Q13

Other feedback for the LTP

Berms - seems they aren't done unless the Council is notified so no point in paying extra for something that is rarely done anyway.
Playspace - very good idea.

Greytown Recycling Centre - this is widely used more than your big decision reason states. To close it would likely result in more rubbish in the unmowed berms. If some of your Crs spent some time at the Greytown Recycling Centre they would see it is well used. And what's the big deal about it being close to the proposed playground? Every town DOES need its own recycling and green waste centre! Do not close it. It will result in dumping

Q13

Other feedback for the LTP

1. I am disappointed that these are the only 6 items on the list. There is nothing in the climate change/sustainability space. I would have liked to see more happening here rather than just audits/reviews and other policies/support strategies that have no actual requirements attached. There is a lot of potential to make a real difference here - particularly around becoming carbon neutral, energy efficiency, waste minimisation, water storage etc. We need to take bold action now not at some time in the future. We are currently building a lot of new housing within the region - couldn't we look at consenting discounts or other subsidies for homestar rated homes or similar - anything to incentivise people/developers to do the right thing.
 2. While I disagree with closing the recycling station in Greytown altogether I think it should be moved from its current position.
 3. I also think it is disappointing that the Greytown skate park will not be near the childrens park in town so that young mothers can have different children playing in the separate spaces like they do in Martinborough.
 4. While all my choices involve an increase in rates I chose these answers with the understanding that we have an old an failing infrastructure and unfortunately as a community we are going to have to "suck it up" and pay to get it right.

Q13

Other feedback for the LTP

Council need to control spending for maintaining key services , allow for growth in Greytown.

With a huge increase in subdivisions forthcoming extra rate take will be substantial extra income. Live within your means & stop huge rate increases

Children's play area proposed by Dog compound, is too far out of town. Suggest increasing the size of playground in Memorial Park, empty space there not utilised, plus very central.

Also Water Race adjacent needs to be piped, have witnessed a toddler falling in

Do you agree with the preferred option of the lower, more affordable investment package for water and wastewater renewals? See page 6 for details.

Q8

Disagree

Do you agree with the preferred option to stop funding rural road seal extensions to minimise rate increases? (This would be reviewed in three years). See page 7 for details.

Q9

Agree

Do you agree with the preferred option to start funding footpath kerb and channel extensions in Year 1, at a current cost of \$400k per year (inflation adjusted?) See page 7 for details.

Q10

Neutral

Do you agree with the proposal to stop mowing berms in towns to minimise rate increases? See page 8 for details.

Q11

Agree

Do you agree with the proposal to develop a new Greytown play space? See page 9 for details.

Q12

Disagree

Do you agree with the proposal to close down the Greytown recycling centre? See page 9 for details.

Q13

Other feedback for the LTP

Greytown Wheels Park should be located alongside other Greytown public spaces in East St (GTLT owned) and Kuratawhiti St.

The reserves fund must be growing fast given Greytown developments and can therefore include the purchase of land rather than just fixing land use of existing land owned.

Q13

Other feedback for the LTP

Please consider a bypass, it gets dangerous crossing roads at times as well as unpleasant with heavy trucks rumbling through. The speed limit should be lowered to further out of greytown to by the cemetery for safety at this junction and to slow traffic at the Martinborough junction and entry to town

Q13

Other feedback for the LTP

Feedback on wheels park - I fully support the proposal to have a wheels park at the Cotter Street/Perry Street intersection. With the Tararua Junction subdivision beginning this site is no longer on the edge of town, with ample activity occurring at the rail trail and the dog park to make this a hub of activity. I believe this will be a great asset to Greytown, ensuring we look after the well being of our young people - from toddler to teen and utilising an under utilised space.

If this was to go ahead, which I hope it will, I would like to see young people involved in the design of the park. Their input will encourage ownership and connection.

Thinking that this will be an attractant for undesirable behaviour is antiquated, wrong and doesn't align with reality. The benefits of a park outweigh the occasional 'bad egg' by a long shot. Wheels/skate parks are a place for young people to belong and be themselves while staying connected within a wider community, encourage physical activity and mental relief and give kids something to do (off a screen!)

My experience at wheels parks has been that older children look out for younger kids and new friendships are made.

One consideration is parking and road safety, but perhaps if the recycling centre was to move this would create an opportunity here. I'm sure the design process will address these concerns.

Feedback on recycling centre - I agree this is in the wrong location but I would like to see this facility at another location close to Greytown.

Q13

Other feedback for the LTP

re Greytown recycling station, I don't think getting rid of a recycling station completely from Greytown is a good idea but perhaps the current one may not be in the best location. What is SWDC recycling strategy? Do we want to provide a consistent level of service? COVID-19 has proven to show how strong this region's tourism is, and I believe we need to continue to invest in our regional tourism. I DO NOT support the 100k funding for Wairarapa Water, rather I would see this put back into our tourism, for example Western Lake cycle trail which is in a very poor state.

Q13

Other feedback for the LTP

I think expansion and improvement of the region's cycling infrastructure should be high on the priority list.

It's great for both attracting tourists to the region (it could become a real cycling centre of the country, thanks to the mix of beautiful rural trails and urban amenities, all easily accessible) and residents, offering a good option for both recreation and alternative transport (Featherstone/Greytown/Carterton are all pretty achievable distances).

Q13

Other feedback for the LTP

At a time when NZ citizens are being encouraged to recycle and minimise carbon emissions, it is ludicrous that SWDC are proposing to close recycling facilities in Greytown, a town of approx. 2500 and to force users to undertake a return road trip of 26K. Council is proposing to raise \$3m over two years to investigate more green space for Greytown. Surely this investigation could also identify a more suitable site for relocated recycling facilities. The current site could be retained in the meantime. If "noisy, smelly trucks" are a problem this could be minimised by instructing Council contractors to use the Featherson facility.

Q13

Other feedback for the LTP

Just do Recycling at the Cotter Street site.

Change Green Waste to now be dropped off at a portion of the SWDC owned land at Papawai (say near the glidding club...so a rural activity of storing wates in a rural area).

Q13

Other feedback for the LTP

I believe that SWDC must invest heavily in infrastructure to improve conditions in the present and as insurance for future growth. I believe there should be some way of ensuring each town's ratepayers are responsible for investment in their own town. I.e. some separation or weighting of expenditure. Eg. Greytown residents pay more than the other towns for their proposed playspace. Featherston residents for their wastewater upgrade and Martinborough for their water supply

Q13

Other feedback for the LTP

I drive the Ruakokoputuna road every day and with the increasing number population up this road plus with the tourism of Patuna chasm I have seen over half a dozen car crashes in the past 12 months. One of which were very very lucky as they were only a car length away from going over a large cliff which would have had a devastating outcome. Is this what it is going to take to make the council wake up and take action? The rural roads are becoming more and more populated and need attention!!

Q13

Other feedback for the LTP

The preferred option to not continue with the sealing of Ruakokopatuna Road defies logic. It would leave us with three separate areas of gravel, interspersed with three sealed areas in the 5 kms to the Blue Rock Road intersection. Council will still have to use a grader for the gravel bits. As it is already, the immediate areas at either end of the newly sealed area are falling into potholes and potentially seriously eroding the ends of the seal. Do it once, do it right! In the twenty years since we moved here the original two areas of seal have not needed ANY maintenance. As it is, during the summer, we have an enormous dust nuisance, and in winter, mud up to our axles and many deep potholes, sometimes it is impossible to avoid them safely without being forced to drive erratically and on the wrong side of the road. This is a safety issue! And I hesitate to mention the wear and tear on our vehicles, needing wheel alignment, replacement sway bars and shock absorbers far in excess of normal.

Other feedback for the LTP

Submission in relation to Ruakōkoputuna, Haurangi and Clay Creek roads. Continue to seal all the windy bits of road as promised plus the several dangerous bends in Haurangi Road.

Remediate the years of neglect to the gravel road - repair the pot holes, corrugations and exposed bedrock. These roads are dangerous - major risk to health and safety of increasing users. Increased residents, increased tourists. Multiple accidents every year. Last piece of road to be sealed should be the start of Ruakok road as this is the safest bit and sealing it will encourage more drivers and greater speed = more accidents.

Q13

Other feedback for the LTP

We do oppose the closing of the Greytown Recycling Centre and the development of the Greytown Wheels Park at Pierce Street. Recycling Centre

- By closing the recycling centre residents have to travel out of town which encourages dumping of rubbish at rivers and roadsides.
- More chances of rubbish blowing off trailers along the highway, creating a hazard.

Greytown Wheels Park

- The block of land identified for the wheels park is in a residential area. No where else in the Wairarapa or the Wellington region is a skate park/wheels park developed in amongst residential homes. They are next to either an already established park or sports ground.
- Pierce Street is not a legal road.
- Pierce Street is a skinny road with no footpaths.
- A big housing development Tararua Junction (57 houses) & Governors Green is in progress now and will be for at least 3-4 years. There are lots of heavy trucks, earth moving equipment, contractors, builders etc. already using this area so it is not a safe proposal to start encouraging families with children on bikes and skateboarders to also come to this area.
- Skate parks attract all sorts of troublesome, rowdy & disorderly behaviours.
- The late Stella Bull gifted land at the southern end of town to the SWDC for the development of a parks and reserve, this has never transpired in this area. A park & reserve would be a much better, far less costly and more suited enhancement for the area.
- A car park is also needed for the dog park and rail trail users.
- \$1 million dollars could be more effectively spent on infrastructure like, water, street lighting, footpaths and roading.

Other feedback for the LTP

continually grading ruakokopatuna road is a false economy for the council/rate payers, the road is unsafe and there are a lot of visitors (thousands) that use the road that may not be used to driving on metal roads -hence cars going off the road on corners where there is a significant drop off cliffs down to the ground below. Sealing the road is a no brainer

Q13

Other feedback for the LTP

As a local Living Streets Aotearoa member, we strongly agree with improving footpaths. Continued pressure on Waka Kotahi to create crossings south of the railway line and improve the junctions for people on foot or bikes is essential.

If berms are not to be mown by Council, consider encouraging residents to plant them rather than all mowing them. More native plants could be used for street trees and along streamsides to encourage the links between Tararua Ranges, Wairarapa Moana and the coast. As well as absorbing more CO₂, street trees cool the summer heat and provide shelter from the wind.

We would like the Five Towns Trail funded and consideration given to connecting to other walking trails. We also agree with the proposal to create housing by Woodside STation as long as there is also a plan for some basic amenities such as school and shop too, so people aren't dependent for car journeys for everything other than commuting by train. The Woodside Trail is a real community asset.

As well as supporting walking infrastructure for transport and recreation, we'd like you to support the Wairarapa Walking Festival as it grows from its modest beginnings in 2021.

Thank you for the opportunity to comment.

Q13

Other feedback for the LTP

I'd be happy if SWDC did not fund the footpaths, and put more money into the water infrastructure. Everyone seems to be hoping Central Govt will step in and put some money into the three waters, but what if that doesn't happen any time soon? Now seems like a good time to try and get ahead of the curve.

Q13

Other feedback for the LTP

#5 This does not appear to be a 'safe' place for children. I would prefer to see it near the playground, sports areas in Kuratawhiti Street.

#3 Footpaths needs to be extended in Wood Street, Greytown to the town boundaries. This is a dangerous stretch of road, with 2 bus stops, and is used by a lot of people - walking, running, cycling, taking young children in prams and push-chairs etc.

I have submitted a hard copy at the Greytown library. This is an another issue that I want to address. Greytown town centre lacks green space and this is most noticeable during the summer months when the pavements get very hot. Council owns some land between Main Street and West street where the Menz Shed currently sits. The council has the opportunity to make this into a green walkway between the 2 streets with tubs or permanent plants along the way. Park benches could be spaced at regular intervals along the walkway which would meander between the 2 streets. A small coffee outlet could be located along the walkway either on land leased from the council or on private land or the council could run the business themselves. This plan would add much needed ambience to the town, provide places to sit and rest and to meet with friends. The walkway could also be used as a cycle track.

Q13

Other feedback for the LTP

Strongly disagree with the closing of Greytown recycling centre. If anything it needs to be open more often. We are rural and pay for landfill waste collection but use the recycling centre at least twice a month. The plan talks about sustainability but this proposal makes recycling harder and encourages longer car journeys.

Q13

Other feedback for the LTP

Re #1 Big Decision: I strongly recommend to reconsider whether all topics listed under your Option 1 need to be addressed in the 3 years. The projected rates increase is absolutely excessive. It is not acceptable that the result of many years of neglect can be done away in just a few years time. A spread over 5-7 years seems much more reasonable for us rate payers.

Q13

Other feedback for the LTP

You have missed the major issue for Greytown - a by-pass. Greytown is a destination town. People come to Greytown to shop and sit outside the cafes and gossip. The latter is becoming increasingly difficult as all conversation is drowned out by a constant stream of trucks and cars. This traffic is destroying the character and ambiance of the town. At the recent Greytown consultation meeting the Mayor was asked about a by-pass and he refused to address the question and said it was a NZTA problem. This was disingenious (to use a term beloved of a Green party MP). Yes it is an NZTA problem but it is also a council problem. Council should have a view about a bu-pass and they should communicate this view to ratepayers. There is strong support from Greytown people for a by-pass to ensure that traffic doesn't destroy our town. Please front up on this issue.

The other issue that bothers me is the recycling depot. I have no problem if the depot is moved - but I am opposed to having no recycling depot. In fact I would like to add another service - a skip that yellow bags can be thrown into. Those who live on lifestyle blocks around the town have no council rubbish collection but a useful service would be a skip at the recycling centre into which we could throw yellow bags.

Do you agree with the preferred option of the lower, more affordable investment package for water and wastewater renewals? See page 6 for details.

Q8

Strongly agree

Do you agree with the preferred option to stop funding rural road seal extensions to minimise rate increases? (This would be reviewed in three years). See page 7 for details.

Q9

Strongly agree

Do you agree with the preferred option to start funding footpath kerb and channel extensions in Year 1, at a current cost of \$400k per year (inflation adjusted?) See page 7 for details.

Q10

Strongly agree

Do you agree with the proposal to stop mowing berms in towns to minimise rate increases? See page 8 for details.

Q11

Strongly disagree

Do you agree with the proposal to develop a new Greytown play space? See page 9 for details.

Q12

Strongly disagree

Do you agree with the proposal to close down the Greytown recycling centre? See page 9 for details.

Q13

Other feedback for the LTP

Further feedback on:

#5 Big decision Greytown play space. I have no option to strongly disagree on the current plan, as I believe the location proposed is inappropriate. Whilst I agree to the play park option for the town, I believe that it should be located close to either of the 2 other sporting/recreational areas in Greytown - either the area known as Greytown Park on Kuratawhiti Street or the rugby club/gym in East Street.

Grouping these type of activities together, in my opinion, creates more community connections and encourages people to try different activities. With the play park at Greytown Park, people may be more inclined to have a swim or play cricket when they see these types of activities close by. My preferred option would be at Greytown Park, although I know some of the residents will disagree, because the area has a strong and long traditional recreational focus for the town.

#6 Greytown Recycling Centre. Strongly disagree with its closure. The proposal seems to be counter to encouraging people in Greytown to be activity involved in recycling. The easier and more convenient recycling is, the more people will do it. As the town is projected to grow, it seems wrong that Greytown is proposed to be the only South Wairarapa town without the extra recycling facility - which is well used by us for major clean ups (especially green waste) etc. Driving to either Featherston, Martinborough or Carterton as an alternative also seems counterintuitive to keeping things local and using less car miles etc.

Q13

Other feedback for the LTP

SWDC should start community consultation proceedings with regarding the concept of Pahikara. The initiative could have huge cultural and economic benefits for our region, and should be included alongside the councils LTP and spatial plans. The concept appears to have a lot of community interest, therefore should be relatively easy to engage on.

Q12

Strongly disagree

Do you agree with the proposal to close down the Greytown recycling centre? See page 9 for details.

Q13

Other feedback for the LTP

There is no kerbside recycling where we live so we use the Greytown recycling centre often.

Travelling to Featherston or Martinborough would be very inconvenient and costly to the environment.

The Greytown recycling centre appears to be well-run and well-used.

It is not on a main street so its "unsightliness" is not very visible, and its only really the gates that are ugly - these could be replaced with more attractive ones.

Fewer trucks access the site, and far less frequently, than the number that drive through the town every day so I don't really understand this problem.

I hope that we are able to keep this facility.

Q13

Other feedback for the LTP

1. The question regarding the 3 waters investment only offers 2 options essentially - increase rates to fund a proposed programme by a lot or increase rates to fund a proposed programme by even more. A 15% increase in rates is completely unacceptable. Past mismanagement of infrastructure is no excuse. Council must find another way to either reduce other or spread the capital upgrades over a longer period. Spot funding 'squirrels', playgrounds etc and concentrate on the basics.

2. Greytown recycling centre. I do not support closing this for 2 key reasons: firstly we are supposed to be encouraging recycling and reducing emissions so sending people to Featherston or Martinborough is counter-productive. Until recently we lived rural Greytown and we used the recycling centre every week or 2. I don't agree that people go to Martinborough instead - if you recycle and compost there isn't a lot of rubbish. Secondly - the reasons given for the current greytown recycling site being unsuitable are not logical. Featherston's is equally accessed via residential streets and has subdivision activity in the vicinity that will increase the residential nature of this location. Also - the explanation starts off by discarding Greytown's site as not so useful due to limited hours, but then says that trucks are annoying for residents. It's only open 6 hours a week how annoying can it be? There's a snobbery here that a recycling station does not fit Greytown's residential area, but it suits Featherston's so well you can increase the traffic volume in our residential area?

Q13

Other feedback for the LTP

Not having a recycling station in Greytown would be a big step backwards.

The projected rates increase graph for the next 10 years is the normal illusion that most councils produce - a substantial increase in the next few years (over 40% in 4 years for SWDC) and then minimal increases after that. This simply doesn't happen and you are kidding yourselves if you believe this.

Q13

Other feedback for the LTP

It is false for council to say their proposal to reduce funding will not impact road safety. I strongly disagree with this proposal. A lot of our rural roads are hazardous and tourists to the area have little or no understanding of how to drive in our conditions. The roads must be maintained and improved where safety is compromised. eg Ruakokopatuna Rd

Q13

Other feedback for the LTP

An open letter to the South Wairarapa District Council (SWDC), 22 April 2021.

Enclosed is my free text feedback, on the Long Term Plan 2021 - 2031.

1. I excite the Crown, both central government, and local government, including SWDC, to plan and resource and implement the electrifying of the rail line from Upper Hutt to Masterton, as soon as practicable.
2. I excite the Crown, both central government, and local government, including SWDC, to plan and resource and implement the stopping of the digging up and burning of coal and oil and other fossil fuels, in New Zealand in general, and in the South Wairarapa District (SWD) in particular, insofar as this is practicable, and as soon as practicable.

Q13

Other feedback for the LTP

Big Decision #1: I prefer building more resilience into Three Waters (option 2)

Big Decision #2: I prefer at least continuing current extension of sealing rural roads. More extreme weather events are likely to lead to more washouts of unsealed road and more costs. I would prefer to see sealing rural roads extended to reduce the impact of this.

Big Decision #3: Elsewhere in the region kerb replacement seems to happen without clear justification. I hope that the criteria set out in the plan are adhered to.
