

Decision Report on Final Conditions

Greytown Wastewater Treatment Plant

Martinborough Wastewater Treatment Plant

South Wairarapa District Council's

Resource Consent Applications to Greater Wellington Regional Council

14 March 2016

## 1 Introduction

[001] We have previously released our substantive decisions on the Greytown and Martinborough Wastewater Treatment Plant resource consent applications lodged by the South Wairarapa District Council. In each case we issued 'interim conditions' and invited comments outlining any improvements that could be made to the detailed wording of the conditions that did not alter their substantive intent.

[002] We received comments from the following parties:

- Regional Public Health
- Federated Farmers of New Zealand
- South Wairarapa District Council
- Greater Wellington Regional Council officers

[003] We are grateful to those parties for their constructive comments.

## 2 Decisions

[004] This decision report contains our final decisions on both suites of conditions. We have produced a combined report given the commonality between the parties and the issues raised in the comments.

[005] Attached to this decision report is a table that sets out the comments received, any comments made on those comments by other parties,<sup>1</sup> and our decision on each amendment sought together with our reasons.

[006] Also attached are the final suites of conditions that result from our decisions on the comments. Amendments to the interim conditions are shown in **orange shading**.

[007] For completeness, we note that there are no changes to the substantive decisions on either the Greytown or Martinborough Wastewater Treatment Plant resource consent applications.

Rob van Voorthuysen (Chair)
