

SOUTH WAIRARAPA DISTRICT COUNCIL

19 SEPTEMBER 2013

AGENDA ITEM D2

INFRASTRUCTURE AND SERVICES GROUP REPORT

Purpose of Report

To update Councillors on the Infrastructure and Service Group activities.

Recommendations

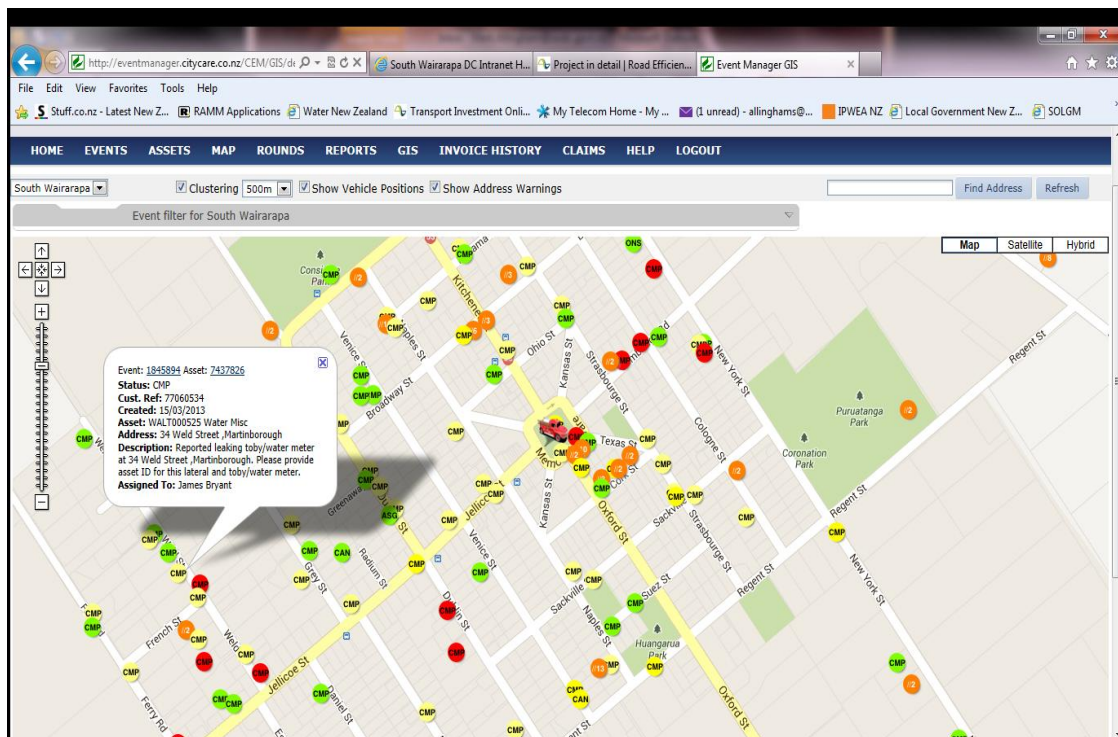

Officers recommend that the Council:

1. *Receive the information.*

1 Contracts

Discussions have been held with Masterton District council (acting on behalf of MDC and CDC) regarding the letting of the new Roads Contract that will be in place by July 2013. This will enable standardisation of documents and schedules as in 4.3.

Discussions have been held with City Care limited over the use of their IT systems and increasing the functionality in reporting on routine tasks.

An example of the graphical representation is as above, allowing officers to easily determine what works have been done and their status.

An example of reporting is attached in Appendix 5 where more detailed printouts are available on routine tasks done. The ability to report on an asset history is an added benefit enhancing council's asset management capabilities.

As per the screen shot below, the linkages between the new contract for afterhours callouts and councils main contracts has excellent visibility to all parties. As the system is web based this information can be viewed by staff and Councillors at any time via any web enabled device.

The screenshot shows a web browser window displaying the CityCare Event Manager interface. The page title is 'After Hours Callouts'. It features a table with columns for Event Job ID, Category Name, Customer Ref, Address, and Title Description. The table lists 15 callout events, including noise complaints, water leaks, and sewer blockages. The interface also includes search filters for 'Start Created' (1/08/2013), 'End Created' (11/09/2013), and 'Category' (South Wairarapa).

Event Job ID	Category Name	Customer Ref	Address	Title Description
1960035	South Wairarapa		53 Main St, Greytown	Noise complaint, bass type music comign from Turkey red Pub.
1960054	South Wairarapa	77060534	22 Boundry Road off state highway 53	Reported this issue a couple of days ago but nothing has been done - Water gushing out from a pipe beside a powerpole outside 22 Boundry Road - customer is concerned as it is near a property with young children.
1960094	South Wairarapa			Caller wanted to know the opening/closing times for the Martinborough dump this weekend. Advised it's open til 4pm today and from 10am-1pm tomorrow.
1960114	South Wairarapa			Caller wanted to know what times the Martinborough dump is open this weekend; advised it is open until 4pm today and from 10am-1pm tomorrow (Sunday).
1960125	South Wairarapa	77060534	12 Cambridge Street	Water main leak outside 12 Cambridge Street, Martnborough coming from under the tarmac into the gutter. Described as a steady flow but not serious enough to break the tarmac.
1960163	South Wairarapa			Caller enquired about no water - informed them that there has been a water shut off because of repairs being done on Cambridge Rd.
1960164	South Wairarapa			Caller enquired about there being no water to property - informed them there has been a water shut off due to road repairs being done on Cambridge St.
1965555	South Wairarapa	97760534	BLDG000006 Public Toilets - Arbour Reserve Toilet 270-276 MAIN ST Greytown	Reported sewer blockage at Greytown caravan dump station. This is the third time a blockage has occurred at this location. Investigate to why this is re-occurring not just clear blockage.
1965696	South Wairarapa		Corner of Brandon and Waite Street Featherston	Water leak coming from the road near a fire hydrant. On the corner of Brandon and Waite Streets.
1965702	South Wairarapa		1075 Lake Ferry Road	A cow is wandering near the road on Lake Ferry Road, close to number 1075. This is a busy area of the road.
1965712	South Wairarapa			Caller wanted the phone number for Helen McNaught.

The new e-waste contract is now operational as a joint contract between Carterton District Council and SWDC. The combining of the e-waste and the TV-Takeback scheme has been viewed as an excellent combination and has been received well by the public. More detail is covered in 3.7.

2 Consents

2.1 Wastewater (Martinborough, Featherston, Greytown)

A workshop was held on 12 August 2013 to consider the feasibility reporting developed to date and to acquaint Councillors and stake holders of the recommended way forward. The detail of the reporting and the conclusions drawn is attached for Councillors information as Appendix 1.

In summary, land based disposal solutions at the three sites are preferred as a long term outcome but can only be delivered over a period of time that is affordable to Council and its ratepayers.

A delivery programme acknowledging Council's funding constraints but committing to genuine progress is currently under development and will

once approved by Council be submitted to the regulator as part of the additional information submissions to be made before the end of the year.

2.2 Wastewater Land Disposal

Negotiations with an adjoining land owner are continuing with separate reporting to be made available to Council in due course.

2.3 Water

Nil to report.

2.4 Coastal

Covered in Roding report below.

2.5 Gravel Pit Extraction

The consent application for ongoing authority to extract gravel from several sites throughout the District has been re-submitted to the regulator and is expected to be approved before the end of the year.

2.6 Land Fill Consent

Nil to Report.

2.7 Wastewater and Water Reticulation

The wastewater renewal portion of the contract is completed apart for minor reinstatement in William Benton Street. Sewer pipeline rehabilitation by chemical grouting was started in July. 180 metres of 300mm diameter concrete pipe in Brandon Street is being repaired by trenchless technology. Sealing of the house lateral connection at the main is being considered by Council officers as an additional process to the pipe rehabilitation.

Water main renewal has started in Wallace, Bethune and Hayward Streets. The contract construction programme is on target for the agreed completion date.

2.8 Water Supply

The Capital Assistance Funding application for the Featherston Water Supply Upgrade Project was approved by the Minister of Health on 4 August 2013. The approved subsidy is \$617,500 (GST excl). The expected project cost is estimated to be 1,179,000 (GST excl) with the cost of a new reservoir included. The approved application excluded subsidy for a new dedicated for Featherston and officers have yet to determine whether this part of the work will proceed.

The project is planned to be delivered over two financial years with completion anticipated by December 2015.

3 Operations Utility Assets and Services

3.1 Wastewater Treatment Plants

Greytown, Martinborough and Featherston Wastewater treatment plants operated routinely over the period. Normal monitoring for flow and compliance reporting continued throughout the period with one non-compliance issues.

There was a recorded incidence where the allowable parameters to discharge to the river had been exceeded at the Martinborough Wastewater Treatment Plant. This breach is being followed up by Council officers as the plant records show it was functioning as expected and the irregular result may have occurred with the sampling procedure or at the testing laboratory.

Planting the gully below the wetlands at the Lake Ferry Treatment facility was completed. This work was a resource consent condition requirement. Photo below shows the extent of this works.

3.2 Wastewater Reticulation

There were no reported pipeline blockages during the period.

3.3 Water Treatment Plants

Martinborough and the Featherston/Greytown Water Treatment Plants operated routinely throughout the period.

Community water usage and rainfall records and trending is attached for Council's information in Appendix 2.

3.4 Water Reticulation

There were twelve water reticulation repairs reported and rectified during the period.

3.5 Water Races

City Care Ltd has been performing the routine monthly inspections and blockage clearing of the water race network to maintain satisfactory flows during the winter months for both networks. The annual walk over inspection of the two networks by City Care is to take place in October, it is intend to use this inspection as an opportunity to meet a resource consent requirement and complete the land owners check sheet at the same time.

3.6 Waste Management

Operations continued on a routine basis throughout the period.

Council officers are currently arranging the re-location of the Tukurumuri recycling site. Prices have been submitted for construction of this centre, but before starting work a second consultation with the closest residence to the new location is to be had by Council. It is expected that this new site will be operational towards the end of October.

Waste export and recycling tonnage data for the period is attached in Appendix 3.

3.7 E-Waste Collection District Wide

The three main centres have been set up by Council contractors Earthcare Ltd to receive e-waste. Collection of all e-waste started after the MfE Government department made a public announcement on the 21 August 2013 for the start of TV Take Back in the lower North Island. Council ran a campaign for two consecutive weekends to promote this TV TakeBack programme by accepting TV's at no cost. The quota for TV recycling which is subsidised by the Government had not been reached and Earthcare will continue to accept TV's at no charge to the public until the quota is filled.

4 Rooding and Reserves

4.1 FAR Review

NZTA is reviewing how the funding assistance rates (the percentage that NZTA funds local roads) are calculated. The same general approach to setting funding assistance rates has been around for thirty years.

This Review is about ensuring funding assistance rates support all councils to work together to plan, invest in and deliver optimal land transport outcomes.

This is part of a wider move away from the Transport Agency providing subsidies, to a system where we co-invest and work in partnership. The first round of consultation (which finished in May 2013) looked at a wide range of approaches that could be taken to setting and applying funding assistance rates. The submissions received during this phase were all reviewed and they now have a provisional framework.

The provisional framework proposes that there would be a set overall National Land Transport Fund co-investment rate. Some approved organisations would receive a funding assistance rate that is above the overall co-investment rate. The next stages of this Review are very important and will involve developing an understanding of how this provisional framework might work in reality.

4.2 50 Max

The NZTA is looking at new opportunities to unlock freight productivity and drive economic growth. 50MAX high productivity motor vehicles (50MAX HPMVs) are longer vehicles, which track on the road with the same impacts as a standard Class 1 truck.

50MAX HPMVs have nine axles to ensure that axle loadings, and therefore the axle pavement impacts, are the same as a 44 tonne truck. With the extra axle and the 20 metre wheelbase these trucks are able to operate at 50 tonnes without causing additional wear on pavements or structures. The neutral impact on roads will allow greater network access, particularly on the extensive local road network and the more remote state highways where pavement strength is insufficient to allow higher axle loads.

NZTA requests that all participating RCA's review their bridge stock and advise of any bridge restrictions for 50MAX HPMV vehicles; which has been completed by SWDC. We have generically posted all bridges with timber decking and all bridges have been reviewed. These bridges will be off limits to 50MAX HPMV's and will be plotted on maps to graphically show these structures as 'restrictions', and that operators are not permitted to cross them.

In reality "50MAX" will become the new "Class1" except where council has posted and restricted use. With a MOU signed between council and NZTA for permitting purposes.

4.3 One Network Road Classification

NZTA is investigating creating a One Network Road Classification system for local roads and state highways. This involves categorising roads based on the functions they perform. For example - for moving freight, for tourism, for everyday travel and for access to destinations. It also includes defining customer levels of service for each category.

This means that over time road users can expect to have a similar experience across the country, on roads with the same classification. It will also bring a consistent approach, instead of the many variations currently used by road controlling authorities.

This initiative will be assisted in the Wairarapa with the 3 Councils combining their road specifications and standards under their respective documents.

4.4 Roothing Maintenance – Oldfield Asphalts

With the changes in the Roothing department Council officers are moving towards administrating the RNM contract by using the RAMM suite of products and electronic technology to performance manage. The expenditure to date for this contract is at 21% of this year programme which is slightly higher than forecast. The tidying up of two storm events earlier on accounts for this extra expenditure. The three month forward works programme is at \$195,000 which doesn't include this year's reseal repairs. Priority is being given to get these sites ready.

Emergency works in July/August included immediate repairs to the boulder beaches at Te Kopi on the Cape Palliser Rd after the storm over the 27 – 28 June. The repair work at Kupe's Sail commenced in the week beginning 12 August 2013 and is anticipated to be completed by mid- September 2013. This work is classified now as a permanent repair rather than the temporary that was proposed in the first instance.

4.5 Area Wide Pavement Treatment (AWPT)

Three sites have been selected they are:

- Lake Ferry Road 1060 metres
- Hinakura Road 1175 metres
- Bidwills Cutting road 870 metres

Pavement testing has been completed to determine the pavement strength and confirm selection of site. Pavement design will follow for Council officer consideration once the selection process is finalised.

It is expected that the AWPT contract will go out to tender late October.

4.6 Reseal Programme

The selection of this year's programme has been completed. Subject to the contractors design the treatment lengths are 19.674 km for the local roads which includes urban streets and 2.96 km on the SPR. (Cape Palliser Rd).

5 Amenities

5.1 Staffing

Helen McNaught's role has now been formalised as Amenities Manager, with responsibility for libraries as well as parks, reserves and property. In August, Sara Sutherland came on board as Amenities Administrator to manage the day-to-day operations in property, parks and reserves.

5.2 City Care Contract

The City Care contract is now in its 11th month and is generally going well. Karl Nesbitt has been developing positive relationships with local tree, garden and sports field groups to ensure that everyone has a good understanding of roles and responsibilities. There have been some public compliments to City Care on their work – one about the plantings in Featherston, and a very positive *Times-Age* editorial on how good the Greytown cemetery is looking.

5.3 Graffiti

Table 1 – Graffiti strikes July 2013

Town	No. of strikes	Location
Featherston	5	Playground, Cherry Tree Park
Greytown	0	
Martinborough	0	

Table 2 – Graffiti strikes August 2013

Town	No. of strikes	Location
Featherston	1	Cherry Tree park
Greytown	0	
Martinborough	0	

Table 3 – Graffiti strikes October 2012 – August 2013

Town	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	TOTAL
Featherston	13	0	17	102	9	23	87	101	0	5	1	358
Greytown	0	0	9	0	0	1	0	0	1	0	0	11
Martinborough	5	0	5	0	14	0	0	13	0	0	0	37
TOTAL	18	0	31	102	23	24	87	114	1	5	1	406

The amount of graffiti has been reasonably low over the last two months, without the expected massive increase during school holidays. We are assuming that this is due to the weather, although recent media coverage of the graffiti issues may have had an effect. Council has approved the establishment of a Graffiti Working Party, and the first meeting of this group will be held in September.

5.4 Playgrounds

Featherston – repairs were required to a baby swing and the climbing frame. Planned maintenance for the tractor and flying fox were completed in early September.

Martinborough – repairs were required to a swing support.

5.5 Trees

Greytown southern entrance – the second stage of the work (removal of trees on the east side of the road and planting of new trees) is now being planned.

In July there was further wind damage to trees in Featherston, and to one tree in Martinborough Square.

In August, the Phoenix palms in Humphreys Street Greytown were removed at Powerco's request, as they were interfering with power lines. Residents will be consulted over the choice of replacement trees.

5.6 Sports Fields and Facilities

The inaugural meeting of the Greytown Sportsfield Users Group was held in early September to make arrangements for the change of seasons/sports codes. Feedback from the Greytown Football Club is that the surface of the pitches has been the best in a long time, and they have had very positive feedback from local and Wellington teams.

A meeting of the Greytown Pavilion users was also held in early September, with agreement reached on tidying up lease arrangements.

5.7 Pensioner Housing

There are no vacancies at any of the pensioner housing complexes. There are three people on the waiting list for Martinborough, seven for Featherston and five for Greytown.

The six-monthly flat inspections will be carried out in September.

5.8 Parks and Reserves

5.8.1 Martinborough

The fence and gate on the Princess St side of Considine Park have been completed. The trees along Princess St have been removed and the new tree planting has been done.

5.8.2 Greytown

Helen McNaught and Karl Nesbitt have met with representatives of the Greytown Tree Advisory Group, Friends of Sarah and Stella, and Greytown Lionesses to discuss Sarah Bull Park. A Memorandum of Understanding is to be prepared to document roles and responsibilities for the future.

5.8.3 Featherston

Wind sculpture – a further nine rods were removed from the sculpture by persons unknown. The rods have been stored at City Care's depot and will be replaced after consultation with the artist and the supplier.

5.9 Toilets

Damage and vandalism to public toilets is an ongoing problem, particularly in Featherston, where the light bulbs and toilet paper are regularly stolen. The mirrors in the Featherston toilets are so frequently vandalised by graffiti and scratching that we have removed them and do not intend to replace them. The door handles on the Ngawi toilet are broken off every couple of months.

5.10 Properties

5.10.1 Featherston

The drainage work for the Featherston Information Centre has been completed. The Featherston stadium roof leaks now seem to be fixed, and internal ceiling repairs have been scheduled. A leak in the roof above the Civil Defence office in the Anzac Hall has been repaired. The Opus report on the Anzac Hall has now been received, and the conservation report from David Kernohan is expected shortly. A shed behind the Anzac Hall has been identified as a potential location for the Featherston Men's shed, and a report on this goes to Council in September.

5.10.2 Martinborough

The Seddon earthquakes of 21 July and 16 August have further damaged the hall. The building was re-assessed by the engineer after each quake, and damaged noted and photographed to contribute to the ongoing record. The building remains open and available for public use, but has now been "yellow-stickered" to denote its earthquake-prone status. Specific information about safe exits and procedure during and after earthquakes has been placed in the building, and is required to be read to people in the building at the start of each event. The engineer is consulted after each significant aftershock.

5.10.3 Greytown

The new public toilet building has been delivered and is in storage awaiting installation in September. Resource consent has been granted, and building consent is expected shortly. The shed behind the old Borough Chambers

has been identified as a potential location for the Greytown Men's shed, and a report on this goes to Council in September.

5.11 Cemeteries

5.11.1 Featherston

One ashes interment in July and two ashes interments in August.

5.11.2 Greytown

Five burials and one ashes interment in August.

5.11.3 Martinborough

One ashes interment in July and one burial in August.

6 Libraries

6.1 Statistics all Libraries

See Appendix 4 for issues and transactions statistics.

6.2 Kotui Library Management System

Staff have adapted well to Kotui and are generally enjoying using it. New PCs have been installed in all libraries over August and early September, and this has reduced some of the early problems. The new server has arrived, and we expect the installation of VDSL connections between the libraries and SWDC in the next couple of weeks – this should resolve all the connectivity problems.

6.3 Library Strategy

The review of the 2009 WLS Library Strategy is underway. Senior library staff met for an initial review session which has resulted in a revised mission statement and strategic aims. Staff are now participating in workshops to brainstorm ideas for the implementation of the aims, with the workshops being held once a week throughout September. Discussion and the development of action plans will continue for the next few months using the online Yammer tool, before a final series of workshops will be held to finalise the Strategy next year.

7 Civil Defence and Emergency Management

7.1 Emergency Services

The Wellington Region Emergency Management Office (WREMO) was set up in July 2012 to render CDEM services to the Wellington region on behalf of the nine councils in the region.

One of WREMO's objectives is to have a 'WREMO' website covering all emergency management information developed and implemented.

At this stage the website is well progressed with the design of the site and a meeting took place on 5 September seeking feedback to ensure TAs and GW are catered for on the site. The anticipated go 'live date' is 30 October 2013.

PROGRESS REPORT

The Council continues to apply efforts to meet its consent acquisition requirements at the three WWTP sites and in particular timing around the lodging of new consent applications.

In respect of Councils Wastewater Treatment Plants we advise:

1. Greytown

This consent expired in March 2008. Council made efforts to submit a new application but were advised by the consent authority that a more substantive approach was needed to successfully acquire long term consent tenure.

To this end Council has carefully put together a range of reporting around a consent application which aims to, within the early life of the consent, discharge to the land Council owns when it is suitable to do so and eventually relocate the point of discharge to the Ruamahanga River from the Papawai Stream to achieve better environmental outcomes.

Ultimately additional land and treated effluent storage will be required to enable the discharge to water ways to be avoided altogether.

An extensive round of pre lodgement review of Council ecological reporting has been deemed necessary by the Regional Council causing significant delays. In the absence of further delays, it is expected to lodge the application before the end of September 2012.

2. Featherston

The consent expires on 25th August 2012. Council has lodged a new consent application seeking an eight and one half year term on 25th May 2012. The proposal identifies optimisation measures that can be taken to improve pond performance within the early life of the consent and infrastructure additions later in the term.

It is proposed to reduce nutrient levels in the discharge that can be sustainably achieved as there are some adverse impacts on Donald's Creek.

Following lodgement of the consent application, Council has received a request for further information from the Regional Council. They wish to be assured that Council is committed to improved effluent quantity and quality outcomes and that in terms of the Resource Management Act, the current discharge is deemed to be temporary only with improvements to be delivered during the course of the consent.

This means that Council must commit to a prescriptive programme of improvement (nutrient reduction) work at the plant and within the network to achieve a reduction in inflow and infiltration.

Council is developing a programme of work and timings compatible with LTP funding levels available over the term of the consent to deliver these outcomes. It is expected that the Council's response to the Regional Council will be completed in mid-July 2012.

3. Martinborough

The consent variation approved late in 2012 required that a full AEE and consent application be lodged by 10 April 2012. This was done with a consent term of five years requested.

After consideration by the Regional Council the application was returned to Council under Section 88 of the RMA as being considered incomplete mainly in the area of the assessment of environmental effects and mitigation measures proposed to mitigate adverse effects of the discharge.

Hence this application is to be resubmitted. This is work in progress at the present time and aiming for re-lodgement by the mid July 2012.

4. Strategy Overall

Council is demonstrating through its consent application strategy that it wishes to pursue the overall goal of discharge to land where this is sustainable and affordable to Council.

It is looking to acquire short to long term consents, short term where further investigation is required for treatment enhancements and longer term where some certainty exists particularly in the area of land availability for land treatment. It also wants to make best use of existing infrastructure and wishes to invest in optimisation works to achieve this.

Beyond this Council will invest in infrastructure to improve discharge quality using low energy and relatively low capital cost treatment within the term of the consents that it can acquire across the three sites. The aim is to achieve a composite discharge (surface water/land) regime at all of our sites in the medium term with the longer term objective of discharging to land in total.

Finally, it is planned to call the steering group together in the near future to continue the engagement with the community and advice of further progress in this area. Full hearings following public notification will follow later in 2012.

Yours faithfully

Mark Allingham
