

South Wairarapa District Council

Greytown Ward

Electing 3 Councillors

Mike GRAY

My principal place of residence is in the Greytown Ward area.

I am also standing for Greytown District Trust Lands Trust.

My governance focus is the well-being of the Greytown and South Wairarapa communities and the effective and efficient operation of district wide community owned infrastructure.

Challenges in obtaining resource consents, and the costs of providing high quality drinking water, appropriately treating waste water - recycled for a variety of land uses, and enabling better stock water and drainage systems, continue to exist.

There are policy and financial challenges to improving roading, rural and urban, and transport linkages including public transport, while Local Economic Development including land use changes and land use management also need greater attention.

Strengthening the capability of our communities and building relationships between service, recreational and volunteer groups is critical. Likewise, also investing in community assets, libraries, recreation venues, our heritage and history, and promoting opportunities for our arts community will enhance our reputation as a progressive, vibrant district.
