the gym is a full size amenity it will supplement what Featherston has, as well as Martinborough. Rugby & Bowling Club may need to amalgamate to survive. The facilities at Featherston are superior anyway.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Continue maintenance of existing roads. Seal portion (north) of Johnston St where it passes swimming pool. Saves all the dust settling in pool. New builds will see increased traffic.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Respondent skipped this question

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Any increase will see more fly dumping - which means we all pay in the end as SWDC will need to remove it.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Need to be consistent as well as sympathetic to their users needs. Bend the rules to make things work to benefit the whole SW area.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

SWDC need to look 50-100 years ahead. Structures and services need to be in place, ready and waiting for the projected growth in housing. Another rail station south of Featherston could service population growth so long as land is not used to spray effluent on!

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Private landfills and burning holes, especially in rural areas, seem to be quite common in NZ and also in the South Wairarapa. I'm wondering if it is widely ignored that leakage from those spots (being washed down by rainwater) does eventually end up in the ground water (if not in streams, rivers and lakes). Toxic compounds include dioxins and heavy metals. Toxins that don't end up in water, burden the soil or are released in to the atmosphere coming back down with rainfall. Leakage into groundwater also applies for the toxic remainders of tanalised timber, to point out: arsenic and chromium-bearing compounds. Other less harmful wood preservatives need to be applied which are equally effective and already standard elsewhere in the world (e.g. EU).

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Contribution to the Kuranui College gymnasium replacement

,

Purchase of the Rugby Club land

Q11

Why is this?

I support public funding for Kuranui College and Rugby Club facilities because socially widely demanded sports can be offered at those facilities.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Agree

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Supports moving to a more user pays model (no rubbish bags).
Supports wheelie bins but not paid for by rates.
Council needs to make sure that burning rubbish is not an acceptable option for individuals/businesses to reduce disposal costs or for CCouncil to turn a blind eye because it reduces land fill volume. Burning untreated dry wood is a different story.
Wheelie bins for rubbish/recycling only: no bags, no rodents.
User pay models common in many German towns.
Suggestion: Small rubbish bin (120l) and/or large one (240L); purchase by users. User pays per pick-up. User decides weekly if bin needs to be emptied or not and puts at roadside accordingly.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Council building/s should be safe and up to standard but don't need to be extra flash. They need to be functional and in a condition/with amenities people like working at. I'm happy with the services. As long as processes are kept simple and close to people's needs they don't need to be highly technical and cost-intensive.

Page 10: Other Feedback

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property,

Removing the Water by Meter Write-off Policy,

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Council to make sure the existing infrastructure is kept in good condition. Re water allowance, could be reduced by 50 cubic metres, shouldn't be any hardship

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Health wise beneficial for young and old

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

Yes

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

In my opinion we must go forward for the future as the population increases these amenities will be of service for the next generations

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

As regarding urban trees planting, I am in favour of the smaller trees being planted, keep the roads in good order and extend the sealing programme as much as possible. This will improve walking and cycling.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

If Council provides wheelie bins for general rubbish it wont be necessary to have rubbish bags, this may reduce the plastic rubbish as for rubbish paper this could be composted

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

With the future population growth, I say go ahead with the proposal

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I think all in all the annual plan is good, I realise that to accomplish the overall plan, it will cost dollars, this will no doubt have some affect on ratepayers, but we must go forward.

As a golf player of many years I would hope that the club will remain, and improve in the future, a most important asset. Also it has a valuable water supply, of which may be of use in the future.

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Featherston is but 10 minutes away and already has the land and buildings which could be added to, moved etc. A bowling club that's on land that they own, plus buildings etc with room to expand, therefore saving the Council and ratepayers a lot of money.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

A place where they can recycle items like electric stoves, fridges and washing machines.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

All good but Council needs to get its act together when it comes to resource consent, new house builds, house extensions, house developments etc. Not so much red tape, so the town can progress - after all, that what we would all like and desire.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Permanent repair or replacement of water and sewer pipes. These leak repeatedly in Weld Street. Infrastructure first.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

Would be good but we think the money is best spent elsewhere.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Again, money best spent elsewhere. Why does the community have to pay for something it already owns? Please keep expenditure down and hence avoid rates increase.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Respondent skipped this question

Q11

Why is this?

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

We don't want more footpaths.
We like the Spatial Plan. Also like the urban tree (including fruit trees) planting and maintenance.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Paying more for a rubbish bag might encourage recycling. Dumping everything is a wheelie bin might lead to 'out of sight - out of mind'.
Keep pushing 'Refuse, reuse, recycle'.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Do you need more office space now that many of us have got used to working from home?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Well done. We think its important to keep expenditure down but to get the essentials done - i.e. infrastructure and water.
Can there be a campaign to discourage people from throwing rubbish from cars on our rural roads?
Please give us dog owners access to the dog park from Ferry Rd after rain. I've mentioned this before and had no reply from the Council employer responsible.

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Some Homestay - B&B's rubbish not in correct bin. They just put in yellow bag. Animals rip open and some rubbish ends up my end of town.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

I Don't (?)

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I have given Annual Plan 2020/21, a lot of thought and study, It is just like the other statements the office (Mayor and CEO put out, very misleading and leaning one wat, short on truth of the fact. example, "Rates cut to 2.54%, please give the people the true figure per rural, urban, businesses ETC").
I was taught all loans must be repaid by some person or body so this would alter the rate increase to 13-15%, trust cost, not the lowest of all sections.
Question, I have, has all this plan etc. all ready been put in place, and the Council are asking us "the ratepayer" to rubber stamp it with just a few alterations. In the past I think this is what happens, as one gets a standard cycstyled letter in reply - thank you for taking time to reply -

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

At this time Greytown has plenty of housing development areas being established. Especially until infrastructure (water, sewer) catches up.
These sports/recreational facilities are vital to the overall health of our community.
We protest at the suggestion that the Rugby and Bowling sports areas should be lost to these activities. They should be kept and developed for the communities use.

Respondent skipped this question

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Although I realise that the Featherston wastewater and Martinborough water quality issues are paramount, the recreational issue in Greytown also needs to be addressed urgently in terms of land acquisition. It's also a shame we approach each summer with dread, knowing that we and our gardens are going to suffer. With 3 major rivers running through the region, isn't it possible to capture some of it for summer use?

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

The streets of M'boro are now littered with wheelie bins. Rubbish expands to fill the available receptacle. No more wheelie bins please

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

If the organization's capability needs improving then of course, spend money to do so, however the investment must provide measurable value for money.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Provision of water - continues and reliable - has to be the number one focus. An unbroken supply of electricity would be helpful too, but I don't suppose the Council can do much about that.

As for the rest, as long as you can demonstrate that value has been obtained for every dollar spent or invested, and none has been wasted, then I can accept your stewardship of my rates monies.

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I have a 12 year old who would like to play indoor soccer (futsal) and basketball and will be attending Kuranui College next year. I have a lung condition so I have to use the Community gym to clear my chest out and diabetes, so I need to exercise to keep my blood sugars down - I'm on a sickness benefit , so can't afford a commercial gym. I'm also interested in going to bowls, as I'm not well enough for rigorous sport.

Page 2: Discussion Topic 1: Water Supply and Water Resilience

Q1

Do you agree that the water supply should be Council's main focus next year?

Yes

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Waste Water (3 waters) is the Councils most pressing priority and will require most of the Councils Funding.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Respondent skipped this question

Why is this?

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

No

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8

No

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

It's not a priority for the Council due to all funding needed for 3 waters and insufficient investigations has taken place as to conditions in Deeds of Trust.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

Respondent skipped this question

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Q11

Respondent skipped this question

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Cycling and walking Tracks are purely recreational and I don't think enough consultation has been done with business re its benefits or otherwise.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Respondent skipped this question

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Respondent skipped this question

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

In the present economic times, with the largest recission in 100 years looming ratepayers cannot afford any increase in rates as suggested in 2, 3 and 5. none of these categories have extreme urgency, no 1 does. People cannot live without these 3 waters corrected immediately.

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

A clean water supply should be top priority followed by storage so that we no longer have water restrictions every year. Other countries manage this on less rainfall with higher population densities.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Q8

No

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Fixing Martinborough's water supply is essential. Buying Greytown's sport facilities may be desirable but not essential and we shouldn't borrow money to do this. The upgrade ($70k) should be done but a full size gymnasium is not essential. Martinborough raised $1m for their town hall will Greytown do the same?

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

Respondent skipped this question

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

I support that funding for road and footpath maintenance and extension. also walking and cycling trail investment, to encourage use of new/improved trails (for improved health) would benefit from a good marketing strategy.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Can we go back to paper rubbish bags. I think a previous Council switched to plastic purely because it was cheaper.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Can the Government's house building programme be incorporated into the proposal rezoning, to residential, of the Martinborough area. Are the identified costs included in the rise in rates?

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Is it not clear to me why the Greytown Trust Lands Trust wishes to sell the Rugby & Bowling Clubs. In a newspaper article they said they wouldn't give them away to the Council as it would be like giving away the family silver, which implies (to me) that they want to keep their assets.

Offering subsidised water tanks, at cost, paid back over a period of time

,

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

a. new builds should have solar panels on the roof.
b. most of the water leaks are in the distribution system. The simple solution is to add meters at strategic locations through out the distribution system and compare usage based on the number of properties supplied. The use of meters on each property is a waste of time and money.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Providing a wheelie bin for general rubbish - NO, pointless waste of time and money for everyone except for the pick up contractors

Food composting - yes, surely common sense

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Yes

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Build water storage fed from water from the Tararua Range, for the benefit of industrial, commercial and residential users.

Farmers already take their water from the underground water flows (again from the Tararua Range) and have it pumped to the surface.

Note that Mangahao Hydro power station was built about 100 years ago utilising the water from Mt Bruce. How come our representatives are so collectively ignorant that they dont know or dont wish to know (because of some strange ideology), and should have built the storage many years ago.

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Support.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I support the more expansive approach that SWDC is taking. Our potable water supplies are clearly neither safe nor resilient at present. Rates increases always generate a lot of angry noise from some ratepayers but we live in an increasingly risky world (eg. climate change) and local government must respond to this.

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Agree. But walking and cycling tracks must be built to LTA standards, unlike the cycle trail down Western Lake Rd.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Providing a wheelie bin for general rubbish, paid for through rates

,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Wheelie bins a good idea and in Featherston would need the catch on the lid. Bins get blown over now and cats rip open the bags on a windy day. I have to pick up rubbish from my driveway and front yard.

Q10

As you selected 'Partial' because you support funding for parts of the proposal, but not all, tick all the parts that you support

Purchase of the Rugby Club land,

Purchase of the Bowling Club land

Q11

Why is this?

Could do fundraising for the gymnasium. We must keep our greenspaces.

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Yes, we all enjoyed the lack of cars over lockdown. With climate change, taking cars off the road is urgent, so more cycling is one option we should look at.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Advertising campaign on how to reduce rubbish.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Yes - must keep on top of things or will cost more in future to catch up.

Requiring new builds to have their own water storage solution

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

It takes commonsense to not mend a pipe but replace it when leaking. this has happened 3 times in Featherston. You need to advise your contractors.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

No

Q6

Why is this?

Everyone that goes to any pools in Sth Wairarapa should pay a gold coin. I can't use them as there is no way of getting a person with leg issues in and out - no ramps.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7

Do you think that the Council should provide more space for sports and recreation in Greytown?

No

Q8

No

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

I will not support a sports hub at Kuranui, that is so stupid. Do you not realise it will be controlled by the College. Any hub that is paid for by Council funds should be called SWai Hub not Greytown. They can fundraise for their own like Featherston has to, to keep the buildings looking good.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

No, you need to keep on track with infrastructure problems that are getting worse in Featherston.

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

No

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Stop rural users dumping their bags on any street in town on Wednesdays, esp. on Sawmill Rd by Harrison & Boundary corner.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

The service is so slow when a building permit is applied for compared to other Councils. It is ridiculous the time it takes.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I would like to comment on the contractors that do the lawns and gardens and tidying up in Featherston. This needs looking in to. The corners of Lyon St & Brandon St, and Lyon St & William Benton block up and flood very often due to leaves and debris. The workers come along and shovel out the leaves and leave them up on the grass verge (how stupid, remove them totally, take them away) then a few hours later they are blocked again. How hard is it to use common sense to put all the leaves and debris on the back of a truck (Borough Council workers always removed it).

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Reducing the water allowance per property

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

1. Reduction of water allowance to 300 for next 3 - 5 years then reduce to 250 cubics by 2025.
2. Remove water by meter-writeoff policy, offer subsidised water tanks at cost and requiring new builds to have water storage starting 2025.

clearly defined water quality and quantity principles that drive policy, strategy and budgeting settings and influences behaviour and practices.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

Really do need more active approach to encourage and increase participation and use. Council leadership in terms of initiatives through summer period in partnership with swim clubs, sports groups and community event groups and organisations who come up with great events and activities. For example swim the Cook Strait Distance over summer at the pool.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Respondent skipped this question

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Really need National Road System attention to the Featherston- Masterton arterial route.
Increasingly high number of congestion periods that really need road changes (i.e. wider in places and ways to support flow, cycle and pedestrian ways not necessarily beside the arterial route.

Page 8: Discussion Topic 4: Waste Minimisation

Respondent skipped this question

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Not convinced the proposals so more than support the bias of the converted. I do wonder if shifting what we do is more likely to be sustained by incentivising rather than penalising. Surely we can move our headspace to look differently at what would incentivise a positive change.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Cannot support this without understanding due diligence completed for options and capital and operational costs; benefit analysis; need vs want; potential to partner and/or benefit from lessons of other councils of similar size and contextual challenges.

Q8

No

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Excessive expenditure. At this time will have an over all major increase in our rates. if you want a sports hub use Featherston Facilities. Kuranui Gym is a govt cost. No to the purchase of Rugby and Bowling Club in Greytown (better turned into sections and more rates).
The South Wairarapa already has enough sports facilities for our kids to use, without building a sports hub where cost will far exceed the outlined cost in the district plan.

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q10

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

No. Once you get your existing house in total order and functioning at an acceptable level then maybe you can revisit future schemes.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Infrastructure i.e. stormwater, sewerage, roading (footpaths) etc should be the councils main responsibility to its ratepayers, as we get older people will realise that the rates burden on all properties will be on overload, at the present time our monthly rates are our single biggest expense outside of food.

Q8

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Yes

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

The Board of Trustees asserts its support for the Council's Greytown Sports and Recreation Hub proposal referenced int he 20/21 Council AP Consultation Document.
Trustees confirm:
1. They believe the Council is obligated to take more responsibility for the ownership and provision of sports and recreation facilities in Greytown.
For almost 150 years the Trust has stood in the place of the council and its predecessors by making land available in Greytown for community sports and recreation activity at a cost to the Trust, despite this being for the first 100 years at least not a well-being purpose for which the Trust was set up. This contribution has enabled the Council to meet its statutory responsibility to provide land and facilities for community sports and recreational purposes without placing a corresponding financial burden on its ratepayers. This benefit has not been recognised by the Council.
Additional funding is now required to not only make up the existing shortfall in Councl provision but also to accommodate the anticipated greater demand for sports and recreation space and facilities driven by future population growth arising from the Council's approval of several large residential developments in Greytown. The need to increase the level of future provision has rightly been acknowledged by the Council in its proposal.
Even if the Trust had the financial resources to be able to fund the new investment needed, which it doesn't, Trustees do not see it as the role of the Trust to continue to help subsidise part of the cost of the Council meeting its obligation to the Greytown community, when this is not occurring elsewhere in South Wairarapa.
2. They support Council funding for the Greytown Sports and Recreation Hub proposal, encompassing a contribution to Kuranui College's gymnasium replacement and the purchase from the Trust of the Greytown Rugby Club and Greytown Bowling Club land.
This level of investment by the Council is needed to ensure grounds and facilities can be opened up to teh growing community at large and to a wider range of sports and recreation activities, including new and emerging activities, leading in turn to more efficient usage and enabling more co-ordinated and cost effective management by the Council of recreation and sports facilities within the Greytown district.
Additional Information
In lodging this submission Trustees wish to make reference to the financial support the Trust has given in recent times, as it has done throughout its existence, to the Council directly and indirectly for the benefit not just of Greytown ratepayers but the ratepayers of South Wairarapa too.
Examples include:
- A $500k contribution towards the cost of the Council's redevelopment of the Greytown Town Hall and library, which would otherwise have fallen on SWDC ratepayers to fund.
- Provision of annual bulk funding to Kuranui College, from which pupils and their ratepaying parents from all over South Wairarapa gain benefit (arguably in contravention of the Trust's Act).
- Significant on-going financial support for visitor attractions such as the Cobblestones Museum and the Greytown Rail Trail that contribute to the health of the South Wairarapa economy, from which all residents indirectly benefit.
Development of land that, in the form of receipt of develoment contributions, regulatory fees and additional rates revenue, has delivered direct financial benefit to the council and indirect benefit to the South Wairarapa economy by attracting new businesses and employment to the district.

The Trust's ability to continue to provide financial support of this nature, and indeed generally to the Greytown community in the future, will be significantly compromised if the Greytown Sports and Recreation Hub proposal is not adopted in the Council's 20/21 AP.

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Staffing should be streamlined towards unavoidable costs and staff numbers should be reduced. (P6 last para shows staff costs budgeted to increase 6%)

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Submission seeking a reduction in rates

This year Te Awaiti Station 6552ha of harder hill country leasing Ruamahanga Farm 106ha will pay $47,674 GST inc in annual rates to GW and SWDC and we are expected to pay more again next year. That is equivalent to two new farm jobs in the coming deflationary age. I rebel.

This is the highest expense on our farm balance sheet and will be 7% of our probable gross revenue next year. Can the District Council as an urgent OI Act question name a single business in Martinborough where rates exceed 1%-2% of gross revenue ?

I would ask that the District Council reduce the contribution to rates of remote ratepayers since the Court of Appeal following UK precedent in Electricorp v Mackenzie (1992) 3NZLR declared that to be valid the Council must consider the receipt of benefits by all ratepayers. For remote ratepayers our only benefit is our share of the roading network after all Central Government funding is deducted. Could the District Council please as an OI question calculate the ratio between rates received from remote ratepayers and their equitable share of the roading network ?

I submit that COVID 19 is the trigger leading to a World Deflationary Depression which was inevitable. It appears (p10 Key Dates) that the Consultation document was written during the COVID 19 Lockdown (p2 and p7), but the authors failed to understand the magnitude of the coming deflationary depression so that at 5% deflation a dollar tomorrow is worth 5% more than a dollar today ("so put it away under the mattress"). In such an economic environment (1) P7 Next years annual rates increase of 13-17% in reality is an increase of 18-7% (2) there can be no such thing as smoothing a rates increase through extra borrowing since debt is inherently expensive in a climate of 5% deflation since the burden of principal repayment is inherently more expensive in the future.

Since no one is prepared to venture any opinions over the coming times I will :
1 Deflationary depressions are cyclical (1730s...1780s....1830's....hungry eighties starting 1878....1930s starting with a commodity crash in 1923
2 They are disruptive so that credit and loan finance become unattractive
3 Cost plus wages and regulatory monopolies adjust by wage reductions or collapse
4 Since cash is king export earnings from real goods such as primary produce become essential
5 The NZ Reserve Bank knows this by allowing the $NZ to gently depreciate relative to the major currencies
6 Rising unemployment (predicted by the OECD at 30% but) 15% is more probable forces all business to become more productive as say 70% of the working population are forced to complete the work previously undertaken by 90% of the working population.
7 Depressions are times of increasing technological adaption. Thus the 1930's saw a quickening of business through the macadamised highway, motorised goods vans, domestic labour saving devises such as electric ovens and the business use of the telephone.
8 Level 4 COVID 19 Lockdown has pointed the way with remote desking, zoom conferences, reduced travel and reduced discretionary expenditure such as hospitality. [The Tuturumuri Community described all these phenomena in their submissions to MOE opposing closure, but were ignored)
9 Increased unemployment, zero immigration, zero tourism and Air b&b, fewer holiday houses and frugal living will reduce rental and occupation demand for housing (The "housing crisis" in Wellington and Auckland will have been fixed !)
10 I venture the view that house prices in Auckland and Wellington after 12 months and after major Government interventions such as the Wage Subsidy become unsustainable will drop 30%+
11 In part this will occur because families will decide to internally migrate from Auckland and Wellington to nearby country areas such as Martinborough and Masterton, where house prices will remain much the same.

Real rates allowing for deflation should be reduced.
Resource management and regulatory cost should be reduced.
Operational savings should be sought by greater integration and function sharing with the other Wairarapa Councils.

Rates should only be levied and not reduced where in terms of Mackenzie District Council v Electricorp CA they align with the receipt of benefits by each category of ratepayer

I with the support of others oppose any increase in rates for the following reasons :
1 As a Farmer I pay $47,673-60 GST inc (each instalment is $11918) each year. This is a much higher fraction of gross revenue than other non farming businesses in the South Wairarapa with fewer benefits received. In reality the only benefit is roading, which in any event is substantially funded by Central Government.
2 For the past 10 years SWDC and GW rates have increased faster than the CPI for no discernible benefits received Electricorp v Mackenze CA
3 There has been no attempt to curtail staff cost
4 The Council has not in its discussions considered the present reality that COVID 19 has been the trigger for a 5/6 year deflationary depression
5 Rates reduced to Farmers will enable Farmers to increase productive employment

Q1

Do you agree that the water supply should be Council's main focus next year?

Respondent skipped this question

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Requiring new builds to have their own water storage solution

,

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

Planning for a large Wairarapa Water Storage scheme has to be implemented. One that could supplement towns in serious water shortages. If you want to discuss water races, they are needed - maybe piped.

Page 3: Discussion Topic 2A: Continue extended hours for swimming pools

Q5

Do you agree that we should continue to trial extended swimming pool hours next summer (i.e. longer hours in evenings and on weekends)?Current year's opening hours are available here https://www.swdc.govt.nz/swimming-pools.

Yes

Q6

Why is this?

A welcome bonus for children and families right now.

Page 4: Discussion Topic 2B: Greytown Sports and Recreation Hub

Q7 **Yes**

Do you think that the Council should provide more space for sports and recreation in Greytown?

Q8 **Yes**

Do you support funding for the Greytown Sports and Recreation Hub proposal (as detailed on page 4 of the Consultation Document)?

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Purchasing Rugby and Bowling land if they are truely happy to sell then yes. Appears only way. Kuranui Gym only if it is signed off as a community building, legally unless of course the current gov want to build a new one for the school

Page 6: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q11 **Respondent skipped this question**

Why is this?

Page 7: Discussion Topic 3: Land Transport

Q12

What do you think about Council's proposals for land transport (page 5 of the Consultation Document)? Should we be doing more to promote walking and cycling in the district?

Walking and cycling - If the government extra boost right now provides extra funds for this then most definitely yes. Maintaining roads especially where logging trucks go is most important

Page 8: Discussion Topic 4: Waste Minimisation

Q13

Do you think it is important for Council to develop a Waste Minimisation Action Plan?

Yes

Q14

Do you support any of the waste minimisation ideas proposed (as detailed on page 6 of the Consultation Document)? Tick all that you support otherwise leave all blank

Moving to a more user pays model, i.e. increasing the cost of council rubbish bags

,

Providing a wheelie bin for general rubbish, paid for through rates

,

Providing recycling station in urban areas,

Encouraging food composting,

Reducing the availability of Council agendas and papers at meetings

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Rubbish bags perhaps another 50c to $1. More effort into finding destinations for recycled goods. No point in recycling if it has nowhere to go.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Updating systems and Council accommodation are very open ended generalisations. Would need to be more specific.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

I have particular issue with the carving up of viable farming land to the degree it is happening right now. Having recently travelled in Ireland Britain and France, we felt there was a more specific divide. Villages and towns had a boundary - then it became rural land. Not dragged out lifestyle blocks for miles upon miles. Looking at the Combined District Plan Subdivision, Land Development and Urban Growth I see things like 18.3.2 Policies (e) Provide for higher density subdivision and development etc (f) Limit the intensity of subdivision and land development in those rural parts of the Wairarapa etc. I refer also to (g); 9H) viii (m) and (n). I feel Council has lost touch with the Plan. For example on Number One Line. New Lifestyle blocks all opening out onto a very narrow very busy road and on very productive land.

,

Providing recycling station in urban areas,

Encouraging food composting

Q15

Do you have any other comments you would like to make on the proposed ideas above or any other ideas about what Council could do to help the district send less waste to landfill?

Organise SWDC own landfill site and end sending to Bonnie Glen. Put an end to plastic bags in landfill - SWDC is the number one offender as it mandates yellow plastic bag use. Broaden scope of materials that Earthcare recyclers must accept - scrap metal means just that; not only cars.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Wildly overdue.

Page 10: Other Feedback

Q2

Do you think it's important for Council to develop a Water Conservation Action Plan?

Yes

Q3

Do you support any of the proposed water resilience actions (as detailed on page 3 of the Consultation Document)?Tick all that you support otherwise leave all blank

Installing smart meters to monitor water consumption and leaks

Q4

Do you have any other comments you would like to make on the actions proposed above or have any other ideas for the Action Plan?

There is a move both regionally and nationally, including through the Proposed Greater Wellington Natural Resources Plan to mandate the efficient use of water, and water metering can be a useful strategy for conserving fresh water resources, raise consumer awareness and promote the value of water. RPH supports the proposal to develop a Water Conservation Action Plan and suggests that consumer education and positive reinforcement of key conservation measures may complement the existing provision of meters.
Reducing the current household water allowance per property
RPH is unaware of the average water consumption per South Wairarapa district urban residence but literature suggests that New Zealand uses a large amount of water when compared to people in other countries.
Some estimates for New Zealand household water usage is in the range of 230 litres per person per day. A BRANZ study undertaken before meters were installed in Kāpiti estimated the average use per person was in the vicinity of 184 litres per person per day, with summer usage up to 240 litres per person per day.
Council has set a current allowance of 350 cubic meters per year which is a generous allowance when compared to other metered communities and equates to 1000 litres per day. Council is seeking feedback on a proposal to reduce this current household water allowance to encourage high users to reduce their use or pay by unit over the threshold.
It is however entirely possible that a large household of four adults or adolescents for instance can use at least three quarters of the annual current allowance of 350 cubic meters with what could be considered normal household usage.
The point being that such households may not necessarily fall into the category of unreasonably high users.
A correctly sized affordable water allowance is important because the provision of potable water is a public health good as often lower income or larger households may change their water use to meet their household budget.
Such changes driven by water rate bills may have the unintended consequence of increased health risks for households, for instance reducing the frequency of linen washing that may have been recommended to a family to manage skin infections within the household.
It is important that tariffs are set at a level which avoids household health impacts. Thus any reductions in current annual allowances requires careful consideration and should include potential impacts such as changes in practices that could affect health outcomes. This may include more indirect impacts on well-being e.g. decisions not to maintain a family vegetable garden due to increased costs associated with water use.
In addition any consideration of a reduction in current allowance should include whether there is a disproportionate burden placed on an already disadvantaged group compared with an advantaged group e.g. the difference in burden between high and low income households-although the cost of water may increase only a small amount for low income households compared with higher income households.
Recommendation: If Council moves to reduce the current household water allowance RPH recommends that Council when setting any new tariff structure assesses whether or not there are likely to be any impacts on lower income households or other vulnerable groups.
Removing or revising the Water by Meter Write off Policy
Council is seeking feedback on the revising or removing of the current policy. One of the stated purposes of the policy is to recognise genuine and real hardship and Council should be congratulated on the adoption of such a policy.
It is likely that the greatest individual impact on household water usage and on resident's water bills, is likely to be the presence of leaks and the installation of meters should enable the identification of these and the charging regime should encourage the repair of these. However it should be recognised that some of these leaks will be major and potentially very expensive to repair.
The ability for repair of leaks by property owners may be itself problematic with repair of leaks less likely to be taken up by low income households which may potentially increase inequalities and place a relatively greater impact on low income versus higher income families.
In the event of the removal of the policy it may be that low income families may be faced with increasing water bills because of leaks but have a decreased ability to pay for repair of those leaks because of the increased water bill commitment which is a situation that helps no one.
Recommendation: RPH believes that it is necessary to retain the existing policy at least where genuine and real hardship exists
Offering subsidised water tanks and making it compulsory for new buildings to include their own water storage solutions.
The installation of tanks is being considered for reducing household demand for the public water supply through the use of urban rainwater harvesting.
RPH advises that there are known human health risks from consumption of roof collected rainwater supplies.

While RPH recommends using the public water supply where available, for potable water use , RPH does recognise that there is a growing acceptance amongst the public of using rainwater for non-potable uses (toilet, laundry and outdoor), providing suitable precautions are taken to ensure public health risks are appropriately managed such as:
 Clearly labelling non-potable water outlets as not suitable for drinking and any non-potable pipelines are an appropriate colour
 Provide backflow prevention to prevent the possibility of the non-potable water contaminating the potable water source
 Ensure systems are adequately maintained and operated.
Council has the responsibility to manage rainwater collection systems for non-potable use under the Building Act including the requirements for buildings to be supplied with potable water. It is likely that supporting systems would need to be developed to sit alongside any move to urban rainwater harvesting such as operating systems, design codes which link to the Building Act, educational programmes and regular monitoring checks by Council. It is possible such supporting systems may be in the form of codes of practice or bylaws.
If Council further considers this matter RPH would welcome the opportunity to have further input.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

To the South Wairarapa District Council, Pae tū Mōkai o Tauira would like to make the following submission to the 2020 Annual Plan.

As a community group we have identified 5 key areas of focus that we believe would, draw community together, enable platforms for learning opportunities, enable spaces to practice manaakitanga, kaitiakitanga and rangatiratanga, opportunities to learn the whakapapa of Featherston and Wairarapa Moana, and to bring mana to our community.

Our focus areas are;
1. Restoration & Conservation of Wairarapa Moana
2. Story Telling
3. Cultural Monitoring
4. Developing Sustainable Communities &
5. Native Plant Nursery

Since 2018 we have developed projects in each focus area and are continuing to plan and evolve them. We would like the opportunity to introduce ourselves and present to SWDC Mayor Alex Beijen and fellow councillors our Business Plan to give council a view to our aspirations for the future and for Featherston's māori and non-māori community. In particular, the development of a native plant nursery that we will locate at the old Featherston Golf Course. This space would be a plant nursery to service our projects of plant restoration and revitalisation around Wairarapa Moana and its tributary waterways. We have other aspirations to create a 'Halo' planting at the golf course and would appreciate the opportunity to discuss further with council. Our present project is the Hügelkultur Project at the entrance to Lake Domain.

We thank you for accepting our submission and look forward to further discussion.

Pae tū Mōkai o Tauira

South Wairarapa District Council
19 Kitchener Street
Martinborough 5711
19th May 2020

Tēnā koutou

Ko wai tatou? Pae Tū Mōkai ō Tauira is an Incorporated Society established to give Featherston a Māori voice on the South Wairarapa Māori Standing Committee and to support tangata whenua. Since our official establishment in July 2018, Pae Tū Mōkai ō Tauira Incorporated Society have had two representatives on the South Wairarapa Māori Standing Committee and is also registered with the Charitable Services Trust.

PAE TŪ MŌKAI O TAUIRA

Vision (Kaupapa):

Toitū te whenua, toitū te moana, toitū te tangata.
'Heal the land, heal the lake, heal the people'

Mission (Ngā Pūtake):

- To provide a strong Māori voice committed to bringing *mana* to our lives and to the communities that we walk in.
- To stand for the revitalisation and sustained *kaitiakitanga* of Wairarapa Moana and the surrounding natural environment (*Te Taiao*).
- To enable cultural and environmental change through knowledge sharing *(wānanga)* and collaboration *(whakawhanaungatanga).*
- To share and develop principles *(Tikanga)* and values *(Kawa)* that *Te Ao Māori* bring to our communities.

Page 5: Discussion Topic 2B: Greytown Sports and Recreation Hub (continued)

Q9

Please explain why you do or do not support funding for the Greytown Sports and Recreation Hub proposal

Submission to SWDC on behalf of 383 people who have signed a petition stating:

We the undersigned residents of Greytown will not be held to ransom directly or via pressure on South Wairarapa District Council in the matter of sport and recreational land in East Street owned by the Greytown community for 150 years. We ask the Greytown Trust Lands Trust to gift both sites to the Council to allow the continuation of sport and recreation on both sites.

Background
Since 1871 the Greytown community has owned both the Football ground and the Bowling Club site through the Greytown Trust Lands Trust (GTLT). The GTLT is a statutory authority not a commercial business. Trustees have decided to hold the Community to ransom by threatening to sell both sites for residential sections unless the SWDC uses rates to pay the Trust an amount in the vicinity of $2.7 million for land the Community already owns.

The GTLT was established with unsold sections from the early development of Greytown. Its purpose, set out in a parliamentary act, is to primarily assist education, but including libraries, physical welfare, other cultural purposes, and maintaining and promoting in the district the general well-being of the public.
The GTLT directors are holding our community to ransom by threatening to sell both facilities for residential sections, even though our community already owns the land. The Trust is not financially stressed with some $2 million in cash reserves and a budgeted annual income of $1,050,000. Their stance has caused considerable anxiety in the Greytown Community. This is reflected in the large number of box ticking responses to the Council consultation. These have been sent in response to a campaign organised by the Greytown Sport and Recreation Association; an entity primarily funded by both the GTLT and the SWDC. Members of affected clubs have been urged to support the SWDC paying the GTLT. It is easy to spend other peoples' money……in this case ratepayers. We think the campaign lacks critical thinking and is supported by people responding to the GTLT threat and the possibility that the green space would be lost. It is a Rort.

It is unfortunate that:
- Trustees of the GTLT are out of step with the views of the Greytown community who do not support what is a Rort.

- Inadequate research has been done by SWDC and the GTLT on the issue. We are aware that the land has been a recreational reserve since before 1900.

- The Council has indicated that it could purchase the land as proposed by the GTLT, whether from rates or reserves the money would be used to buy land the community already owns.

- Council involvement has proved misguided; for example it moved the price of the Bowling Club from $500,000 to a price closer to $800,000. Council involvement on the Football ground has created an understanding that Council will pay; Council involvement unnecessarily undermines ratepayers position.

- We ask the Council to refuse to pay any funds to the GTLT for the sites because the community in effect already own the properties. The GTLT is required by its Act to support the Community, not rort it.

We think an alternative solution is possible which will satisfy the community without ratepayer funds.

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

Submission to SWDC on behalf of 336 people who have signed a petition stating

We, the undersigned residents of the South Wairarapa, request the South Wairarapa District Council to revisit its proposed 18% increase in operational spending in the annual plan and cap any increase in operational expenditure to 2% for the next 3 years.

We note that:

- This level of expenditure increase (18%), departs significantly from that set out in the SWDC long term plan.
- The need for this level of increase was not raised in the Chief Executives' public briefing material to election candidates. Nor were any "critical" risks or threats to the Council identified in that formal submission.
- From Council minutes we see that the Consultation material was not considered by Councillors in any depth before its release to the community.

"Councillors viewed the financial supporting information including the rates increase examples. The Mayor noted that there was limited time available to change the supporting information as consultation opened in two days, and that councillors were not being asked to make any final decisions. It was noted that key documents were provided to Council late, leaving little time for review. Councillors agreed that as the Supporting Information was being provided to the public as part of the consultation, and that as no decision was being made on the proposals, the supporting information could be discussed post consultation."

- It is very surprising that in the Mayors Message in the forward of the consultation document That Councillors and the Mayor have deliberated on the impact of Covid 19 and decided to implement The critical projects we had identified earlier. We are unable to find anywhere in the consultation document where these critical projects are identified and an explanation as to why they are "Critical". The document simply asks for money at a vastly increased amount than budgeted for in the Long Term Plan.
- This position departs from the position of every other Council in New Zealand who unlike SWDC Councillors are moderating expenditure as they recognise that our country faces a major recession. Treasury predicts that New Zealand's nominal GDP is projected to be $128 billion less than it forecast only a few months ago. Central Government has indicated it will borrow at least $140 billon. This money will have to be paid back in an environment where we collectively will have to deal with unprecedented levels of unemployment, reduced property values forecast at 10-15%, business failures, and inevitably higher taxes. Many Wairarapa ratepayers, particularly those on fixed incomes, will not have the cash or resources available to meet the proposed rate rise of 13-15%. Councillors are elected by the whole community and have a responsibility for everyone; not just the wealthy.
- It is unsatisfactory that the Consultative document contains no performance indicators. There is no description of what any increased funding will be used to do. There is accordingly no basis for ratepayers to understand exactly what critical funds will be used for; and no basis for assessing in the future what was actually delivered. This is fundamentally inadequate documentation. It highlights either inadequate Local Body reporting standards, or a lack of basic capacity amongst Council staff and Councillors.
- We do not support the Council borrowing to pay for operational activity. It is irresponsible for the Mayor and CEO to pretend the rate rise is 2.54 %. It is not. Borrowed money has a present value and must be repaid. The actual rate increase proposed by SWDC is at least 13.1% and 15% or more if $2.7 million were paid to the Greytown Trust Lands Trust. Clearly the proposed 18% increase Councillors propose cannot be serviced by a 2.54% rise in rates.

In conclusion we think it is critically important for the Council to review its proposed operational expenditure taking into account a forthcoming recession and existing Government borrowing. The SWDC should take its lead from Other District Authorities and reduce operating expenditure to a maximum of 2% for the next three years. In short Councillors must rigorously prioritise expenditure as every other local body in New Zealand is doing.

Page 9: Discussion Topic 5: Building Capability

Q16

What do you think about Council's proposal to build the organisation's capability and improve delivery of services?

Staffing should be streamlined towards unavoidable costs and staff numbers should be reduced. (P6 last para shows staff costs budgeted to increase 6%)

Page 10: Other Feedback

Q17

Do you have any other feedback for the Annual Plan 2020/21?

This year Te Awaiti Station 6552ha of harder hill country leasing Ruamahanga Farm 106ha will pay $47,674 GST inc in annual rates to GW and SWDC and we are expected to pay more again next year. That is equivalent to two new farm jobs in the coming deflationary age. I rebel.
This is the highest expense on our farm balance sheet and will be 7% of our probable gross revenue next year. Can the District Council as an urgent OI Act question name a single business in Martinborough where rates exceed 1%-2% of gross revenue ?
I would ask that the District Council reduce the contribution to rates of remote ratepayers since the Court of Appeal following UK precedent in Electricorp v Mackenzie (1992) 3NZLR declared that to be valid the Council must consider the receipt of benefits by all ratepayers. For remote ratepayers our only benefit is our share of the roading network after all Central Government funding is deducted. Could the District Council please as an OI question calculate the ratio between rates received from remote ratepayers and their equitable share of the roading network ?
I submit that COVID 19 is the trigger leading to a World Deflationary Depression which was inevitable. It appears (p10 Key Dates) that the Consultation document was written during the COVID 19 Lockdown (p2 and p7), but the authors failed to understand the magnitude of the coming deflationary depression so that at 5% deflation a dollar tomorrow is worth 5% more than a dollar today ("so put it away under the mattress"). In such an economic environment (1) P7 Next years annual rates increase of 13-17% in reality is an increase of 18-7% (2) there can be no such thing as smoothing a rates increase through extra borrowing since debt is inherently expensive in a climate of 5% deflation since the burden of principal repayment is inherently more expensive in the future.
.....
Since no one is prepared to venture any opinions over the coming times I will :
1 Deflationary depressions are cyclical (1730s...1780s....1830's....hungry eighties starting 1878....1930s starting with a commodity crash in 1923
2 They are disruptive so that credit and loan finance become unattractive
3 Cost plus wages and regulatory monopolies adjust by wage reductions or collapse
4 Since cash is king export earnings from real goods such as primary produce become essential
5 The NZ Reserve Bank knows this by allowing the $NZ to gently depreciate relative to the major currencies
6 Rising unemployment (predicted by the OECD at 30% but) 15% is more probable forces all business to become more productive as say 70% of the working population are forced to complete the work previously undertaken by 90% of the working population.
7 Depressions are times of increasing technological adaption. Thus the 1930's saw a quickening of business through the macadamised highway, motorised goods vans, domestic labour saving devises such as electric ovens and the business use of the telephone.
8 Level 4 COVID 19 Lockdown has pointed the way with remote desking, zoom conferences, reduced travel and reduced discretionary expenditure such as hospitality. [The Tuturumuri Community described all these phenomena in their submissions to MOE opposing closure, but were ignored)
9 Increased unemployment, zero immigration, zero tourism and Air b&b, fewer holiday houses and frugal living will reduce rental and occupation demand for housing (The "housing crisis" in Wellington and Auckland will have been fixed !)
10 I venture the view that house prices in Auckland and Wellington after 12 months and after major Government interventions such as the Wage Subsidy become unsustainable will drop 30%+
11 In part this will occur because families will decide to internally migrate from Auckland and Wellington to nearby country areas such as Martinborough and Masterton, where house prices will remain much the same.
.....
Conclusion
Real rates allowing for deflation should be reduced.
Resource management and regulatory cost should be reduced.
Operational savings should be sought by greater integration and function sharing with the other Wairarapa Councils.
Rates should only be levied and not reduced where in terms of Mackenzie District Council v Electricorp CA they align with the receipt of benefits by each category of ratepayer

I with the support of others oppose any increase in rates for the following reasons :
1 As a Farmer I pay $47,673-60 GST inc (each instalment is $11918) each year. This is a much higher fraction of gross revenue than other non farming businesses in the South Wairarapa with fewer benefits received. In reality the only benefit is roading, which in any event is substantially funded by Central Government.
2 For the past 10 years SWDC and GW rates have increased faster than the CPI for no discernible benefits received Electricorp v Mackenze CA
3 There has been no attempt to curtail staff cost
4 The Council has not in its discussions considered the present reality that COVID 19 has been the trigger for a 5/6 year deflationary depression
5 Rates reduced to Farmers will enable Farmers to increase productive employment

John Hayes

Personal Submission to the SWDC Annual Plan consultation 20/21
from resident John Hayes

Thank you for the opportunity to make this submission. I would also like to make an oral presentation during the hearing process in June. I make the following summary points:

- The Council consultation document is long on photographs and generality but short on substance. Without clear performance indicators it is impossible for residents to have a clear understanding of Council intentions. It is also clear from Council meeting minutes that Councillors have given no consideration to to the proposals in Consultation documents. Councillor's might reflect on the quality of service being given to those who pay for their service.
- **Water.** I have lived in Greytown for more than 20 years. At that time water delivered to my house was sometimes cloudy, sometimes with an odour. People regularly complained about it. For the past 15 years I have never heard a complaint about potable water. In my view it is perfectly good. I do not agree that water should be the Councils main focus next year. A water conservation plan is unnecessary. The Waiohine river runs under the town at a depth of 4-6 metres depth. Water is not in short supply. The proposed action plan is unnecessary. Given the impending recession we need practical solutions. This is not a time to procure Gold Plated solutions from the Local body owned Wellington Water.
- **Community Recreation.** I do not support purchasing land already owned by the Community through the Greytown Trust Lands Trust. It is surprising that the Council would entertain what is clearly a Rort. I support the concept of a sports hub but it should be built on existing land in the designated Greytown Recreational Reserve i.e. the present football ground. I do not support any increase in rates for this purpose in the face of serious economic conditions. My expectation is that the Council will focus on critical issues and prioritise its spending, following the lead of all other local bodies in New Zealand. This is not a time for unnecessary borrowing particularly to meet the cost of operational expenditure. To do so is irresponsible. Borrowed capital has a present value; borrowings have to be repaid with interest. While interest rates are historically low now they can be expected to rise in the future.
- **Senior Housing.** The SWDC unlike the Masterton Licensing Trust (MLT) is not a specialist housing provider. All properties could sold to the MLT who have the resources and expertise, for example, to build new houses on underdeveloped Council owned land in West Street. It seems unreasonable to lift rents of social housing by 5-20% when the inflation rate is 2%.

- **Transport.** The section has no specific details in the Consultation document except, give us money. There is a time to support walking and cycling but in all non-essential expenditure should be postponed until the impact of recession passes.
- **Waste Minimisation.** The expense of developing a Waste Minimisation Plan is unnecessary. It would be smarter to lift the price of rubbish bags to $3 or $5 to encourage waste minimisation.
- **Rates.** It is obvious that Council raises fees are a tax on economic activity. The last thing needed in a recession.
- **Community Buildings.** There is already significant underutilisation of Council owned buildings. Increase charges and usage will decrease. If anything Council should reduce its charges to levels the community can afford. Utilisation of the Greytown swimming pool is an obvious example.

Thank you for your consideration of the points made in this submission.

Yours faithfully

John Hayes
